STOCK MARKET REVIEW

Trading Quiet and Irregular—Good Copper and Crop Reports.

There was a plentiful sprinkling of bearish sentiment at the opening of the stock market yesterday morning, which caused prices to present a dull tone and a sagging tendency. Quotations in some of the issues reflected new lows, and while trading was insignificant in point of volume, the impression prevailed that the bottom had not been reached. Union Pacific, Southern Pacific and Canadian Pacific experienced initial declines, while United States Steel and New York Central opened unchanged. Both Reading and Amalgamated Copper showed gains at the opening, but in the following transactions lost their vantage points.

Very soon after the beginning of business, however, the trend of prices changed and a degree of strength crept in, while operations became more active, and at the end of the first half hour stocks were strong. Transactions were confined to a limited number of issues, which allowed the bears to believe that the strong tone was short lived and that the advance would not be maintained. Reading seemed to be the strong feature of the early advance, and rumors were flying thick and fast that throughout the recent depression there had been an accumulation of Reading which would insure a leadership on the upward move which was beginning, but the late trading disproved this theory and Reading closed down. There was considerable irregularity, and bear pressure in different places was exhibited during the morning session. Chesapeake & Ohio was forced to a new low price for the year, and the selling was stimulated by gossip that the dividend would be cut at the meeting which will be held on Thursday of next week.

All sorts of rumors were circulated around Union Pacific. One concerned the prospect of a new underwriting committee to take over Southern Pacific stock; another that the Union Pacific intends to ask for the approval of a plan to deposit Southern Pacific stock with a committee to be liquidated over a three years' period. While the government crop report was exceptionally favorable and the Copper Producers' statement was surprisingly optimistic, there was little relief from the dulness in the later afternoon, and though no effort to sell stocks was in evidence on the good news, there was little energy on the buying side, and the closing was dull and featureless.

The local market was given some encouragement by the foreign situation, which continued to develop a firmer basis for the belief in the passing of the war prospect, and in the stronger tendency of prices on the European bourses. The Bank of England statement, which appeared during the day, did not reflect a very strong position, although the proportion of reserve to liabilities of 49.90 per cent made a favorable showing with the ten-year average of 49.43 per cent. It is evident that the Bank is still passing through a period of strain to preserve its position, although it apparently maintains control over the situation.

The local money market presented a slightly firmer appearance, but there was no increase in rates. The call money rate was 2¾ per cent for renewals, with little activity in transactions.

U. S. TREASURY FINANCES.

Washington, May 8.—The condition of the United States Treasury at the beginning of business to-day was: Working balance, $70,434,118; in banks and Philippine treasury, $43,214,084; total of general fund, $139,246,632. Receipts yesterday, $2,294,540; disbursements, $2,290,838. The surplus this fiscal year is $8,277,627, against a deficit of $10,917,136 last year. The figures for receipts, disbursements, surplus and deficit exclude Panama Canal and public debt transactions.

CONSOLIDATED EXCHANGE.

The failure of the market to make material headway toward a higher level, in the face of such favorable news as the good showing of the government crop report and the large decrease in stocks reported by the Copper Producers' Association, was disappointing to many of the traders on the Consolidated Stock Exchange. It was the subject of adverse floor comment at the close. Business was on a satisfactory scale, the sales totalling 41,680 shares, including numerous commission house odd lot orders. A feature were odd lot dealings in a number of issues of which no sales were reported elsewhere in Wall Street. In this class were Missouri Pacific, which changed hands at 35¼ and 35; Bethlehem Steel at 33, Illinois Central at 113¼ and 113, Third Avenue at 34½, Tennessee Copper at 35¼ and American Woolen preferred at 73⅞. Opening prices at 9:30 o'clock in most instances reflected small fractional declines compared with Wednesday's closing quotations. After the call the market for a time showed a tendency to improve. The gains apparently invited profit taking, with reactionary symptoms developing in the afternoon. There was an absence, however, of trading aggressiveness. Reading early in the day touched a high price of 162. Chesapeake & Ohio was exceptionally weak early, its decline being accompanied by a revival of dividend reduction rumors, selling as low as 62⅝. Brooklyn Rapid Transit was exceptionally firm and active, but it did not get above 90⅝. Its low was 89½ on the call.

FOREIGN FINANCIAL FIELD

Firm Stock Markets in London and on the Continent.

[By Cable to The Tribune.]

London, May 8.—Had it not been for the coming holidays Saturday and Monday and the settlement next week, the London stock market to-day would probably have shown both strength and activity on the more favorable political outlook and the feeling that the danger line has been crossed. Stocks were firm, but there was a limited amount of business, and in the late trading realizing sales caused a slightly heavier tone in some issues. Consols were firm, but there was irregularity in home rails and mining shares.

American securities were quiet, and there was little in the forenoon trading to attract attention. Irregularity was exhibited at the close, with an easy tendency.

Consols closed ⅛ higher at 75 3-16 for money and 75 5-16 for the account. Canadian Pacific was ¼ higher at 240½.

Gold premium at Madrid to-day was 8.55, against 8.75 yesterday; at Lisbon, 16, unchanged.

Paris, May 8.—Trading was active and prices were much firmer on the Bourse to-day.

Three per cent rentes closed 22½ centimes higher at 85 francs 7½ centimes for the account.

Exchange on London, 25 francs 20 centimes for checks.

Private rate of discount, 4 per cent.

Berlin, May 8.—Sentiment was much improved, and there was good buying exhibited in most of the issues on the Boerse to-day. At the close prices were generally higher.

Exchange on London, 20 marks 46 pfennigs for checks.

Money, 6 per cent.

Private rate of discount, 5⅛ per cent.

BANK OF ENGLAND RETURN.

London, May 8.—The weekly statement of the Bank of England shows the following changes: Total reserve decreased £801,000; circulation decreased £91,000; bullion decreased £892,000; other securities decreased £1,523,000; other deposits decreased £811,000; public deposits decreased £1,541,000; government securities unchanged.

The proportion of the Bank's reserve to liabilities is now 49.90 per cent, against 49.20 per cent last week, and compares with an advance from 49.90 per cent to 51¼ per cent in this week last year.

The clearings through the London banks for the week were £306,170,000, against £350,030,000 last week, and £294,708,000 in this week last year.

BANK OF FRANCE RETURN.

Paris, May 8.—The weekly report of the Bank of France shows the following changes: Gold on hand increased 1,371,000 francs; silver on hand increased 5,995,000 francs; notes in circulation decreased 82,000,000 francs; general deposits increased 21,850,000 francs; bills discounted decreased 187,825,000 francs; treasury deposits decreased 31,850,000 francs; advances increased 23,350,000 francs.
