The Basis of New England Thrift

SAGACITY AND FORESIGHT—Much of the proverbial thrift of New England investors is the logical result of the exercise of sagacity and foresight in the investment of their surplus funds.

SUBSTANTIAL RETURNS—There are very few investments from which more substantial returns have been realized, both in appreciation of principal and dividend return, than the preferred stocks of High Grade Manufacturing Corporations.

EXCEPTIONAL ADVANTAGES—The exceptional advantages possessed by this class of securities for investment of surplus funds are worthy the most careful consideration.

STOCK MARKET REVIEW

Changing Sentiment Influenced by General Electric Prices.

In an atmosphere of rumors of conflicting effects, but under the leadership of General Electric, the market started yesterday on its day's experience. Some of the stocks, like St. Paul, showed strength in addition to the electric energy which was holding the market up, but there was a decidedly bearish sentiment among many traders, which held in check what seemed to be favorable opportunity for a marked advance in prices. A noticeable contrast was shown between the market tendencies of two similar stocks, National Biscuit and Loose-Wiles. The former exhibited weakness, while the latter was strong, making a new high record in its rise since being listed. Steel was fairly strong, but its activity was not particularly impressive. Dulness soon settled over the market, and prices became mere matters of record, instead of rapidly fluctuating fractions. While Consolidated Gas was firm and showed some improvement in a rapid rise at first, it soon lost its force and became quiet. International Paper preferred in the specialty list was quite weak, while Texas Company was boosted some by its supporters. The specialty list was the magnet and the standards were gradually neglected as the forenoon went by, and there was the usual number of tips around to help the strong and send down the weak ones. Loose-Wiles was selected as the favorite to surround with a halo of good prospects, and American Ice was given a flying start by the usual methods of pool operators. The sentiment was much divided, however, and toward the noon hour the bears made a drive on stocks and prices went off with comparative ease. There was support in evidence on the decline and prices showed a disposition to recover, particularly as General Electric made some rapid movements after the announcement of a stock dividend of $30 a share in addition to its regular quarterly payment. Sentiment went through a quick transformation under the influence of the General Electric Company's official melon cutting, and the market began to show improvement. The Hill stocks showed an improvement and the tone of the market continued to show a betterment. The late afternoon brought an active and higher range of prices and the shorts were brought to the point of covering, which kept prices up as the stop orders were reached. There was no special evidence of aggressiveness on the part of the buyers of stock, and the action of the market was favorably commented on as indicating a healthy tone instead of a flashy spectacle. The usual weekly return of the Bank of England, which appears on Thursday, was not overconvincing in its showing as to the satisfactory trend of the financial tone in England. There was a slight decline in the proportion of reserve to liabilities and the statement indicated a strain, which, in view of a continued foreign demand for money, may bring an increase in the rate by next month. The local money outlook suggested a slight hardening of rates, though at present money is comparatively easy. The later movement of crops, however, will probably show stiffer rates and a curtailment of loans East and West. The market closed well up, but there was a slight recession in prices.

DANGEROUS COUNTERFEIT OUT.

Washington, July 25.—A dangerous counterfeit twenty dollar national bank note, of splendid workmanship, has appeared on the Pacific coast. Secret service operatives discovered it in Seattle.
