GENERAL MARKET REPORT.

New-York, July 15, 1903.

COFFEE—The coffee market yesterday opened steady at unchanged prices to a decline of 5 points, and after ruling very quiet during the greater part of the session became more active just before the close, without, however, developing any special price movement. The market was finally steady, but unchanged to 5 points lower. Sales were 27,750 bags. The opening decline was in keeping with lower European markets and full interior receipts and was due to slightly freer offerings in the absence of demand. Later the interests who have recently been accumulating coffee came into the market as buyers without bidding up prices. Most of the coffee sold was believed to be for the account of importing interests and to represent recent purchases in Brazil. Generally speaking, trade is quiet and the market gives the idleness from the comparative firmness of the Brazilian markets, where prices are above their normal parity with the local quotations. Many in the trade do not consider that the primary markets will be able to withstand the pressure of the movement, as supplies begin to accumulate, and, consequently, even at the present low level, there is little disposition to buy far in advance. On the other hand, while the primary markets maintain their attitude of indifference, further declines of moment are hardly expected. The spot market was quiet, with quotations on the basis of 5 3-16c for Rio No 7.

COTTON—Speculation was only moderately active in cotton to-day, and while the market ruled irregular, with fluctuations fairly wide and frequent, there was a lack of sensational developments such as have recently marked the course of prices. The opening was firm at an advance of 2@17 points under better cables than expected and covering, but at once the market turned easier under a renewal of Wall Street pressure and some selling by longs of the room description, which was encouraged by rumors that the ginners were taking profits on every upturn. There was also a report that cotton was being shipped here from Liverpool, presumably for delivery on July contracts, and while thus far but 500 bales are reported to be on the way, this had a somewhat depressing influence, though, generally speaking, it was not thought of great importance as a market factor other than as an indication of the unusual position of the market, which, however, has already been commonly recognized. After a decline of from 5@20 points, putting the market net 4 points lower to 12 points higher, there was a rally as a result of covering and bull support, so that around midday a net gain of from 10@26 points was apparent. From this the market again declined in the early afternoon under fresh selling from Wall Street, stimulated by the continued weakness in Wall Street stock market circles and the unsettled condition of the money market. After being forced down to about the previous low level, however, the bulls again came to the front and the market was finally very steady, net 7@17 points higher. July was neglected all day, selling as high as 8.19c, or as low as 11.86c, and closing at 11.86c. Total sales were estimated at 200,000 bales.

FLOUR AND MEAL—The flour market was firm, but not active, as the trade is uncertain about wheat, and is holding off for developments. GRAIN—WHEAT—Up with the last half hour to-day, the wheat market was in a very strong position, with December particularly firm and showing at one time 1½c advance over the previous night. Near the close, however, heavy selling for long account destroyed all early advances and left the market weak and unsettled, with prices ¼@¾c net lower, except on Decembers, which was ⅛c net higher. In Chicago December also ruled very strong on covering. The late decline was explained by unsatisfactory conditions in Wall Street and heavy unloading, which started in the Western markets. The early upturns were based on unfavorable crop news from many sections of both the winter and spring wheat belts. It was said that latest reports from Manitoba looked for a maximum possible crop of only 50,000,000 bush, whereas the crop last year was 65,000,000 bush. The outlook in spring wheat States was said to be for a yield smaller than last year, while the Southwest, in addition to reporting light threshing returns, noted a good demand for cash wheat from millers and some buying of September by exporters. The export business in New-York consisted of 130,000 bush No 2 red and 4 loads at outports. The former was for Lisbon account. Receipts continued light; cables showed little important change from the previous day. Minneapolis stocks have decreased 473,000 bush in four days and seaboard clearances were very small. In Chicago the Southwest and local houses were good buyers of September early in the day. Quotations of cash wheat, f o b basis, were as follows: No 1 Northern Duluth, 94⅝c; No 1 Northern Chicago, 91⅝c, and No 2 red New-York, 86⅝c, all to arrive. CORN—There was very little feature to the local corn market to-day, prices advancing early on the strength in wheat, but giving way later under selling for long account. There was considerable dissatisfaction with the export business in view of recent activity, only one or two loads being reported. The late decline left final prices ½c net lower. The interior movement continued light, but so were seaboard clearances, while English markets closed partly 3d net lower. No 2 corn closed 57c elevator, and 58⅛c f o b afloat; No 2 white and No 2 yellow, 58⅝c, f o b afloat. OATS—The market for oats was fairly active and generally steady on light offerings. Cash sales here amounted to 175,000 bush. No 2 oats closed at 41@41¼c; No 3, 40½@40¾c; No 2 white, 43½@44c; No 3 white, 43@43½c; track white, 42@49c, and standard white, 43½@43¾c. RYE—Market dull. No 2 Western, 60c, f o b afloat. State rye, 58@59½c. BARLEY—Market steady. Feeding was quoted at 52c, and malting 51½@57c, both c i f Buffalo.

COUNTRY PRODUCE MARKETS.

New-York, July 15, 1903.

BEANS AND PEAS—There is no change in the market for domestic or foreign white beans. Trade remains exceedingly quiet, but the quantity of stock offering is so moderate that values are well sustained. Red kidney have made a further advance, and closed quite strong at $3 20. Scotch peas are again lower and weak; some inferior lots selling below our figures. We quote: Beans, marrow, choice, per bush, $2 50@$2 85; do medium, $2 30; do pea, $2 30@$2 32½; do red kidney, $3 20; do white kidney, $2 60@$2 65; do black turtle soup, $2 60@$2 70; do yellow eye, $2 60@$2 65; do lima, California, $2 55; do imported giants, $1 75@$2 05; do Italian, medium, $2@$2 20; do other foreign, medium, $1 75@$2 10; do foreign green peas, $1 90@$2 15; do foreign yellow, $1 90@$2 15; do green peas, $1 55@$1 57½.

BUTTER—Receipts showed up in pretty good form again to-day, but there was large speculative buying, and stock moved out of first hands quite readily. Under the call on 'Change 50 tubs extra creamery, one tub sold at 20½c, and most of the wholesale business from store was on that basis. Some special lines of very high scoring butter brought ¼@½c more. The under grades of fresh creamery are quiet and lean rather more in buyers' favor. It will be seen that there is a wider range of values than has heretofore prevailed. No change in State dairy nor in any of the Western packings. The demand for all this class of stock is very moderate. We quote: Creamery, extras, per lb, 20½c; do firsts, 19@20c; do seconds, 17½@18½c; do thirds, 15½@17c. State dairy, tubs, extras, 18@20c; do firsts, 18@19c; do seconds, 16@17c; do thirds, 15@15½c; do fourths, 14@14½c. Western imitation creamery, firsts, 18c; do seconds, 16@17c; renovated, extras, 18c; do firsts, 17@17½c; do seconds, 15@16c; do thirds, 13@14c. Western factory, firsts, 16c; do seconds, 15@15½c; do thirds, 14@14½c; packing stock, No 1, 15c; do No 2, 14@14½c; do No 3, 13@13½c.

CHEESE—The general movement in large full cream cheese continues light, exporters showing little interest, but supplies are comparatively moderate and prices held fairly steady with, in fact, some specially desirable factories not offered at present top quotations. Small sizes full cream in fairly active demand from home trade dealers, mostly for storage purposes on the basis of 10c, and stock offering at that figure is cleaning up pretty closely, though some specially fancy are held a fraction higher. Small colored skims in moderate supply and selling readily at firm prices, but all other grades are dragging at irregular figures. We quote: State, full cream, small, fancy, 10c; do fair to prime, 8¼@9¾c; do common, 5@7½c; do, choice, colored, 10c; do white, fancy, 10c; do fair to prime, 8¾@9¾c; do light skims, choice, 8¾c; do part skims, choice, 6@6½c; do prime, 5¼@5¾c; do fair to good, 4½@5c; do common, 2½@3c; do full skims, 1½@2c.

EGGS—There is a continued scarcity of choice Northern stock, and for such the demand continues good, though not worth top quotations that the figures are almost nominal. Very few Western from any section exceed 16@17c, and for more seriously heated eggs values are weak and irregular; many sales are in range of 13@14½c. We quote: State and Pennsylvania, fancy, selected, white, 19@20c; do mixed extras, 18@18½c; do seconds
