Canada's Trade at Balance

Exports Only Slightly in Advance of Imports

OTTAWA, Ont., Aug. 28.—Canada's exports and imports almost balance for the twelve months ended July 31, according to a summary of Canadian trade, issued here to-day by the Dominion's Bureau of Statistics.

The total imports are valued at $1,253,191,735 and the exports at $1,264,463,537. Figures for the previous year covering the same period in 1919 were: Imports, $870,850,691 and exports, $1,273,443,272.

Imports from the United States totalled, $881,147,129, while the exports to that country totalled $499,746,802.

Canada's cotton imports were $119,500,887 in 1920, which was the largest item in the list.

Irregular Tone In Stock Market On Quiet Trading

Gyrations of Replogle Steel About the Only Feature; Sugar Shares Yield; Rail Shares Hold Their Own

There was not much of special interest in yesterday's short Stock Exchange session, apart from a rather sharp price swing in one of two issues which moved in response to special influences. The movement of Replogle Steel was the most striking development of the trading, that industrial declining several points on active trading and then rebounding with pronounced vigor. The decline in this issue amounted to about 8 points, after which it rallied above the opening price.

The rest of the market pursued a highly irregular tendency with regard to price fluctuations. Railway shares managed to hold their own, although the amount of business done in this part of the list was small compared with preceding days of the week. Sugar shares came under pressure in the industrial department and substantial declines were recorded in American Sugar and Cuba Cane Sugar. This selling appeared to be mainly for the short account.

Contrary to expectations the overnight announcement that the French government has shipped $5,000,000 in gold as the beginning of a movement of $50,000,000 in this direction as part payment for the French half of the Anglo-French loan maturity in October failed to stimulate buying of stocks. As a matter of fact, it has been known for some time that France contemplated gold shipments, and for this reason Wall Street had probably already discounted this development. The foreign exchange market moved narrowly and there was no indication that rates on Paris had been affected by the gold shipment announcement.

The bank statements were not so favorable as had been expected. The Federal Reserve Bank lost gold through the settlement funds, indicating a flow of funds to the interior, a normal movement for this time of the year, while borrowings of member banks in this district increased more than $40,000,000. As a result, the ratio of reserves to deposit and note liabilities dropped a full 1 per cent to 38.5 per cent. The New York Clearing House banks increased their surplus reserves by borrowing at the Reserve Bank.

The Dollar in Foreign Exchange

In spite of the report that the flow of gold from France to this country in connection with the retirement of the Anglo-French loan had begun, francs displayed no great outburst of strength yesterday. However, French francs remained steady on the basis of the news, while sterling, Belgian francs, lire and marks tended to ease off.

On the first ship, from $5,000,000 to $6,000,000 of gold is expected, and other ships will follow bringing additional treasurer from the vaults of the Bank of France. The total influx from Paris is not expected to exceed $50,000,000, and the exact amount will depend on what refunding arrangement Jean V. Parmentier, director of the French Ministry of Finance, who is now in New York, makes with bankers here. Great Britain shipped $50,000,000 from London for this purpose, and an additional $20,000,000 arrived from Hong Kong for British account.

The general tendency of the European exchanges during the last week was toward weakness, but the recessions were not striking. The pressure of grain and cotton bills on the market continues heavy. There is virtually no demand for the Scandinavian exchanges, as a result of the curtailment of exports from those countries.

If you calculated the cost of the dollar in terms of foreign money at current exchange values—that is, if you were buying a dollar with pounds, marks or francs, its value at the close of last week, as compared with a year ago, follows:

	Yesterday.	Year ago.
In English money	$1.29	$1.10
In French money	2.75	1.60
In Dutch money	1.20	1.03
In Swiss money	1.13	1.03
In Italian money	4.10	1.70
In Swedish money	1.25	1.03
In Spanish money	1.30	.98

(Quoted in dollars to the pound.)

	Yesterday.	Week ago.
