GENERAL MARKET REPORT.

New-York, October 21, 1898.

COFFEE—There was a more active demand for Brazilian coffee futures to-day, but the increased volume of business consisted in part of liberal sell ing, and was to some extent at the expense of the list of quotations. These had a lower average, but the changes were not material. The weaker tone of the market resulted from unsatisfactory accounts from Europe and from Rio; these showed slightly lower quotations, according to Rio, but accounts with cabled advices indicated a lack of speculative interest with procrastination on the part of consumers. The selling contingent was not particularly aggressive, however, it being observed that Santos cabled slightly higher prices and that the combined receipts at Rio and Santos were very small. The regulation factor of already low prices continued against confidence on the short side of the account, on the theory that the market was already oversold for current narrow times. Nevertheless there was a material increase in the volume of business over yesterday's total, there being a mutual disposition to even up accounts. In this way the scope of the variations was narrow throughout the session, with the market finally steady at net unchanged prices to 5 points lower. Sales on the call, 4,000 bags, up to 12 m., 11,500 bags, and total for the day, 50,000 bags. The press it stock of coffee in Havre aggregates 1,235,000 bags, including 838,000 bags, as contrasted with 1,226,000 and 820,000 bags respectively last Friday. Yesterday the steamer Coleridge cleared for Rio with 26,000 bags. The arrival of the steamer Strabo at New York adds 13,773 bags Santos and 14,000 bags Victoria to the already large supplies at this point. Spot Brazilian coffee ruled inactive and weak. Quotations were nominally unchanged; No. 7 Rio, invoice lots, 6c, and jobbing parcels, 6¼c.

COTTON—To day's cotton market developed considerable irregularity. The cable news at hand when business commenced here this morning was better than had been looked for, and our market opened with prices showing an advance of 1 to 2 points and steady in tone. For a time the situation was supported by foreign orders that generally went to the more remote deliveries, with May the favorite position. The early market was also helped by claims that Southern spot markets were firmer in the volume of business over yesterday's total, there being a mutual disposition to even up accounts. In this way the scope of the variations was narrow throughout the session, with the market finally steady at net unchanged prices to 5 points lower. Sales on the call, 4,000 bags, up to 12 m., 11,500 bags, and total for the day, 50,000 bags. The press it stock of coffee in Havre aggregates 1,235,000 bags, including 838,000 bags, as contrasted with 1,226,000 and 820,000 bags respectively last Friday. GRAIN—WHEAT—A reaction took place in wheat to-day that left final prices nearly at the low point of the day, and 1¼@1½c lower than Thursday night. The decline, which was accompanied early in the session by foreign selling, was attributed principally to a break of 2@2¼d at Liverpool, this in turn being associated with a better political outlook. The slight early decline in consols was reported due more to unsettled money affairs than to political matters. There was a midday rally in the market, to 73⅞c for December, against 74⅝c at the opening, but the wind-up witnessed a fresh outbreak of selling for both long and short account in the local pit. In addition to the depressing factors already mentioned the market was influenced somewhat by a less active export demand, sales reaching only 110 loads at all ports, against about half the business done on each of the two preceding days. The decline also brought to light numerous small long accounts held by local operators who tumbled the wheat out on the first appearance of heaviness and kept it up most of the day. News at home was not sufficiently important one way or the other to exert much influence. Spring wheat receipts were larger again, reaching 1,190 cars, against 1,244 cars last week and 552 cars last year, while the seaboard clearances for the day were rather small. Instead of official figures of the week somewhat being in line with those of a week ago, The Minneapolis market, through the demands from millers, was relatively one of the strongest in the country. It will lose probably 25,000 bushels of its stock this week and Duluth about 200,000 bushels. Local estimates point to an increase of 1,500,000 bushels in the next visible supply, against an increase of 700,000 bushels last year. News from Manitoba suggested that not over 8,000,000 bushels of the crop had been threshed, leaving about 20,000,000 bushels stacked and threatened with destruction from prevailing storms. The Liverpool market closed a little up from the bottom, but 1½@1¾d lower. Paris wheat closed partly 10 points up and flour was 10 points higher to 15 points lower.
