Exchange Rise Features Dull Day in Market

Advance of 10 Cents in Pound Sharpest in Many Months; Stocks Quiet; Dealings in Small Volume

Of far greater interest than the slow-moving, inactive, professional stock market session yesterday was the sensational surge of strength in sterling exchange rates. Indeed, the movement here stood out in bold relief as the most important and significant development of the day in the financial markets.

Exchange rates on London opened strong, continuing a movement of recovery begun toward the latter part of last week, and maintained strength to the close. The day's movement carried the demand sterling rate from a close of $3.60½ on Saturday to a high and final quotation of $3.70½, making it one of the most violent swings in a single day the market has experienced since the war upset the exchanges.

Yesterday's rise in sterling had its inception in London, where sterling started 4 cents higher. Undoubtedly the movement is associated, as have been other recent wide swings in sterling rates, with German financial operations in connection with reparations payments. Apparently the German Treasury is accumulating sterling as well as dollars with which to make payments on reparations account. Another factor is said to be the covering of a short speculative position in sterling by market interests.

The stock market session presented little of interest, and dealings, which fell to 279,000 shares, were the smallest in nearly three weeks. The opening was irregular and the market continued to move narrowly and uncertainly until the afternoon, when prices hardened somewhat. Railway equipment shares as a rule exhibited firmness. Rail issues were quiet and showed comparatively small price changes during the course of the session.

Money rates held at 6 per cent and brokers did not find any trouble in covering their requirements at that figure. No government withdrawals are scheduled for to-day, but the flow of funds is apparently still away from New York, a tendency which explains in a measure the present firmness.

In the cotton market the South was a seller yesterday. Grain closed higher on reports of new German credits to be opened here for the purchase of American grain.

Money and Credit

The call money market yesterday was affected by the dullness in stocks. What little demand there was for money, however, was at 6 per cent, which was both the ruling and closing rate. Time money is quoted at 6 per cent for thirty-day maturities.

Bank Clearings—Bank clearings at New York yesterday were: Exchanges, $353,100,000; balances, $48,700,000.

Silver—London, 38⅛d; New York, domestic bar, 99¼c; foreign, 61⅞c; Mexican dollars, 47½c.

The Dollar in Foreign Exchange

One of the sharpest fluctuations in sterling the foreign exchange market has seen in many months marked yesterday's active transactions here. Demand for sterling exchange developed suddenly when it became known that there was considerable buying going on in the London market. Rates advanced swiftly after the opening here, and at the close showed a net advance of 10 cents in the pound, cables being quoted at $3.71.

Accumulation of sterling in London, attributed to buying for German account to meet reparation obligations, and short covering in the market were the principal factors operating to cause the sharp rebound from last week's low point.

Continental rates followed sterling, although changes were relatively not so great. French francs approached the 8-cent level again.

Louisville & Nashville Plans Stock Dividend

WASHINGTON, Aug. 8.—The Louisville & Nashville Railroad Company asked authority of the Interstate Commerce Commission to-day to issue $53,000,000 capital stock to be distributed as stock dividends. The carrier also asked authority to execute a first mortgage on a series of its bonds of which, amounting to $24,652,000, is to be issued and $12,758,000 to be sold to J. P. Morgan & Co. at not less than 91½ net.

The application said that in view of the smallness of the existing capital stock of the company in comparison with the value and importance of the company's property and the fact that the company's surplus far exceeds the amount of the proposed stock dividend it is believed that the proposed stock increase is in every way proper.

"Forty-three million dollars was determined upon as the amount of the increase," the application said, "because it was deemed that the total authorized capital stock of the company should be not less than $125,000,000 and the company's investment of earnings in property has been far in excess of the proposed issue."

Financial Items

Noble B. Vincent, formerly with Blair & Co., has become associated with J. G. White & Co., in their bond department.

Clinton H. Brown, formerly associated with Hornblower & Weeks, has formed the firm of Clinton H. Brown & Co., with offices in the National Bank of Commerce Building, 31 Nassau st., for the purpose of dealing in investment bonds.

After having had its executive offices at 23 Broad Street for the last twenty-seven years, the Continental Bank of New York announces their removal to the Broad Exchange Building, 25 Broad Street.
