CHANGES MADE IN SEVERAL MINES

Management of Interior Trust Company Goes Into New Hands.

Wickenburg, Ariz., Oct. 15.—Several changes have been made in the management of the Interior Mining & Trust company. F. X. O'Brien has resigned as manager and will devote his attention to other interests. W. J. Casey, formerly mine superintendent, has succeeded Mr. O'Brien. The mine is now on a paying basis.

The Monte Christo group has been bonded by Oscar Jennings, formerly with the Hale Mining & Milling company. The property is an old and rich one and it will be extensively worked by the new owners.

Owners of the Venus copper property near Vulture Peak, are preparing to do extensive development work this fall. They will install a hoisting plant and sink about 500 feet or deep enough to determine the character and size of the orebody.

On the Copper Giant, seven miles west of here, development work has been pushed very rapidly in charge of Byron Smith of Congress. The shaft is down 65 feet and with depth the ore seems to increase in quantity and quality.

Satisfactory Development.

The Black Rock, Ltd., is developing satisfactorily. The mill is running smoothly and its output justifies the expenditure of a large amount of money on proposed improvements. The mill was built with the expectation of working very low grade ore; but it seems that the grade, as far as workings have shown, has increased from $4 to $8 per ton. The $8 ore was found in a tunnel that extends entirely through a mountain.

One of the handsomest specimens of copper ore that ever came into Wickenburg was brought from the Spring mine last week. The mine, owned by Yuma parties, is located in the Harcurvar mountains about seven miles from Wendendale on the new A. & C. railway.

A hoist was installed at the property of the Eagle Copper-Gold Co., about 12 miles east of here, and it has been running continuously for the past few days. The water in the 160-foot incline shaft has been reduced 100 feet and it is expected that two or three more days will see it entirely drained. Work in a crosscut to tap the main ledge is also being pushed. E. L. Motts, treasurer of the company, who has been on the ground for the past three weeks, has gone east.

Will Renew Operations.

It was learned this week that the old Keystone mine near Constellation is soon to be started up again. It was purchased from Yavapai county last month by Prescott mining men, who now have an absolutely clear title to the property. This mine has been tied up by litigation for several years and neither the western claimants nor the contestants in the east could give title to it though willing purchasers offered to pay $60,000 for the property. There are many improvements made on the property in the way of buildings and machinery and also many hundred feet of development work, sufficient to show that it is undoubtedly a good mine.

At the Congress.

The Congress Co., near Junction, has an abundance of good ore and the increase in its working force speaks well. It is rumored that operations are soon to start on the Coronado. Some ore is being taken from the claims of the United Gold Mines company. It is thought that this property will again begin shipping this fall. The 10-stamp mill on the Gold Dollar mine is completed and will be started up as soon as the engine arrives. The Alvarado is doing a lot of preliminary work for the installation of additional machinery. The Rincon mine is still running a shift and a half. Work on the Marcos is progressing rapidly as is also work on the Marcos Extension. The Octave company is sinking a 100-foot prospect shaft on the east end of the Loviathan, where it has two patented claims. Work has been resumed by the Southwestern Development company.

Miscellaneous Camps.

Philadelphia people have purchased the old Ajo mine in Pima county. The name of the new company is the Rendell Ore Reduction company, and the price paid by it for the property is said to be $70,000. Six carloads of machinery are now en route to Gila Bend, from which point it will be hauled by wagon to Ajo. This indicates that no time is to be wasted in adding the Ajo mines again to the territory's list of producers. In pursuance of this determination it is the intention of the Rendell company to sink a deep shaft and to go about development in a systematic way. On the property there are 23 parallel veins of good ore within a distance of 1,800 feet.

TRAVELER ACCIDENTALLY SHOOTS HIMSELF

Painful Wound Self Inflicted by Tourist at Lordsburg, N. M., While En Route to California.

Lordsburg, N. M., Oct. 15.—While at Lordsburg on his way from California, to Michoacan, Mexico, Valentin Ruiz, a traveling man, accidentally shot himself. While buckling a 38-caliber revolver to his belt it was accidentally discharged, the bullet piercing the abdomen and then the left leg causing four wounds in all. The injuries are not fatal.

A GOOD SIMPLE HOME MADE MIXTURE

This Splendid Home Receipe Should be Used in Kidney Trouble.

A well known authority states that there are more cases of kidney trouble here now than ever before, while recent reports show that more people succumb each year to some form of kidney disease than any other cause.

When there is sickness, examine the urine. Rheumatism is only a symptom of kidney trouble. It is nothing more or less than excessive uric acid in the blood, which the sluggish, inactive kidneys have failed to sift out, leaving it to decompose and settle about the joints and muscles, causing intense suffering; frequently resulting in deformity; often reaching the heart when death ensues.

Pains across the back, frequent, painful and suppressed urination and other symptoms of weak bladder are not the only signs of kidney trouble; many cases of stomach disease, headache, pain in the heart, inactive liver, etc., are but symptoms; the cause of which can be traced to feeble, clogged kidneys.

The physicians for the insurance companies always carefully examine and report on the condition of the urine. It is a certain sign of sickness or health of the human body.

A test of the urine should be made by every man and woman at least once each year. A simple test is to void a small quantity of urine in a bottle or glass and let it stand over night; next morning, if there is a reddish brick-dust sediment, or white fleecy substance present, either consult some reputable physician or take a good vegetable treatment. The following prescription is recommended highly in these cases, and if desirable the sufferer can mix it at home. Any good prescription pharmacy has the ingredients, which are harmless and inexpensive: Compound Kargon, one ounce; Fluid Extract Syrup Sarsaparilla, three ounces. Shake well and use in teaspoonful doses after each meal and at bedtime. Where any of the symptoms enumerated above are present, good results are sure to follow immediately the use of this simple prescription.

PROSPECTOR FIRES BULLET INTO HEART

Many Who Located Well Known Claims in Sierra County Suicides Without Apparent Cause.

Hillsboro, N. M., Oct. 15.—The body of James M. Smith, one of the first prospectors in the Apache mining district, Sierra county, was found by T. A. Slater and Martin Miranda, in front of the Bowker cabin on the Embolite mine. A bullet wound in the breast, the bullet having penetrated the heart, and lying nearby a thirty-caliber rifle, told the tale of suicide and such was the verdict of the coroner's jury that was empanneled by Justice of the Peace Philip Zoller. Smith was the locator of the Wall street, the Lombard street and other well known mines in the Apache district and had accumulated a competence. He is survived by his blind wife and three children. No cause can be assigned for the suicide.

ENGLAND EXPECTS TROUBLE IN IRELAND OVER HOME RULE

Nationalists Will Use All Means to Block Parliamentary Business in Retaliation.

Premier Campbell-Bannerman. John Redmond.

London, Oct. 15.—Exciting times are expected with the opening of the next parliament. The storm is already gathering in Ireland and politicians believe that it will break heavily, unless the Irish Nationalists obtain assurances of better treatment at the hands of the ministry.

It is the old, ever new, question of home rule, and with their patience about exhausted, the followers of John Redmond have pledged themselves to a campaign that may even include violence.

Sir Henry Campbell-Bannerman has repeatedly been asked as to the intention of the government in making good the pledge to legislate for Ireland as well as Ireland would legislate for herself, if she had the power.

With no satisfaction from this source in sight, the Nationalists will attempt to use every constitutional means to block important business in parliament, in order to call their grievances to the attention of Englishmen. Appeals have so far been in vain and they believe that by making themselves intolerable nuisances they may gain some consideration for their cause.

Meanwhile serious agrarian crimes and outrages are taking place in the south and west of Ireland, due to the avowed policy of organized disorder upon which the most desperate of the Nationalists depend to help their cause.

That more serious trouble is feared is indicated by the unusual number of troops that have been sent into Ireland recently.

CAPITAN PEOPLE ARE BUILDING CITY

New Corporation Formed There to Do General Merchandise and Real Estate Business.

Capitan, N. M., Oct. 15.—(Special)—A corporation under the title of Welch and Titsworth has recently been launched at this place. A prominent El Paso capitalist, Eugene B. Welch and George A. and Will Titsworth are the stockholders. The corporation, which is organized with a capital stock of thirty thousand dollars, is comprehensive in its scope being empowered to deal in merchandise, real estate, live stock, coal and other mines. The principal place of business is Capitan.

The El Paso and Southwestern railroad shops at Carrizozo are now completed. The round house is brick, 14 stalls and the machine shops consist of two large buildings, the main shop being 170-180 feet and the store room 30x60. The pipe line, which brings water from the head waters of the Hondo river, tapping the springs from the Bonita and Ruidoso, and being piped over the mountain, is being rapidly installed and the railroad will have a splendid supply of good water in a short time.

The mining camp at Parsons is reported as making things hum with their five Huntington mills and the new cyanide plant. The development work has recently struck a very large body of ore which yields $8 a ton.

Mrs. J. G. Riggle and children are spending the winter in White Oaks. Mr. Riggle will remain in Capitan.

J. C. West has just bought the C. F. Henley ranch on the lower Ruidoso. Mr. Henley has not determined his future location.

The farmers living on the unsurveyed land in township 10, range 11 east, in the Bonito district are at last to have their locations surveyed and to be able to perfect title to lands on which many of them have been living for twenty-five years, and on which they have fine fields of alfalfa and splendid bearing orchards. The contract for the sub-division of the township has been let to Corbett and Smythe, who have also the contract for the survey of the scenic route between Santa Fe and Las Vegas. The work is expected to begin by the middle of this month.
