THE DAY'S OPERATIONS IN STOCKS.

A further advance in sterling exchange rates to a point nearer the gold-exporting level was responsible in part for an active selling movement on the Stock Exchange yesterday afternoon. The fact that loans to carry over to Monday will be made to-day, Friday being a holiday, created the impression that the money market might be extremely active to-day, and this also induced realizing and bear pressure throughout the list. Declines, however, were small, while offerings were so well absorbed that at the close net changes for the day were not important, even in the highly speculative issues in which the selling was most pronounced. In some issues net advances were shown, and in all issues until the last hour strength and buoyancy were noted.

The advance in sterling exchange appears to be due to an increased demand on a market considerably short of bills. And this demand is believed to reflect in part the buying of exchange in connection with the Philippine indemnity payment. It is generally understood in the Street that the Treasury Department will pay the whole amount by warrant on the Sub-Treasury in this city to the agent appointed by Spain to receive it, and that the last-named person will buy exchange against the money rather than export the specie. The buying of exchange on this account will benefit the banks, as the gold will naturally find its way into the local institutions as soon as the exchange is purchased, and it should therefore be an important factor in causing a relaxation in money rates. The recent increase in imports has served to increase the demand for exchange from the import trade, while the decreased grain exports have caused a decided scarcity of commercial exchange. Despite the advance in sterling, the trade balance abroad in this country's favor must still be very heavy, and the fact that the strength in money rates here has not been reflected in the exchange market is sufficient guarantee of the strength of the local financial situation. This country needs no gold from Europe. It could export the $20,000,000 for the Philippine indemnity, pay April settlements due to Europe in gold and liquidate its merchandise imports in gold without having its vast supply of the precious metal materially lessened. If any trader intends to try to find in the money and international exchange markets a cause for selling American stocks he will discover in those markets convincing proof that he should look elsewhere for bear ammunition.

The so-called Vanderbilt stocks were again features in yesterday's market. New-York Central made a maximum advance of nearly five points, and closed at a net gain of 2⅞ points, while Northwest advanced to 166, closing at 160¾, a net gain of nearly 2 points. Brooklyn Rapid Transit added about 8 points to its market value in the morning, and subsequently lost on profit sales the entire gain, but just before the close it again moved up, with a net gain for the day of 5 points. The railroad list, as a rule, closed under Tuesday's final figures, as did also the greater number of industrials. The rapid advance of Monday, Tuesday and yesterday morning naturally invited realizing sales, and the strength of sterling exchange and a temporary flurry in call money came at a time when the market was ready for a natural setback incident to bull activity. Frequent reactions are the best sort of tonics for bull markets.

THE DAY'S OPERATIONS IN BONDS.

GOVERNMENT BONDS.—Market firm. Final quotations follow:

	Bid.	Asked.		Bid.	Asked.
