MARKET NEWS AND COMMENT

Trading Broadens as the Week Advances—Prices Up After Apathy.

THE COPPERS LEAD IN THE UPTURN

Railroads Join Industrials in Higher Trend—Money Rates Only Slightly Firmer.

After two days of trading, flat, stale and not particularly profitable, good news from the copper trade sent copper stocks higher on Wednesday, and for the rest of the week dealings were on a larger scale, with prices generally rising. Speculative interest broadened and railroads as well as industrials advanced. The volume of trading increased until Friday's first hour accounted for more than half the business done in the full sessions of Monday or Tuesday.

It was still, in the main, a traders' market, though commission houses did some buying in the latter days of the week. The Ancona dispute, while taken less seriously than Washington advices would indicate, helped to delay resumption of public participation in the decline. The belief that the week might show new purchasing from the outside in anticipation of January's dividend and interest disbursements was not fulfilled. There is, however, another week before the end of the year, and when the time comes for reinvestment of funds that are to be distributed, put at more than $268,000,000, $21,000,000 more than last year, good business is looked for.

The better sentiment with which the market closed left brokers hopeful over the holiday, though as yet it has not appeared what particular influence must be looked for to bring trading on a large scale again. At least dulness following a rise has not had its usual consequence of important reaction. Such professional selling pressure as was attempted brought out little stock and prices rose rather easily when the trading element turned buyers.

Better outlook for resumption of business operations in Mexico without disturbance from internal disorder found reflection in securities of concerns particularly interested. Reports of higher prices for metallic copper at first failed to move the copper stocks, though domestic buying was said to be on an unusually large scale. Later when news came of the British government's purchase of 60,000 tons of copper for delivery next year and quotations for the metal rose higher, the copper stocks improved and brought strength to the rest of the list.

Railroad issues had a late burst of strength on Thursday that followed a remarkable increase in earnings for November reported by the Southern Pacific. Practically all the prominent roads ended with gains of a point or more, and supply was found to be rather limited. Foreign selling, which has so often served to check upturns in the carriers, was not important.

Money rates last week were remarkably easy for the season. There was a little restriction in offerings of time accommodation by lending institutions, with an advance of about ¼ of 1 per cent in rates. Call loans were made above 2 per cent, but renewals were at 1¾ and 2 and comparatively little business was done at 2¼.

LAST WEEK'S TRANSACTIONS.

Daily sales of stocks and bonds on the Stock Exchange during the last week, with yearly comparisons:
