Investment Service

The safe and profitable investment of your money is a most important matter. Money is too valuable to risk in unsound investment. No securities should be considered that do not possess the fundamental quality of safety.

The Bond Department of this company will be glad to give suggestions and advice regarding investments, and you are cordially invited to make use of this service. At the present time we have a selected list of railroad, public utility, and industrial bonds yielding from 5% to 6% which we recommend for conservative investment, particulars concerning which we will be glad to send on request.

Ask for Circular V-204.

Guaranty Trust Company of New York

Capital and Surplus - $30,000,000
Deposits - - - - 168,000,000

The Consolidated Stock Exchange of New York

is the second largest institution of its kind in the United States and Canada, and affords the second largest market in the world for the sale of American securities, offering exceptional facilities for trading in odd lots. The business opportunities presented to those seeking avenues for capital investment are unsurpassed. THE OPENING CALL AT 9:30 A. M. enables members to take advantage of overnight news and happenings, affording the earliest market on this continent. Our early prices are usually followed closely.

The Exchange offers a limited number of memberships to responsible men who can furnish undoubted references as to character and financial standing. CORRESPONDENCE SOLICITED and cheerfully exchanged.

J. E. LYNCH, Sec'y.
36 BEAVER STREET, NEW YORK.

Wagner, Dickerson & Co.,
Members of the New York Stock Exchange, Chicago Board of Trade.

ORDERS EXECUTED in all markets.
AN ODD LOT department.
DESIRABLE INVESTMENTS.

Our stock manuals, grain statistics and Special Weekly Circular, giving most recent facts regarding individual stocks and the general situation, will be sent on request. Correspondence is invited.

25 Broad St., New York.

STOCK MARKET REVIEW

Prices Move Irregularly in Moderate Trading—Many Declines.

Viewed in the light of yesterday's exhibition of trading on the New York Stock Exchange, Tuesday's stock market overexerted itself in an endeavor to revive bullish activity. The recovery which the market made as a whole on Tuesday seemed to possess potential energy enough to carry prices further on the upward scale during more than one day's trading. The analysis made by numerous Wall Street operators and technical students presented rather a convincing array of reasons why there should be some improvement after so continued a period of depression. Wall Street on Tuesday was inclined to be reassured regarding possible national or state legislative interference in the regulation of the Stock Exchange, and the situation presented some favorable signs for market improvement. Yesterday the special evidence of industrial progress which was shown in the record of earnings of the United States Steel Corporation failed to inspire trading enthusiasm.

It was something of a surprise to the bulls when the market developed a sagging tendency. During the forenoon session after the opening the market was practically at a standstill. Traders were bearish, but were not inclined to commit themselves to any extent on the short side. Prices reacted on profit taking on the advance of the day before, which included some operations in American Can. Southern Pacific was one of the exceptions in the standard list in the development of strength, and optimists were inclined to argue that a market leadership would be established for an advance, headed by Southern Pacific. In the afternoon, during the early part of the session, trading practically ceased, except in a few stocks. International Harvester, both common and preferred, rose several points, and the followers of American Can began marking that stock higher up on the list. In the late afternoon United States Steel displayed a hardening tendency, which improved the standard issues and gave to the whole market a slightly better tone.

Among commission houses only a limited interest was shown in market movements, and the Street generally seemed to be interested chiefly in the Steel report of earnings and the future of the corporation as a holding organization. In the advanced summaries of the iron and steel trade for the week great strength was reported in steel products, with a slightly decreasing tendency of new orders. Reports show that the January orders have fallen behind those of December. The railroads are said to be still buying heavily, so that on the hole the situation in that branch of industry is not very discouraging at present. Additional gold to the amount of $500,000 was engaged for shipment to Argentina, and indications still point to further gold exports. The Balkan situation, according to dispatches, was mixed. Peace negotiations were said to be broken off, but the Turks were reported to be willing to make concessions to the allies.
