One Advantage
of the
Partial Payment Method
of buying established dividend-paying securities is that it
Does Not Require a Large First Payment.
The many other good points of this attractive plan are explained in our Booklet 43, which we are pleased to send on request.

MARKET NEWS AND COMMENT

News in the Arabic Case Is Not Good Enough to Carry On Rise.

MARKET STANDS UP UNDER PROFIT TAKING

Early Advance Does Not Get Far—Coppers Up Again—Sterling at New Low.

Though news dispatches indicated growing belief in official circles that our difficulties with Germany would be amicably settled, there was nothing definite enough from Washington or Berlin to carry on the great market advance. The German Chancellor announced that there was possibility that a submarine commander had gone beyond his instructions, and with this encouragement the market opened with another showing of large gains. For the most part these were in the more speculative members of the war group, and their strength was not particularly convincing.

Outside buying was still in sufficient volume to prevent any material loss on the day, in spite of a good deal of profit taking. There was, however, no such frantic bidding for stocks as had characterized the day before. Opening advances gave way under realizing, and the market became comparatively dull in the early afternoon. Toward the close specialties were again put up, but the final movement was irregular. Dealings were less than three-quarters of the million share total of Wednesday.

Yet, when the extent of the recovery from Monday's low prices is considered, the net result of yesterday's trading furnishes remarkable testimony to the confidence of the market. Few issues made losses of more than a fraction, and gains of from 1 to 2 points and more were common among issues actively dealt in. The railroads at no time improved as they had done on the day before, and attracted less trading, but lost little on the day.

Cable advices suggested that it would probably be two weeks before Germany would present its side of the Arabic affair. Our authorities are said to be determined on some pledge that such outrages shall not be repeated, but the present apparent desire of Germany to propitiate this country may mean two weeks without further alarm on the submarine account and an opportunity for further extended market operations. Yesterday the tendency was toward a quieter market in special favorites, with resumption of pool activities.

The spurt in the war market stocks lasted only a little while after the opening. Then the metal group became prominent, strengthened by a jump in the price of copper in London and firmness and better buying of copper, lead and spelter here. Anaconda led the coppers on transactions, involving over 50,000 shares and a gain on the day of more than 2 points. In the final trading Tennessee Copper, which produces acid as well as the metal, made a sensational rise of 10 points after comparatively little movement earlier. A war contract, already made public, was brought forward again by those interested in the stock's market course.

United States Steel started higher, but fell back under heavy realizing. After a late recovery, it closed at 75¾, up a good fraction from Wednesday's final figure. Tractions received more attention at higher prices. The Rumely stocks were reactionary. The reorganization plan, announced after the close, provides for a small assessment on these issues and reducing their holdings.

In the afternoon sterling rates weakened until London checks weakened to 4.63¾ in the pound, ¼ of a cent under the low of the week before. A metallic sovereign is worth in our currency $4.86⅝, and yesterday's low price for a sovereign in London was the lowest ever seen in times of normal money markets in this city. The British credit arrangement is still some distance off, but shipment of 200,000,000 francs in gold to England by the Bank of France this week doubtless foreshadows another large addition to our gold holdings from European sources. San Francisco is steadily receiving gold from the Allies, but not in sufficient quantity yet to maintain rates.

INACTIVE STOCKS.

The following table gives the closing bid and asked prices for stocks which are listed but which were not dealt in on the Stock Exchange Thursday:
