STOCK MARKET REVIEW

Prices Sag in Comparatively Dull Trading.

Sentiment at the opening of the stock market yesterday had a bearish tinge to it, which did not encourage any impressive volume of trading. Price changes were unimportant and there appeared to be some new stimulation necessary to inspire any zeal in the trading situation. The factors of improvement in the business world as evidenced by trade reports were passed over with hardly a sign of recognition. The professional element was inclined to the short side in view of the technical position of the market resulting from the covering by the bears during the last few days, and the general deduction was that in the absence of any specifically strong bullish inclination stocks should be sold rather than purchased. Commitments on the short side, however, were not heavy, and the market resolved itself into a dull, uninteresting affair, which dragged along through the morning session without evidencing any firm trend in either direction. Two ruling influences, politics and money, lie underneath the situation, which must be recognized as dictating to a large degree the action of prices at this time. Both of these factors bid fair to remain effective to a greater or less extent for some time to come. A significant development in the money situation was the bidding by Germany for money in this market yesterday. One bid was reported to be of 6½ per cent for loans from March 10 to April 30. This shows that instead of any immediate relief from financial pressure in Germany the outlook is that the period will be much longer than was expected. Another incident of more than passing importance was the advance in the foreign exchange rate. Demand sterling rose to 4.88 and cables to 4.8870, which was the highest quotation for demand sterling since April, 1910. The return of the Bank of England also gave evidence of the firm status of money and the demand for funds abroad. The proportion of reserve to liabilities showed 42.69 per cent, against 43.61 per cent last week, 46.32 per cent on February 20 and 45.80 per cent on February 13. The Bank of France also contributes a money strain in its weekly statement.

The result of the day's transactions on the New York Stock Exchange was a showing of irregularity, with a larger display of losses than gains. The total business transacted was much smaller than on Wednesday. The chief activity was in Reading, which showed a volume of practically double the number of transactions for the day of those of any other stock, the next highest number of sales being in United States Steel. The foreign stock markets were depressed on the less favorable view of the Continental situation and the money strain.

STANDARD OIL SUBSIDIARIES.

The report made public in Wall Street to-day that Attorney General McReynolds was going to reopen the suit against the Standard Oil Company caused a sharp break in Standard Oil stocks. Standard of New Jersey, which opened at 374, declined to 364; Standard of New York broke from 555 to 536, Standard of Indiana from 336 to 328, Prairie Oil and Gas from 332 to 327, Galena common from 308 to 300, Atlantic Refining from 670 to 655 and South Penn Oil from 965 to 955. The pipe line stocks seemed to be less affected, although most of these stocks closed with net declines of from one to three points.
