GENERAL MARKET REPORT.

New-York, July 6, 1905.

COFFEE—The coffee market opened steady at unchanged prices to an advance of 5 points, in response to steady European cables and a renewal of the demand through houses with Brazilian connections and for Wall Street account, but when the early buying orders had been supplied the market gradually sagged off under realizing, and the close, while steady in tone, was net unchanged to 5 points lower. Sales were reported of about 35,500 bags. There was more talk of cold weather in portions of Brazil. According to the official reports, the minimum temperature in the Campinas district on the previous night was 44½ degrees, and San Carlos reported 48½ degrees. This, of course, is not freezing weather, and most local authorities claim that the trees are undergoing no material damage. Recent cables from Havre, however, have mentioned the cold weather as one of the causes leading to covering of shorts, and the French market was again higher, closing at a net advance of about ½@¾ franc. Hamburg was unchanged to ⅛ pfg higher. Both the Brazilian markets reported advances in response to the recent gains in consuming markets, with Rio adding 25 reis to her gain of the previous day, and Santos 100 reis higher. Receipts are moderate, so far as known, the receipts at the ports have been 134,000 bags, against 94,000 bags for the same time last season and 202,000 bags in 1903. The local spot market is quiet, with quotations on the basis of 7⅞c for Rio No 7.

COTTON—The market was somewhat less active, sales being estimated at about 700,000 bales, against 1,000,000 on the previous day, but business was well distributed. Commission and wire houses were, in fact, more than ordinarily busy, and it is evident that, while professional operations may be diminishing, general speculation is gradually broadening, with most of the professional business on the long side of the account. This buying for fresh account imparted a generally firm tone to the market, and prices very nearly recovered the losses sustained in the late trading of Wednesday, with the market closing very steady at a net advance of 12@17 points. October cotton sold within 3 points of the highest point for the season and January within 5 points. The market opened irregular at a decline of 4 points on near months and unchanged to 3 points higher on the new crop months. Cables were just about as expected, but the weather in the South was considered too wet, with sections reporting rains that have recently complained of too much moisture, and after a few minutes of hesitation the market advanced sharply, led by New-Orleans. Liverpool also firmed up, and buying orders reached here from abroad as well as from New-Orleans and through wire houses with Southern connections. According to private wires, New-Orleans was influenced by bad crop accounts from the Southwest chiefly, and the average of private crop news reaching the local market was decidedly bullish. Spot news was more or less conflicting. A Savannah wire claimed that offerings were more liberal and that brokers were beginning to sell contracts against their supplies, but private advices from New-Orleans reported an increasing demand at well maintained prices. The official statement by Statistician Hyde that the July condition figures were made up in exactly the same manner as the June report probably helped the market late in the day, and closing prices were within 2 or 3 points of the top for the session. It had been figured by many that in making up the June report the Statistician had added some arbitrary percentage for exaggeration or bias, and that in the July report this addition had been neglected, thus indicating a slight deterioration in the crop for the month, instead of the expected improvement, and the belief that this was the case naturally increased apprehensions as to the crop.

Manchester—Yarns—The higher price asked checks business. Cloths irregular.

FLOUR AND MEAL—To-day's flour market was quiet at barely steady prices. Purchases were confined for the most part to winter patents and Kansas clears. Trade in rye flour was slow. We quote: Spring patents, at $5@$5 85; winter straights, $4 60@$4 15; winter patents, $4 60@$5 25; spring clears, $3 75@$4 15; extra No 1 winter, $3 25@$3 65; extra No 2 winter, $3 10@$3 25. RYE FLOUR—Steady. Quoted: Fair to good, $4 25@$4 60; choice to fancy, $4 60@$4 90. CORNMEAL—Firm. Quoted: Kiln dried, $2 90@$3, as to brand. BAGMEAL—Firm. Quoted: Fine white and yellow, $1 25@$1 30; coarse, at $1 20@$1 25. FEED—Western dull; city steady. Quoted: Western spring, $17 25; standard middling, $17 75; flour middlings, $20 50; red dog, $22 50. July shipment: city bran, $18 bulk, $19 sacked; middling, $19@$20; red dog, $23 50; hominy chop, $21@$21 50 bulk, $22 25@$22 75 sacks; oil meal, $29 50@$30.

GRAIN—WHEAT—Further improvement in Northwest weather conditions led to active selling of wheat to-day and a general break in prices. At the close July was 1¾c net lower and other positions ⅝c down. The relative weakness in July, which was a feature in all markets, was explained by increased arrivals of new wheat and the good quality of same. Foreign houses also added to the weakness in this market at the opening by large sales of both July and September. Reports from Kansas told of larger yields per acre than had been expected, and the forecast, for the first time in some weeks, indicated clear weather over all the Western belt on Friday. It was clear in the Northwest, giving rise to a distinct improvement in the character of crop news from that section. At the same time a combination estimate on winter wheat by two of the Western authorities suggested a crop of but 365,000,000 bush, compared with the government prospect last month of 428,000,000 bush. This started some demand at midday and rallied the market about ½c, but failed to prove a permanent incidence in view of the more bearish ideas concerning spring wheat brought out by the good weather. "The Price Current" was a trifle bullish on the wheat position, and the Kentucky State report gave condition as 86, compared with 91 last month, these influences coming on the market early in the day without effect. In world's stocks, according to "Bradstreet's," there was a decrease for the week of only 105,000 bush, compared with 5,669,000 bush reduction in the corresponding week last year. The principal changes in foreign markets consisted of ¾d decline at Liverpool, 56@10 points advance at Paris and 14 points net decline at Budapest. Argentine shipments were estimated by Broomhall to be 1,600,000 bush for the week. The local cash market closed as follows: No 2 red, $1 07 elevator and $1 08¾ f o b afloat; No 1 Northern Duluth, $1 19½, and No 1 Northern Manitoba, $1 12 f o b afloat. CORN—On smaller carlot arrivals than expected and bull talk about a lightening of the Western movement, corn was in a firm position all day to-day up to the last half hour, when the market eased off fractionally with wheat, closing here ¼@½c net higher. Cables were practically unchanged, and Broomhall estimated Argentine shipments at 2,400,000 bush for the week. Commission houses were fair buyers during the day at Chicago, while foreign houses bought 30 loads for export at all ports. Total interior receipts were 1,096,000 bush, compared with 378,000 bush last year. No 2 corn was quoted at 62½c elevator and at 62⅝c f o b afloat; No 2 white at 62¾c, and No 2 yellow at 63c f o b afloat. OATS—With other markets oats were somewhat irregular during the day, closing easy. Cash property in the local market closed as follows: March, 26 to 22 lb, 35½@36½c; natural white, 30 to 32 lb, 37½@38½c, and clipped white, 36 to 40 lb, 38@41c. RYE nominal. BARLEY—Market steady; feeding was quoted at 48½c, c i f New-York, and malting at 46@52c, c i f Buffalo.
