GENERAL MARKET REPORT.

New-York, July 1, 1905.

COFFEE—The coffee market continued very quiet, sales for the half session being about 5,250 bags. But the light demand in the absence of profit sellers caused some improvement in prices, and after opening unchanged the market closed firm, net unchanged on May but generally 5 to 10 points higher. There was nothing fresh in the news apparently to explain the advance. European markets continued quiet, the only change being at Hamburg, where prices were a partial ¼ pfg lower, and both the Brazilian markets were unchanged. Receipts at Brazilian ports ran a little over last year, but the early movement of the crop season ending on Friday was slow and the comparison was not considered bearish. Figures showing the total crop for 1904-'05 are now available and make a total of 9,968,000 bags, comparing with 10,468,000 bags the previous season, 12,324,000 bags in 1902-'03 and 15,439,000 bags in 1901-'02. At the beginning of the season just ended the world's visible supply of coffee was 12,301,454 bags. The world's visible supply statement as of June 1 showed a supply of 11,682,586 bags, and as it is expected that the supply for the month of June will decrease another 500,000 bags or more, the statement as of July 1 will show a substantial shrinkage for the year. Estimates for the crop now moving vary considerably, but the indications appear to be for a yield in excess of last season, many authorities placing it around 10,500,000 bags, with some estimates ranging as high as 11,000,000 bags.

The spot coffee market was steady, with quotations on the basis of 7¾c for Rio No 7.

COTTON—The cotton market was again active and excited, but in contrast to the sensational strength of Friday prices showed great weakness, particularly for new crop contracts. The market closed steady in tone at a net decline of 12 to 25 points, the minimum being on the July option. The reaction was considered chiefly due to precautionary profit taking or liquidation by longs for not only the ordinary Sunday reasons, but owing to the fact that a couple of hours after the opening on Monday the government's condition figures will be published and that the market on Monday night will close for over the Fourth, while the Liverpool market will remain open. Naturally enough the severe break accompanying the more or less general selling based on these uncertainties and the favorable weather map for the day, aside from gains in one or two points, gave rise to rumors of speculative developments. It was said, for instance, that the bull leader was trying to unload. It was also alleged that a "leak" had occurred regarding a bearish government report on Monday, though why a "leak" should be expected while the method of preparing and circulating the report are undergoing investigation at the present time is not explained. Liverpool was about as expected. Due to come 10 to 15 points higher, futures there closed 9 to 10 points higher, and spot cotton was 11 points higher. The local market opened 2 points higher on July, which sold at 9.70d on the call, or 5 points above last Friday's close. But other months were unchanged to 15 points lower, and weakness continued, though interrupted by numerous temporary reactions until the general list showed loss of about 16 to 27 points. The close was steady in tone, but only 3 or 4 points up from the lowest on active months.

GRAIN—WHEAT—An adjustment of accounts for the double holiday resulted in considerable irregularity today, prices covering a range of more than 1c per bushel. There was a strong advance to 94⅝c for July in the first hour, or 1c above the previous night, and a drop to 93½c after the regular close. At 1 o'clock July was quoted 95¼c, September 93⅝c and December 93¾c, these prices being about low point for the day. Wheat that the crowd bought early on the Jones estimate of 160,000,000 bushels for the three Northwest States, provided July weather is satisfactory, was thrown over during curb operations, causing too late break in the market. The news from South Dakota was to the effect that the professional element did not care to be short of much wheat over the holidays. The same was true of domestic weather conditions, although in the Northwest the outlook this morning was considerably better than had been predicted the day before. For that reason Minneapolis at first was weaker, while St. Louis reported heavy rains again in harvesting districts, opened firmer. The local opening was about steady, followed by a reaction and the strong advance referred to. At the 12 o'clock close prices showed 8½c net advance. The Liverpool market was quoted ⅝d net higher and Paris partly 10 points up, but Berlin 5 points down. The cash market was quoted as follows: No 2 red, $1 08 in store and $1 09½ f o b afloat; No 1 Northern Duluth, $1 24⅝, and No 1 Northern Manitoba, $1 12, f o b afloat. CORN—Practically all day corn had good support and a firm undertone, which rather puzzled the crowd, in view of receipts that considerably exceeded the estimates. Light deliveries on contracts had some influence in the old also the steadiness of Liverpool and heavy rains in the West, considered rather excessive in view of the recent persistent showers in leading corn States. After the regular close, which was partly ¾c net higher, the market ruled fairly steady, July being quoted 61⅝c at 1 o'clock and September 61c. No 2 corn closed at 62c afloat and 62⅛@62⅜c f o b afloat; No 2 white, 63c, and No 2 yellow, 63½c, f o b afloat. OATS—On good support from commission houses, the delivery of only 10,000 bushels on contract at Chicago and unfavorable weather, oats were firm all day, closing at the top. Cash oats in New-York were steady, as follows: Mixed, 26 to 32 lb, 36@36½c; natural white, 30 to 32 lb, 37@38c, and clipped white, 36 to 40 lb, 37½@40½c. RYE nominal. BARLEY—Market slow. COUNTRY PRODUCE MARKETS.

New-York, July 1, 1905.

BEANS AND PEAS—There has been a fair movement and the market is closing with rather a firm tone on desirable lots of all kinds. We quote: BEANS, marrow, choice, per bushel, $3 40; do medium, $2 17½@$2 22½; do pea, $1 85; do red kidney, $2 85@$2 90; do white kidney, $3 50; do black turtle soup, $3 70@$3 75; do yellow eye, $1 95@$2; do lima, California, $3 75@$3 80; GREEN PEAS, Scotch, per bushel, $1@$1 02½.

BUTTER—Receipts to-day, 7,748 pkgs; exports for week, 1,913 pkgs. Receipts of butter have been very heavy, and speculators are not buying with sufficient freedom to absorb the surplus beyond the consumptive demand. The tone at the close is rather weak, and the outside quotation is extreme. Only exceptionally high scoring goods exceed 20½c, and many lots of very good creamery would be shaded below that slightly could buyers be found. State dairy irregular; very little bringing top quotation. Western imitation creamery quiet but steady. Factory about steady, with a fair export demand. Renovated unchanged. Packing stock fairly firm. We quote: Creamery, extras, 93 to 95 score, per lb, 20¼@20¾c; (Mercantile Exchange official quotation, extras, 21½c); do firsts, 19½@20c; do seconds, 18@19c; do thirds, 17@17½c. State dairy tubs, extras, 19½@20c; do firsts, 18½@19c; do seconds, 17@18c; do thirds, 15½@16½c. CHEESE—Receipts to-day, 2,349 boxes; exports for week, 2,313 boxes. Trading has been only fairly active this week, and with a decided increase in receipts there is a larger surplus than at the close of any previous week so far this season. Country advices indicate a little weaker feeling, and an easier market is evidently developing, though no change has been made as yet in the official range of quotations. Large receipts in light supply, but demand limited, and some surplus lots are offering at 9¾c rather than store. Skims continue in good demand when desirable, and prices steady. Liverpool cable—New, 47s for white and 46s for colored; old, 54s for white and 52s for colored. We quote: New, State, full cream, small, colored and white, 9¾@10c; do fair to choice, 9@9½c; do large, colored and white, fancy, 9⅝@9¾c; do light skims, choice, 7¾@8c; do part skims, prime, 6⅝@7c; do good, 5⅝@5¾c; do common to fair, 4¼@4¾c; do full skims, 1@2c.

EGGS—Receipts to-day, 8,219 cases. There is a fair clearance under reduced receipts, and the market is closing with a fairly steady to firm tone, although prices are extremely irregular, owing to the wide range in the quality of stock offering. Most firmness is shown on the highest grades. We quote: State, Pennsylvania and nearby, selected, white, fancy, 21@22c; do choice, 19½@20c; mixed, extra, 19@19½c; do mixed, firsts to extra firsts, 16½@18c; do Western, extra firsts, 17@18c; do Western firsts, 15½@16c; Western seconds, 14@15c; do thirds, 13@13½c; Kentucky, 13@14½c; Southern, 12@13c; dirties, 12c; do for checks, 8@11c.

FRUITS—DRIED—Friday afternoon prime evaporated apples for October-November delivery were offered at 6¾c, with sales at 6½c, and buyers eager to land contracts at that figure, but holders generally were willing to keep off the market in the face of the advancing tendency. In the spot market prime evaporated apples have advanced, many prime lots in good condition being held for 6c. No change in sun-dried apples or chops and waste. Small fruits dull.
