

Saves Eggs

Royal Baking Powder makes it possible to produce appetizing and wholesome cakes, muffins, cornbread, etc., with fewer eggs than are usually required.

In many recipes the number of eggs may be reduced and excellent results obtained by adding an additional quantity of Royal Baking Powder, about a teaspoon, for each egg omitted. The following tested recipe is a practical illustration:

SPONGE CAKE

1 cup sugar
 3/4 cup water
 3 eggs
 2 teaspoons Royal Baking Powder
 1 cup flour
 1 teaspoon salt
 3/4 cup cold water
 11 teaspoon flavoring

DIRECTIONS—Boil sugar and water until syrup spins a thread and add to the stiffly beaten whites of eggs, beating until the mixture is cold. Mix together three times the flour, salt and baking powder; beat yolks of eggs until thick; add a little at a time flour mixture and egg yolks alternately to white of egg mixture, stirring after each addition. Add 3/4 cup cold water and flavoring. Mix lightly and bake in moderate oven one hour.

The old method called for 6 eggs and no baking powder

If the fathers of Homer have not the grit to see that the cigaret law is enforced why not the mothers take it up? We have rejoiced over the bone dry law and really liquor does not claim its victims as early as the cigarets. We are told that school boys from 12 years up are

victims. It is time something was done. Cigaret smokers never make presidents, either of the nation or of a railroad company. They won't have them in responsible positions anywhere.
