THE GENERAL MARKET REPORT.

New-York, August 15, 1900.

COFFEE—Not a spark of speculative enthusiasm was manifested on the Coffee Exchange to-day. From the very opening the tendency was downward, due more to sheer absence of speculative support than to special efforts on the part of the bear contingent. The market started steady in tone at a decline of 5@10 points, latter in sympathy with weakness in Hamburg and in Brazilian markets. Havre was closed in observance of a holiday. Throughout the rest of the session there was not 5 points additional fluctuation in prices, and total sales up to midday aggregated but 9,000 bags. During the late session, the market was apathetic, there being nothing in the way of news upon which to base fresh conclusions, and buying orders sifting in too solowly to rally the market. Total sales for the day of 16,750 bags represented one of the smallest markets of recent times. Receipts of 62,000 bags at Brazilian ports were regarded as indicative of a broadening crop movement, while warehouse deliveries continued at sufficiently small volume to warrant the belief that the country would continue its policy of procrastination until prices had reached a much lower level. At the close futures were steady in tone, with prices net 5@10 points lower. The market for spot coffee was weak and nominal, with prices about on the basis of 8⅞@9c for invoice lots of No 7 Rio. Cleared from Bahia, August 13, steamer Ragusa, with 4,000 bags.

COTTON—Changes in opinion were frequent in to-day's cotton market, and the pendulumlike showed an exceptionally erratic movement. The start was barely steady, with prices 1@6 points lower, and during the forenoon the market ruled generally weak, owing to bear aggression and an absence of anything like bull support. The leading sellers of yesterday started in on the call to depress prices still further, and to dislodge weak long stuff. The cables were sized up as of bearish average, the crop intelligence was encouraging as a whole, while the weather told of needed rains in the Eastern belt, and tolerably clear conditions west of the Mississippi Valley. In addition to these influences, Neill was said to have placed himself on record as bearish on the trade situation, but neutral so far as the crop itself was concerned, except an improvement of 8 to 4 per cent in the condition during July. The meagre information in hand from cotton goods market and New-England cloth mills lacked encouraging ring, while the speculative public seemed to have most decided bearish convictions. At the lowest point of the forenoon prices were 6 to 8 points under the closing of last night, making the net loss since Monday night 22 to 29 points. At midday shorts began to manifest uneasiness, owing to the apparent oversold condition of the market and belief that the long interest had been pretty well eliminated. From a feeling of nervousness, shorts subsequently became positively frightened, and were soon in full rout. Covering was stimulated by a forecast for dry weather over the entire belt to-night and to-morrow, and predictions for continued light receipts. On the up turn the forenoon loss was not only recovered, but a considerable portion of yesterday's decline was wiped out. During the balance of the session the market was extremely feverish, with a tolerably firm undertone. The market finished the day steady in tone, with August showing a net loss of 1 point, while other months were 5 to 8 points higher. Among the many reports received from the crop centre, were the following to Bailey & Montgomery, Newman, Ga.: "Crop has greatly improved during the month of July, and is doing well, except need rain soon. We made report to the Agricultural Department August 1, at 85; still think this about correct on this section. But will take good weather from now on to give us a good crop." St. Paul's, N. C.: "Our river (Cape Fear), has just about dried up. Crops are in the worst condition we have ever seen in our country." Aberdeen, N. C.: "It is terribly hot and dry here; crops a failure." Latta, S. C.: "Crop badly damaged by drouth. Yield will be just about half we planted for this State. Crop can't be over 10,000,000." Fayetteville, N. C.: "Weather fearfully dry here."

Manchester—Yarns, very little doing. Cloths dull.

FLOUR AND MEAL—Sales were again confined principally to small lots, and, while the market showed a fairly steady undertone, it was as disappointing from a seller's standpoint as it has been at any time recently. Spring patents, $4@$4 35; winter straights, $3 50@$3 65; winter patents, $3 80@$4 20; spring clears, $2 90@$3 30; extra No 1 winter, $2 80@$3; extra No 2 winter, $2 70@$2 80; no grade, $19@$19 50 per ton, spot and to arrive. ....RYE FLOUR—More active; quoted: Fair to good, $3@$3 20; choice to fancy, $3 25@$3 55. ....CORNMEAL—Firm; quoted: Kiln dried, $2 45@$2 55, as to brand. ....BAG MEAL—Firm; quoted: Fine white and yellow, 90@95c; coarse, 87@88c. ....FEED—Firm; quoted: Spring bran, spot, $16 25@$16 50; sacks, to arrive, 200 lb, $16 25; spring bran, bulk, $15 50@$15 75; coarse winter bran, $17 @$18 50, latter white; middling, $16@$18; city bran, $17; homing chop, $17, nominal; oil meal, $28 50; linseed oil cake, $27 50; corn oil cake, $20 50.

GRAIN—WHEAT—The wheat market was not only very dull yesterday, but also rather easy in undertone whenever support was withdrawn, or the corn market, upon which, whatever steadiness the market possessed, was dependent, showed signs of easing off. Attempts made early in the day to rouse the market from its speculative lethargy and promote bull sentiment were practically abandoned during the afternoon, as export trade was only about 17 loads and cables rather unsatisfactory. Foreign business and outside trade cut practically no figure in the market at any time during the day. It was a local affair entirely, with bears restrained a little by a let-up in winter wheat receipts and somewhat larger clearances, the latter reaching 510,000 bush wheat and flour for the day from all ports. Receipts at Kansas City were only 237,000 bush, and at St. Louis 149,000 bush, making, with other winter wheat points, a total of 476,000 bush in comparison with 243,000 bush last year. Spring wheat receipts at Minneapolis and Duluth were 213 cars, against 246 cars last week and 184 cars a year ago. At its highest, first Sept delivery in N. Y. City sold at 80 3-16c, and from that eased off to 79⅝c at the close, representing a final ⅛c decline from the previous night. In spite of the fact that no cargoes of wheat have arrived off the English coast in the last week, Liverpool closed ¼d lower, influenced to some extent by splendid weather conditions in England and France. London, on the other hand, was a little steadier, closing ¼@¾d higher than the previous night. The only open market on the Continent was Berlin, which showed a decline of 1@1¾ marks. The weather throughout Northwestern sections was unsettled, but was not an important factor in the day's operations. Quotations of cash wheat, f o b afloat basis, were as follows: No 2 red New-York, 80⅞c, to arrive; No 2 hard Manitoba, 83⅝c, spot; No 1 hard Duluth, 85⅞c to arrive; No 1 Northern Duluth, 83⅝c to arrive; No 1 Northern Chicago, 81¼c to arrive. ....CORN—A good deal of strength was noted in the corn market yesterday, being practically confined to the September option, which in spite of a half cent break during the last half hour closed ⅝c higher than the previous night, while December was ¼c lower. Under these circumstances it looked very much like a squeeze of shorts in that option, notably in Chicago, where the spot situation is said to possess a very bullish aspect, as contract stocks are down to half a million bush and daily shipments far in excess of arrivals. For Thursday only 118 cars of corn were estimated at Chicago, and advices from the country indicated that offerings were small, if not smaller, than heretofore. It was said that 1,000,000 bush of August corn are still undelivered at Chicago. Seaboard clearances were 517,000 bush, but the export business of only 15 loads was one of the factors which caused realizing in the last half hour. September corn in its market sold up to 44⅛c, or 1⅝c above the previous night, and then eased off to 43⅞c. No 2 corn closed at 44⅜c elevator, 45c delivered and 45⅛c f o b afloat. ....OATS—The trade in oats was of small volume, but prices continued steady in sympathy with corn. No 2 oats closed at 26c; No 3 oats, 25¼c; No 2 white, 28½@28¾c; No 3 white, 27½@28c; track mixed, 26@27½c; track white, 27@33c; No 2 white clips, 29@29½c. ....RYE—Market steady; No 1 Western, 57½c, and No 2 Western, 57c, both f o b afloat; State rye, 53c c i f New-York cents. ....BARLEY—Market quiet; feeding, 42½@44½c, and malting, 48@53c, both c i f New-York. ....SEEDS—Timothy, September, $3 80; clover, October, $9 70, nominal.

METALS—The feature of importance in the metal trade to-day was the break in iron. Northern, as well as pig iron warrants, declined 50c per ton, with the undertone rather weak. Northern No 1 is now quoted from $16 to $17 and No 2 at $15@$16, but sales have been made at the bid figures and can still be bought at that. Warrants were quoted at $11 nominal. Tin was a shade firmer here, but very quiet in sympathy with a £1 advance for spot tin in London and £10 for future. The local market closed firm at $31 55@$31 75. Copper both here and abroad remains unchanged. Lead ruled dull at $4 25 and spelter ruled easy, though not quotably lower at $4 17½@$4 22½. Home consumption was very small, as galvanizers have no offer to buy. The production of copper for the month of July amounted to 23,012 tons, as against 21,333 for the same month a year ago. The brokers' price for lead was $4 and for spelter, $4 20.

MOLASSES AND SYRUPS—The situation in both markets lacked new features of interest. While steady to firm in tone, prices were unchanged. Quotations follow: New-Orleans centrifugal, common, 12@13c; fair, 14@19c; good, 20@28c; prime, 30@37c; New-Orleans open kettle, 43@53c; Porto Rico, 34@40c. Syrups, common, 15@19c; fair, 15@18c; good, 19@20c; prime, 21@24c; fancy, 25@28c.

OCEAN FREIGHTS—A limited amount of business was reported in sail tonnage to-day, but there was a good demand for vessels, and full rates were bid, but the scarcity of suitable tonnage and the reluctance of owners to go south of Hatteras restricts trade greatly. Steamers for the grain trade were given but little attention, but rates were well sustained, owing to the general inquiry in other lines. Grain rates were quoted at 4¾@4 15-16 for August-September loading. Quotations to Liverpool were 3¾d; London, 4¼d; Glasgow, 3½d; Bristol, 4¼d; Leith, 5d; Hull, 4¾d; Newcastle, 4¾d; Antwerp, 4d; Hamburg, 75 pfgs; Rotterdam, 9½c; Amsterdam, 9½c; cotton to Liverpool, per 100 lb, 25c; London, oats, 2s 6d.

OILS—Cottonseed oil again showed evidences of weakness for want of important demand, traders being disappointed at the continued indifference of European buyers. Refined petroleum was unchanged. Linseed oil firm, $5 70; offers for limits. Petroleum, refined, $8 05, at the seaboard; Philadelphia, bbls, $8, and in bulk, $5 45; refined, cases, New-York, $9 35. Cottonseed oil—Prime crude, bbls, nominal; prime summer yellow, 34½c; off summer yellow, 34c; butter grades nominal; prime white, 39@40c; prime winter yellow, 40@41c. City linseed—American raw, 43c; American, boiled, 71c; Calcutta, raw, 40c; Western linseed quoted 2c under city brands. Lard oil, 55@56c.

PROVISIONS—Hog receipts at Chicago being considerably over the estimates, provisions opened rather easy, and then acquired a little more firmness, particularly during the afternoon, in sympathy with grain, so that final prices were fairly steady. Hog receipts at Chicago amounted to 26,000, with 24,000 expected on Thursday. The arrivals at Kansas City were 6,000, Omaha 5,800 and at all interior points 60,500, compared with 63,000 last week and 64,000 a year ago. The feature at New-York was a strong market for pickled bellies, owing to exceptional scarcity.
