THE DAY'S OPERATIONS IN STOCKS.

The money market exhibited an easier tendency yesterday, and careful observers thought that the period of high rates was about at an end. Their opinion was evidently held by the majority of stock market operators too, for there was a much better demand for securities, while speculation reflected the same healthful discrimination in favor of the railroad list that was noted in Wednesday's market. Public buyers were more in evidence. In issues such as St. Paul, Rock Island and other good railroad securities investment buying was reported, while in American Sugar Refining there were indications that some holders were liquidating, and with the proceeds of their sales were buying attractive stocks about which there is no uncertainty. People's Gas shared in this kind of buying, as did also Southern Railway preferred, Atchison preferred, St. Louis Southwestern preferred, Illinois Central, Union Pacific preferred and the anthracite coal stocks. The last-named stocks were features throughout the day, and it was said in well-informed circles that all the coal shares were being bought by an excellent class of operators in expectation of a further decided advance.

Conditions upon which is based the actual value of securities are growing stronger daily, and with the reappearance of an easier money market there should be an active and legitimate speculation in stocks. Fortunately the banks entertain no idea of expending all their resources in furthering the schemes of manipulators and promoters of doubtful industrial enterprises, and within the last few days there has been ample evidence of a disposition among bankers to check, by means of the money market, indiscriminate industrial combinations and dangerous stock market speculation. If manipulation such as that carried on by the men behind Sugar and Tobacco can be curbed the market will appeal much more strongly to public buyers. In this particular yesterday's market was encouraging. Interest was better distributed, and in the volume of sales for the day a large number of stocks helped to swell the total. Sugar, of course, supplied a large proportion of the dealings, but transactions in it were smaller than on any day since the beginning of the current speculation in its stock.

When bull activity is resumed it doubtless will be found that the low-priced stocks of merit are in good demand and ready for the advance to which their intrinsic worth entitles them. In many of the cheap stocks there are valuable equities which must sooner or later find recognition in the speculative mind, especially as the high-grade issues have already made such striking price improvement as compared with the quotation level of a year ago. Of the low-priced stocks of merit may be mentioned Missouri, Kansas and Texas, Chicago Great Western, St. Louis and San Francisco, Southern Railway, Chesapeake and Ohio, Ontario and Western and Wabash preferred. The close yesterday was under the best figures of the day, but as a rule net gains were recorded.

THE DAY'S OPERATIONS IN BONDS.

RAILROAD BONDS.—Market active and firm. Total sales amounted in par value to $3,850,000, against $2,956,000 on Wednesday. The heaviest dealings were in the Atchison, Erie and St. Louis Southwestern issues, Chesapeake and Ohio 4½s, Chicago Terminal 4s, Colorado Midland 2-4s, Kansas City, Pittsburg and Gulf 1sts, Michigan Central 3½s, Reading 4s, St. Louis and Iron Mountain 5s, Texas and Pacific 2ds, Union Pacific 4s, Union Pacific, Denver and Gulf 1st receipts, Louisville, Evansville and St. Louis general 4s, Denver and Rio Grande 4s, and New-York Central Lake Shore 3½s.

In miscellaneous issues De Bardeleben Coal and Iron 6s and Standard Rope and Twine incomes were strong and active. Reports current in Wall Street that the Standard Rope and Twine Company will not make a payment in its income bonds in the coming summer are based upon the known disposition of several of the directors to create a sinking fund out of the present surplus for the retirement of the first mortgage issues, rather than to make an interest distribution to the income holders. Such action would be in line with the company's conservative management, and it would serve to establish the income issues upon a firmer basis, as far as their eventual investment yield is concerned. It is interesting to note in connection with the current dealings in bonds that Rope and Twine incomes are being taken out of the Street by men who can afford to hold them without an immediate return, on the theory that their intrinsic worth is founded upon conditions that must at no remote period make the bonds a solid investment security, while adding in the mean time enough points to their market value to offset the loss in interest.
