Stock Prices Resume Their Upward March

Temporary Decline Is Halted and Quotations Close Higher Than Before the Reaction on Monday

Speculation for a quick turn on the decline was unsuccessful yesterday, for in spite of efforts to continue the setback, quotations firmed up and closed not only higher for the day, but above the closing quotations of last week before Monday's reaction.

The temporary decline was obviously attributable to speculative efforts to capitalize the technical position of the market, but yesterday there was little disposition to throw shares overboard as a result of decline. In fact, when those who had gone short for a quick profit sought cover yesterday they had to bid for securities. The recovery in the stock market took place despite the fact that call money rates climbed from 4½ per cent to 5½ per cent during the day. At the outset the market sold off, but then impulses toward steadiness became manifest. The motor shares, the steels and the low-priced rails were especially sought.

There was more irregularity in commodities than in security prices, but after Monday's break prices steadied yesterday. Cotton prices gained moderately, and wheat prices, on the other hand, were without definite trend.

One item in the budget of the day's news which stimulated the speculative imagination was a piece of Wall Street gossip to the effect that the Steel Corporation was operating up to 60 per cent of capacity.

In the foreign exchange market, after quotations were easier at the opening on profit taking, prompted largely from lower rates quoted in London, sterling and the Continental exchanges resumed their upward march in the direction of parity. Sterling cables during the day climbed to $4.44, which is the highest figure quoted since 1919. In February, 1920, sterling was quoted as low as $3.38. Mint parity is $4.866. During the war sterling was artificially pegged at about $4.76.

Money and Credit

Opening and renewing at 4½ per cent, call money yesterday was offered in adequate amount until after noon, when the rate was advanced to 5 and then to 5½ per cent. The stiffening of the charge was attributed to a movement of funds to the interior. Time money was unchanged as to rate and business continued nominal.

Bank Clearings. Bank clearings at New York yesterday were: Exchanges, $865,000,000; balances, $75,000,000.

Silver. London, 32⅛d; New York, domestic bar, 99⅝c; foreign, 62¾c; Mexican dollars, 38c.

The Dollar in Foreign Exchange

Foreign exchange rates continued higher yesterday, with sterling touching $4.44 at the top. Cable rates at the close were ⅛ of a cent below the highest and ¼ of a cent above Monday's closing figures.

Changes were small throughout the continental list, but rates ruled firm.

Far Eastern rates were steady, with the exception of a setback in Shanghai exchange. Canadian rates continued to improve, with a reduction in the discount here to 1⅞ per cent.
