STOCK MARKET REVIEW

Irregular Prices on Small Volume of Transactions.

The action of the stock market yesterday was rather contrary to what might have been expected of a market facing a holiday period, an election and handicapped by stiff call money rates. Although the volume of trading was comparatively small the tone was steady and at times decidedly bullish. The opening was quiet, but there appeared to be a reserved strength, and no attempt was made by the bears to exhibit selling activity. For the first hour no activity on either side was shown. Some pressure centred on United States Steel caused that stock to decline, but support was in evidence and a recovery was made which at the close showed a gain over Thursday's final quotation. During the second hour a movement was started which at the beginning promised some active higher prices, but enthusiasm was checked by the advance of call money to 9 per cent, and while prices held steady the market settled into a dull tone, which continued most of the day. Foreign influence was ignored, so far as might have been felt from the news of the Balkan trouble and the cable dispatches from Berlin and London, which indicated that discount rates would be advanced to a parity with the Paris rate. Both London and Paris stock markets were closed, so the only foreign effect on American securities for the day was in the action of trading on the Berlin Boerse, where American shares were impressively strong. The trade news from various parts of the United States gave the accustomed cheerful reports, and such railroad earnings for September as were made public, except those of the New York Central, were rather stimulating. St. Paul made a most favorable showing. The September increase in gross was $691,000; net increase was $920,000. Puget Sound extension of the St. Paul showed a gain in September gross of $582,000 and in net $362,000. Among the commission houses there was divided sentiment, but many were inclined to the bear side. Politics was discussed, and the trend of the conversation among the numerous small groups of traders and brokers was of an interrogative nature, wondering whether the market will go up or down after election. Some disappointment was shown in the general foreign money indications, which seemed to be taking on a different form than was expected, and speculation was indulged in regarding the effect of the defeat of the Turks. The closing of the market, while more favorable than otherwise in the final quotations, displayed an irregularity of prices.

FOREIGN FINANCIAL FIELD

Holiday in London and Paris—Prices Strong in Berlin.

London, Nov. 1.—Holiday on the Stock Exchange to-day. Money rates were firm, but the monetary tension was relieved by the distribution of $40,000,000 in dividends and the slackened demand with the turn of the month. Discount rates remained firm, and brokers were acting cautiously, in view of the Continental monetary outlook and the international situation.

Paris, Nov. 1.—The Bourse was closed to-day on account of holiday.

Berlin, Nov. 1.—Prices were strong on the Boerse to-day.

Exchange on London, 20 marks 55½ pfennigs for checks.

Money, 4½ per cent.

Private rate of discount, 4½ per cent.

AVERAGE OF THE TRIBUNE'S LIST OF FIFTEEN RAILS.
