Firmer Tone In Irregular Stock Market

Reaction Late in Day Effaces Large Share of the Gains Made in Rally; Money Rate Drops Again

In spite of marked irregularity there was a firmer tone to stock prices yesterday and commodity and foreign exchange quotations moved upward with less hesitation. A survey of yesterday's market results is a more cheerful picture than for some days.

The turn in the stock market, which was swayed in both directions by a multitude of contradictory influences, was extremely slight in net results, particularly since a reaction late in the day effaced a large share of the gains. An upward spurt on technical conditions alone after six successive days of falling prices is certainly not remarkable. Moreover, there were several items in the budget of the day's news which made for a slightly better feeling among speculators. The steel reviews gave the impression that improvement in that industry is in sight; the regular cash dividend on General Electric was declared; also on Railway Steel Spring.

Aside from the rather unimpressive impulses toward recovery yesterday's market was noteworthy only for one dramatic incident, which revealed again the immense extent to which speculation is dependent on news. For the third time in less than three years an error in reporting by a news ticker put speculators distinctly on the wrong track. The wrong report of the Supreme Court tax decision two years ago and the erroneous information yesterday regarding the dividend policy of Mexican Petroleum directors were reflected by fluctuations in security prices, even as if they had been the truth. The market is a barometer over the long run, no doubt, but each day it is fallable in its conduct. It reacts to misinformation as well as to facts. But the fact that within eight minutes a correction of the Mexican Petroleum story was made is a tribute to the swiftness of the couriers which bring to traders the raw material on which they base their operations.

Although Mexican Petroleum quickly recovered its losses when the facts were published, the impact of the sudden selling unsettled the general list and the slow recovery was impeded. There was drifting for a time and then a sharp movement downward.

Call money was available at 5½ and 5 per cent at the exchange. Both the New York bank and the Federal Reserve system generally reveal further striking gains in reserves.

Money and Credit

Call loans renewed at 5½ per cent on the Stock Exchange yesterday, but later in the day the rate dropped to 5 per cent, this being the closing figure.

	Yesterday.	Year ago.
On industrial collateral	5½	7
On mixed collateral	5½	7
Time money (mixed collateral):		
Sixty days	6	8@8¼
Ninety days	6	8@8½
Four months	6	8@8½
Four to six months	6	8@8½

Bank Clearings — Bank clearings at New York yesterday were: Exchanges, $462,100,000; balances, $48,100,000.

Silver — London, 38⅝d; New York, domestic bar, 99¼c; foreign, 62½c; Mexican dollars, 48c.

The Dollar in Foreign Exchange

Foreign exchange rates worked slightly higher yesterday under the influence of covering by shorts. European rates showed almost uniform strength, although rates on Berlin did not gain much. Rates showed some recession from the highest, but at the close cables on London showed a net advance of 1¼ cents at $3.70½.

Changes were small in the South American and Far Eastern groups, rates holding fairly steady.
