Stocks Slump As Money Rate Rises to 7 P. C.

Downward Swing Gains Momentum on Weakness of Central Leather and International Harvester

The influences making for higher security prices, though dominating the course of fluctuations early in the session yesterday, before long yielded to reactionary forces, and the upward surge was soon checked. The downward swing gained momentum in the afternoon, and was accelerated by marked weakness in special stocks, such as Central Leather and International Harvester. Instead of dropping from 6½ to 6 per cent, as on previous days, the rate on call money toward the end of the session climbed to 7 per cent, and contributed to the downward tendency. The action of money rates was very probably due to the requirement of funds for end-of-the-month disbursements.

A hesitant, cautious tone continues to pervade the marketplace, and as price movements are conflicting, it is a mistake to attempt to read broad significance into the daily fluctuations, which continue to represent little more than the changing whims of professional speculators. The easiness yesterday was so obviously due to a temporary change of heart by regular traders that some brokers were tempted to attribute the day's trend to the return of bear speculators from Palm Beach.

The weakness in Central Leather was due to a special cause. The impression got around the floor that the first quarterly report of the company this year would tell another story of shrunken earnings and that the remaining supply would be exhausted. The preferred stock sank to the level of 1907. The break in International Harvester, also commonly regarded as an investment issue, was associated with the difficulties that all concerns which sell goods to agricultural folk are now experiencing. The decreased purchasing power and frozen credit condition of the farmer tend to make collections difficult for all who sell him goods, either directly or indirectly. Various other reports about the company were afloat to interpret the movement, but they lacked confirmation.

While stocks sold off in a rather thin market, bonds on the average climbed to slightly higher prices, and the number of issues traded was larger than in some time.

Stocks receded, despite marked strength of sterling and firmness of other European exchanges. Rates on London soared to the highest level attained since last summer.

Cotton quotations, responding to the movement in sterling and to a better tone in the Liverpool market, were slightly higher, but grain prices dropped markedly lower on weather reports and rural selling.

Money and Credit

The call money rate suddenly jumped to 7 per cent before the close of yesterday's stock market, after funds had loaned earlier in the day outside the exchange at 5 per cent. The renewal rate was 6½ per cent. Some calling of loans late in the day was reported by banks in anticipation of the April 1 dividend and interest disbursements.

Bank Clearings—Bank clearings at New York yesterday were: Exchanges, $557,678,107; balances, $53,207,309.

Silver—London, 33¾d; New York, domestic bar, 99¼c; foreign, 57½c; Mexican dollars, 43¾c.

The Dollar in Foreign Exchange

Foreign exchange rates on Europe continued firm yesterday, with advances in French, Belgian and Swiss francs especially noticeable. French francs again got above seven cents for the first time since the break on the collapse of reparations negotiations.

Rates on other European centers were generally higher, except lire, which eased off slightly. Exchange on Argentina, Chile and Uruguay was easier, and Brazilian rates eased off slightly.
