Kansas City Makes Greater Progress as Industrial Center

Construction of New Factories Is Going Forward Rapidly Despite the High Cost of Building Materials

Special Correspondence

KANSAS CITY, Nov. 7.—Long columns of new smokestacks have sprung up here in the last year in the shadow of the great stockyards and packing houses. They mark the great progress the city is making toward industrialism.

Men of business here seem captivated with the idea of making the city more self-sufficient by the production of additional articles to meet everyday needs. When the million-dollar plant of the Kansas City Bolt and Nut Company, now under construction, is completed, this movement toward diversified industries will, it is felt here, be facilitated greatly. The added unit will be the first producer of steel in this city, and by thus making an essential semi-finished material available will throw open the field to manufacturers of agricultural implements, makers of beds and miscellaneous lines depending on steel.

Since the first of the year 325 new concerns have become established here, according to the Kansas City Chamber of Commerce. Not all of these have been manufacturers. The city is still an important jobbing center, although the new trend is toward manufacturing those commodities in which local men have heretofore been the middlemen only. The National Cloak and Suit Company, of New York, believing this city to be well situated as a distributing center, is now erecting a branch here, at a cost of $2,000,000, to care for its Western business, which is now handled through the home office. The Sinclair Gulf and Refining Corporation, whose home office is also in New York, is making a $5,000,000 addition to its huge refinery on the Kansas side of greater Kansas City.

Building Is Active

Unlike most of the cities of the East, which are deferring building on a grand scale in the hope that the cost of materials will fall, Kansas City is constructing factories and homes at present at the fastest rate in a decade. During the war years building here, as everywhere, fell virtually to zero, but local real estate operators to-day asserted that their "build now" campaign has led to more construction in the last eight months than in the previous seven years combined. The argument that those who talk of significantly lower prices speak a "dead language" appealed to the enterprising classes here. Apartment houses, a huge club, a hotel of 1,200 rooms under construction, in addition to the nascent factories and homes, illustrate this.

The stimulus for the present economic activity came with the war, when the normal channels of trade were uprooted and the habits of traders broken. The congestion of freight in the East caused suffering here, and in the great ranches a thousand miles to the southwest and a thousand miles to the northwest, which get a large share of their supplies through jobbers here. Then, too, the War Industries Board induced an assaying by business men in this city of the real potentialities of the district, with the result that local business leaders have concluded that they can make much of what they sell, instead of buying it in the East and reselling it. The increased freight rates have made the differential in favor of Kansas City more important, too.

Largest Cattle Market

And yet to the outsider Kansas City is still impressive chiefly in its traditional role of being one of the great food capitals of the United States. The metabolic of the trade missions from Great Britain, France, Italy and Belgium, who to-day reached here, inspected the food enterprises. This is the farthest Western place in their tour through industrial America, and the strolling of cattle through the business streets and the Wild West show staged this morning by the cowboys at the stockyards gave a succession of the tremendous regions between this landmark and the mountains of the Far West.

Kansas City is the largest market in the world, it is said, for stock and feeding cattle and hogs, and is the second largest packing center in the United States. Representatives of both phases of this industry report that current business is far in excess of the unprecedented volume done a year ago under the stimulus of war needs. To care for the increased trade the Kansas City Stock Yards Company has built a new four-story reinforced concrete loghouse, rebuilt the cattle pens, rearranged main driving alleys and constructed new viaducts.

In 1918 shipments of stock and feeding cattle out of the stockyards here amounted to 1,015,855 cattle and 37,502 calves, a new high record. However, during the first seven months of this year that rate has been greatly surpassed. Seventy-five thousand more, or 19 per cent, were shipped than during the corresponding period last year.

U. S. Disbursements Smaller

WASHINGTON, Nov. 7.—Disbursements of $563,319,203 by the government in October were the lowest in any month since June, 1917, Secretary Glass announced to-day. The net current deficit for the month was $319,239,150, the lowest for any month since April, 1917, excluding months in which income and profit taxes were payable.

Reserve Bank Buys Gold

The Federal Reserve Bank of New York announced yesterday that it had purchased approximately $5,000,000 gold received by the United States Grain Corporation from the Bulgarian government in payment for flour purchased by that country.

J. C. Penney Sales

Sales of the J. C. Penney Company for September amounted to $2,003,818, compared with $2,593,294, an increase of 25.41 per cent. The nine months' sales were $18,494,937, against $13,779,779 in the first nine months of 1918.

Vivadou Dividend

Directors of V. Vivadou, Inc., yesterday declared an initial quarterly dividend of 50 cents a share, payable January 5, 1920, to stock of record December 15. It was announced that the dividend was declared out of current earnings, which are largely in excess of the estimates made at the time of the incorporation of the company and do not include any contemplated increases from operation of new plants. The company is a maker of perfumes, face powders and other cosmetics.
