Stock Prices Decline in a Broad Market

Chief Impetus for Downward Movement Is Furnished by Short Selling and Profit Taking Sales

Dominant in the principal financial markets yesterday were technical speculative influences rather than new events in the outside world of politics and trade. The reports of an agreement between Lloyd George and Poincare confirmed the speculative judgment which has recently been expressed in rising prices for securities and commodities and higher foreign exchange quotations.

The continuation of the upturn brought the markets in the afternoon technically to a somewhat impaired technical position, which invited profit taking and short selling. The rebound upward had been so sharp that traders concluded that a traditional "healthy" reaction was due, and in deciding to extract profit from a quick turn on the short side they helped to cause the setback.

Toward the close the impulses making for reaction gained momentum and final quotations in the stock market were at the bottom for the day. Both industrial shares and rails on the whole were lower, but there was much more avid buying of low priced rails than any other type of speculative security. In markets such as yesterday's the failure of the prediction that favorable decisions would be handed down by the United States Supreme Court on Reading and on Consolidated Gas to materialize was a factor in guiding the day's policy of professional speculators. The Supreme Court is sedulously careful to avoid leaks as to future decisions, and one may be sure that those alleging to have advance information are simply guessing. The Reading case has been put over and no announcement was made in the gas case. The decision on the right of the Interstate Commerce Commission to fix intrastate rates within Wisconsin was interpreted as favorable to the railroads.

Both cotton and wheat quotations moved similarly to stock prices, having touched new high levels during the day. After the upturn there was a reaction and net losses were registered.

The final foreign exchange quotations were lower than the peake prices for the day, yet the net changes constituted gains.

In the stock market the remarkable aspect was the breadth of the market. More individual stocks were dealt in than on any previous occasion except one early last summer. Dealings reached 1,158,000 shares, and 422 individual stocks were dealt in.

Money and Credit

Call money opened and renewed yesterday at 5 per cent on the Stock Exchange. The rate was reduced to 4¾ and then to 4½ per cent. The supply of funds was more than ample for requirements and loans were arranged over the counter at as low as 4 per cent. Time money rates were unchanged, banks continuing to ask 5 per cent against a general bid rate of 4¾ per cent.

	Yester-day.	Year ago.
On industrial collateral	5	6
On mixed collateral	5	6

Time money (mixed collateral):

Sixty days	4¾@5	7
Ninety days	4¾@5	7
Four months	4¾@5	7
Four to six months	4¾@5	7

Bank Clearings—Bank clearings at New York yesterday were: Exchange, $490,100,000; balances, $64,700,000.

Silver London, 32½d; New York domestic bar, 99⅝c; foreign, 63¾c; Mexican dollars, 48⅝c.

The Dollar in Foreign Exchange

At $4.43¾, sterling exchange again reached a new high for the movement yesterday on continued demand for European bills of exchange. Continentals followed the same trend, and net gains were registered except in rare instances.

Lire scored a gain along with francs, but guilders were heavy and German marks dropped back slightly.

South American rates were firm, but Chinese exchange sagged.

The discount here on Canadian funds reached a new low at 2 per cent, which is an approach to normal.
