GENERAL MARKET REPORT.

New-York, February 26, 1906.

COFFEE—It was a bull day in the coffee market, and prices advanced 20@30 points net, the largest gain for a single day reported so far this season. Sales were reported of about 93,000 bags, which reflected a pretty active business, considering that few switches were included in the total. The advance was due apparently to a combination of three influences—first, reports from Havre that German and French bankers have agreed to raise the loans required by the Brazilian government to finance its valorization plan; second, the relief from apprehensions of nearby liquidation, now that the first March notice day is over, and, third, expectations of a big decrease in the world's visible supply statement as of March 1 in connection with predictions for continued light Brazilian receipts during March. The proposed valorization scheme of the Brazilian government, as it is generally understood, is for the government to buy in Santos and Rio all coffee offered for sale at a price not inferior to 7,000 reis, and at the same time to appropriate a sum of money for the exploiting of coffee as a beverage in countries which are not now large users of the berry. It is argued that the mere fact that the government stands ready to buy a large amount, say 3,000,000 or 4,000,000 bags of coffee in the primary markets at a fixed price will induce merchants to offer the same or at slightly higher prices, and that a considerable part of the loan of 42,000,000 to 45,000,000 to be raised abroad will be left free for use to popularize coffee in countries where its use is not now common. The loan is to be guaranteed by an export duty on coffee exports, which in itself would have a tendency to advance the consuming markets. European cables were firm and higher, presumably on the valorization reports, and warehouse deliveries continue heavy. The market for spot coffee was firmer, with Rio No 7 quoted at 8 7-16c. Deliveries for the week at all American ports were 127,615 bags, against 97,937 the previous week and 60,447 same time last year. Of the total New-York holds 84,962 bags, against 84,455 bags last week. Receipts for the week at Rio were 21,000 bags and at Santos about 57,000 bags, making total receipts for the week 78,000 bags, against 108,000 the previous week, 47,000 same week last year and 92,000 same week in 1904.

COTTON—The cotton market was not more than moderately active, sales for the day being only 350,000 bales, but the tone was very weak and unsettled, and March sold at new low levels for the present movement under a renewal of liquidation, which was caused by the issuance of March notices representing about 30,000 bales. March at one time was travelling about 27 points under May. The market developed no rallying power during the late session, and closed at practically the lowest, net 22@7 points lower. Cables were about a point lower than expected, and the local market opened 5 points lower to 1 point higher, the gain being on the late months. March declined to 10.17c before the call was completed, or about even with the low point of last Friday, but there seemed to be a good demand for that position from the houses which were credited with taking on notices. It was assumed that notices were all taken care of, and there was a rally of about 20 points from the lowest during the early session. But no important bull support developed, and around midday the market weakened again under a renewal of liquidation through wire and commission houses, with March declining to 10.14c. May held around the previous low point, or 10.40c, and closed at 10.42c. Aside from the notices and the selling through wire and commission houses the day's developments were not considered unfavorable to prices. Exports were about three times the port receipts. The interior movement was seen to be falling off to about the figures of 1903-'04—the 10,000,000 bale crop year—and there were further reports of a big spot demand, notably in Liverpool, where 14,000 bales were sold. The weather South was considered favorable for farm work, but such advices as have been received from the fields report that preparations for the new crop are ten to fifteen days backward

FLOUR AND MEAL—There was a quiet trade in flour to-day to meet current needs. Purchases were confined to spring patents and bakers' and Kansas straights and clears. Quotations were barely steady and unchanged. We quote: FLOUR—Spring patents, $4 40@$5 15; winter straights, $3 75@$3 90; winter patents, $4@$4 35; spring clears, $3 50@$3 85; extra No 1 winter, $3@$3 25; extra No 2 winter, $2 75@$3. GRAIN—WHEAT—Only a small response was made by the wheat market to bullish foreign news at the opening. Most of the session the market was barely steady, running into positive weakness in the last hour, with the close ⅛@¾c under Saturday and curb prices ¼c lower than this. Liverpool owed its advance of ¼@½d to the total from Russia, the United States and India. The unexpectedly light world's shipments, including small shipments from all countries was 8,880,000 bush, compared with 12,612,000 bush the previous week. At midday there was little buying on the visible supply decrease of $350,000 bush and some complaints about dust storms in Central and Western Kansas. Although the bulk of the crop news was of a character to inspire active selling pressure, and had much to do with afternoon weakness in the various markets, especially in St. Louis was a good seller on reports of heavy snows in Missouri. The decline brought out stop loss selling in the last half hour, under which the price level sagged to about the lowest point of the session. Owing to receipts of 718 cars in the Northwest, the total primary movement was rather liberal, reaching 907,000 bush, compared with 817,000 bush a year ago, although these figures had something of an offset in the flour clearances of 79,000 bbls. The closing cable from Budapest reported a decline of 5 points, and from Berlin ⅛@¾ mark advance. The quantity of wheat on passage showed an increase of 1,760,000 bush, notwithstanding the light sales to the other side. The cash market in New-York closed easy at the following prices: No 2 red, 89½c elevator and 89½c f o b afloat, nominal; No 1 Northern Duluth, 91¼c, f o b afloat. CORN—The corn market showed a good deal of firmness early in the day, on light country acceptances, the advance of ¼@½d at Liverpool, unsatisfactory weather conditions through the West and supports from commission houses. In connection with a decrease in world's shipments of 400,000 bush, as compared with last week. After holding firm until midday the market shared the wheat decline, and for the balance of the day disclosed an easy tone, last prices in New-York showing a partial ⅛c net loss. The visible supply increased 370,000 bush. Interior receipts amounted to 737,000 bush and clearances to 1,372,000 bush. The export trade included 7 loads of corn here and 10 loads at outports. No 2 corn closed 48½c elevator and 48c f o b afloat; No 2 white, 49½c, and No 2 yellow, 48c, f o b afloat. OATS—In sympathy with corn, the oats market had an early advance, most of which was lost in late trading, as commission houses were on the selling side, and locals also sold in response to heaviness in other markets. The visible supply decreased 1,140,000 bush. The cash market in New-York was firm, closing as follows: Mixed, 26 to 32 lb, 34½@35c; natural white, 30 to 33 lb, 35½@36c, and clipped white, 38 to 40 lb, 37@39c. RYE nominal. BARLEY—Market dull. Feeding, 40½c, and malting, 47@52c, c i f Buffalo.

PROVISIONS—Prices had a sharp break at the opening, in response to lower hogs and big receipts in Chicago. Packers bought freely, however, and the market promptly rallied to sell off again under liquidation and offerings from commission houses. A second advance in the afternoon was based on lighter offerings, investment buying and a little room covering. The market closed steady. Chicago received 60,000 hogs; Kansas City, 7,500; Omaha, 6,000, and the West, 97,000. The estimate for Tuesday at Chicago was 32,000. PORK, steady. London cabled a steady and unchanged market, with business slow, on the basis last quoted of 8s 2¼d for February and March. The local market was also quiet, but steady and unchanged. Duty paid prices were 3 11-32@3⅜c for 96 test centrifugal, 2⅞c for 89 test muscovado and 2⅝c for 89 test molasses sugar. Sales were 6,000 bags Porto Rico centrifugal, prompt steamer shipment, at 3-36c cost, insurance and freight, basis 96 test, less lighterage and wharfage, to Arbuckle Brothers. There was also a sale of 3,000 bags to the Federal Refinery at the above price and terms. A Canadian speculator bought 10,000 bags Santo Domingo centrifugal, 96 test, at 1¾c, cost, insurance and freight, prompt shipment. This figures out 3 7-16c duty paid, but it is said to be doubtful if American refiners would pay that price, and the old range is therefore still quoted, although the closing tone is firm.

COUNTRY PRODUCE MARKETS.

New-York, February 26, 1906.

BEANS AND PEAS—There is quite a firm holding of choice marrow and red kidney, while small white varieties are slow and in buyers' favor. White kidney entirely neglected and lower. BUTTER—Receipts to-day, 6,435 pkgs. The market developed a little easier tone all along the line, even fresh butter, which has heretofore been so scarce and firm, was in a little better supply, and buyers did not show quite so much willingness to operate. In some cases slight concessions were made, and there seemed to be an impression that unless trade improved values would have to go lower. Operators are operating very close to immediate wants. Held creamery is pressed for sale largely by out of town holders, and values are weak and unsettled; our outside quotation is quite extreme. Factory and packing stock are also in buyers' favor. Renovated steady. We quote: Creamery, extras, per lb, 28c; (Mercantile Exchange official quotation, extras, 28c); do firsts, 25@27½c; do seconds, 20@23c; do thirds, 16@18c; do held, extras, 22@22½c; do firsts, 19@21c; do seconds, 17@18c; State dairy tubs, extras, 26c; do firsts, 22@24c; do seconds, 18@21c; do thirds, 15@17c; Western imitation creamery, extras, 20@21c; do firsts, 18c; renovated, extras, 20c; do firsts, 18@19c; do seconds, 16@17c; do thirds, 15@15½c; Western, factory, firsts, 16½@16¾c; do seconds, 15@16c; do thirds, 14c; packing stock, No 1, 16¼@16½c; do No 2, 15@15½c; do No 3, 13@14c.

CHEESE—Receipts to-day, 960 boxes. There is a steady peddling demand for full cream cheese and market continues in healthy shape. Buyers, however, while generally running on light supplies, are disposed to operate in a hand to mouth manner and rarely beyond immediate requirements. Choice light fall made skims in moderate supply and firm, but winter made irregular in quality and value. Liverpool cables 64s for colored and 62s for white. We quote: State, full cream, small and large, colored and white, September, fancy, 14¼c; do October, best, 15½@13¾c; do, late made, small, average best, 12¾c; do large, 12½c; do fair, 11½@12c; light skims, full made, choice, 11¼@11¾c; do winter made, 10@10½c; part skims, prime, 9¼@9½c; do good, 8½@8¾c; do common to fair, 7@7¾c; do full skims, 3½@4½c.

EGGS—Receipts to-day, 7,972 cases. Arrivals are moderate to-day and there has lately been so free a movement that holders are demanding a further advance on the finer grades of both fresh and held stock. At the advance quoted, however, trading is less active and the tone lacks strength. Refrigerators must be exceptionally fine to command 31@32c; most of the remaining supply could only be sold at lower prices. We quote: State, Pennsylvania and nearby, selected, white, fancy, 21@22c; do choice, 19@20c; do mixed, extra, 17½c; do firsts, 16c; Western firsts, 16c; do seconds, 15@15½c; do thirds, 13½@14½c; Kentucky and Southern firsts, 15½@16c; do under grades, 13@14c; dirties, 12@12½c; cracks, 9@10c; refrigerators, finest, 11½@12c; do poor to good, 6@10c.
