FINANCIAL MARKET

Out-of-Town Demand for Money Reflected in Firmer Tendency in Time Loans.

Transactions in yesterday's stock market were light in volume on a movement of prices that showed unimportant changes, with net gains predominating at the close. Opening quotations were firm, in response to the strength in American securities in London, the advance at that centre being based largely upon the easier feeling in financial circles regarding the Moroccan situation, which appeared to be in a fair way toward a satisfactory settlement. Reports from the steel trade likewise encouraged a more optimistic feeling in the Street, a reflection of which was found in decided improvement in Bethlehem Steel stocks and a pronounced resistance by United States Steel common to any effort to weaken its quotation; while the favorable weather reports received from the crop section of the country were another sustaining influence. Favorable developments, however, were without effect upon the market so far as inducing buying orders from the so-called public, which was a negligible quantity in the day's business. Total sales amounted to only 121,398 shares, of which the larger part was supplied by Reading, Union Pacific, United States Steel and the Bethlehem Steel shares. Wall Street opinion favors the theory that as the Bethlehem Steel Company practically has completed its outlay on new construction the question of dividends on the preferred stock soon will be taken up. The whole market showed an absolute lack of animation in the last hour, although prices exhibited an advancing tendency.

Time money rates are firmer and bankers believe that in the rest of the year conditions will be much more in their favor than those recently prevailing, even without any marked increase in stock market activity. The mercantile demand for accommodation is slowly improving, while withdrawals of funds for interior account incident to the gathering and marketing of the crops are developing, to say nothing of shipments of gold from here to Canada incident to harvest and general commercial requirements in the Dominion. Montreal took $1,000,000 from this centre yesterday. The statement of the Clearing House showing actual bank holdings at the close of business last Friday indicates that the interior has begun to draw on its New York funds, but there is nothing new or startling in the movement, as this is the period of the year when out-of-town institutions begin to call upon this centre for money. These institutions for several weeks have been indirectly taking money from New York by settling obligations due the federal Treasury by drafts upon their New York correspondents to the Assistant Treasurer here, a reflection of which is found in the transactions between the local banks and the Sub-Treasury in favor of the latter. Since last Friday the banks have lost more than $1,500,000 on their operations with the national government, notwithstanding the fact that government disbursements at the present time are in excess of receipts. New York is compelled to stand the brunt of the payments into the United States Treasury, while payments by the Treasury are distributed all over the country.

NEW YORK CITY BONDS.
