STOCK MARKET REVIEW

Prices Irregular—Trading Interest and Volume Small.

Some encouragement was given to the local stock market by the continued reports from abroad that the Balkan situation is passing through a gradual improvement and that each day strengthens the belief that political affairs on the Continent will be amicably adjusted. Europe, however, is still afflicted with firm money, and call rates in London increased to 5 per cent, which leaves the real improvement open to question. In the local market there was an indication of a hardening in call rates, but the demand for money was not firm enough to signify a continued rise, unless the demand materially increases. Following the marked improvement of Tuesday and Wednesday, stocks yesterday had a breathing spell, and sufficient irregularity was shown in the list to cause question as to the continuance of a bullish tendency. The Street was not lacking in its bear contingent, as there were numerous readers of the tape and bargain hunters around the commission houses who thought they saw further liquidation ahead and a restricted market until after the Presidential inauguration. However, those who had the courage of their convictions and were willing to sell stocks found a rather stable foundation to some prices which resisted attempts to break the whole list and made the bears hesitate about making large commitments on the short side. One of the opportune periods seemed to be when American Can sold off, and for a little time a vigorous selling movement held forth, but it soon ceased, and the market resolved itself into a dull trading affair, which continued throughout the day. One of the questionable issues seemed to be Union Pacific, and traders were inclined to shun it until more definite information was received regarding the outcome in California. Probably the most important feature resulting from the morning news was the stand taken by J. P. Morgan & Co. in their answer to the "money trust" accusation. While no appreciable direct influence was experienced in the stock market, the clear tone of the brief filed and the masterful presentation of the other side of the question, the pointing out of defects due to a faulty currency system and the high character of bankers had a stimulating effect on the minds of business men which cannot be otherwise than helpful to the whole financial district. The action of the Maryland Railroad Commission in refusing immediately to authorize the Baltimore & Ohio convertible bond issue had a restraining influence on trading and raised the question as to how far public service commissions will exercise their functions in limiting the output of securities. It also brought to the minds of traders the general political tendency and the various restrictive corporate measures which have been suggested for Congressional action in the near future. The closing quotations could hardly be accepted as showing a strong position of stocks, as the list embraced a greater number of specials among the gains than standard leaders. The volume of trading was smaller than on Thursday, and the interest in stocks was comparatively small. There was slight basis for a trend in either direction.

CONSOLIDATED EXCHANGE.

The market on the Consolidated Stock Exchange ended with a steady tone, although a slightly reactionary tendency had been displayed earlier. A decline in American Can had some effect upon the rest of the list in the early trading. On the 9:30 o'clock opening call a moderate amount of Can changed hands at 37⅞@38¾, the latter being its final call price and representing a gain of ¾ of a point compared with Thursday's closing quotation. This advance was due to a little buying by operators who construed bullishly the declaration of 2½ per cent in back dividends on the preferred. In the dealings after the call, however, Can broke sharply. The Consolidated call price for United States Steel was also its call quotation. Some attention was attracted to Baltimore & Ohio by its decline under par in the earlier trading. It was sold on the announcement that the Maryland Public Service Commission had refused to sanction the company's convertible bond issue, but it rallied in the later dealings. There was a transaction in a small lot of New York, Ontario & Western at 30, which represented the only market in Wall Street in that stock. Corn Products was fairly active and inclined to softness. Commission houses handled a good volume of odd lot orders. Sales totalled 27,840 shares.
