Stock Prices Go Higher in Active Trade

441 Securities Dealt In on Exchange, Largest Number in Its History; Steel Common Is a Favorite

Speculative enthusiasm was further expressed through increased transactions at the New York Stock Exchange yesterday. The rush to buy in anticipation of a continuation of the rise, which is based primarily on the money easement and upon the expectation of an improvement in business, involved the purchase at the big board of 441 separate stocks, the largest number ever dealt in on a single day. Transactions soared to 1,193,700.

Besides the widening of the number of issues dealt in, reaching many of the low priced shares of doubtful value, there has been this week a perceptible increase in the outside public participation in the daily give and take. In spite of this, the domination of speculative pools, though less complete, continues. And as a phase of the pool activity, the campaign of speaking favorably about certain stocks pervades brokerage quarters, and bull tips have become extremely common.

There was no subsidence of the enthusiasm for the industrial stocks, which were firm right up to the close. Steel common was bought with avidity.

Instead of a passing of the heightened ease in speculative credit, there was a further relaxation yesterday. At renewal time call funds were available at the money desk at the Stock Exchange for 3½ per cent for the first time since January 16. The rate later declined to 3 per cent and in the outside market to 2½ per cent. Even more significant was the offering of thirty-day funds at 4 per cent.

The recovery in sterling, after its recent reaction, went still further yesterday. Cables were quoted at the close at $4.39, up 4⅞ cents for the day. The high mark reached at the beginning of the month, before the setback, was $4.45¼. With the exception of marks, the Continental exchanges moved upward in sympathy.

Wheat quotations, responding to the upturn in the European exchanges, climbed 2 to 3⅜ cents a bushel, on reports of liberal export business. Cotton prices moved 4 points higher to 3 lower in an inactive market.

Money and Credit

The opening and renewal rate on call loans yesterday was 3½ per cent, but the bulk of the day's transactions were at 3 per cent on the Stock Exchange and 2½ per cent over the counter. Increased offerings of time money brought a further reduction of rates in this department, 30-day money being quoted as low as 4 per cent. Loans for 30 and 60 days were arranged at 4¼ per cent and for 90 to 180 days at 4½ per cent.

Bank Clearings—Bank clearings at New York yesterday were. Exchanges, $766,100,000; balances, $90,700,000.

Silver—London, 33⅝d; New York, domestic bar, 99⅝c; foreign, 64⅛c; Mexican dollars, 49¼c.

The Dollar in Foreign Exchange

An advance of nearly five cents in sterling featured yesterday's foreign exchange trading. Offerings were scant and bankers were not disposed to sell. Continentals were firmer in general, although advances were not so striking as in sterling.

Cable rates on London closed at $4.39, against $4.34⅛ Thursday. French francs rose to 9.02 and Swiss francs advanced sharply. Guilders got close to the 38-cent level again.

Far Eastern rates were firmer. Changes in the South American group were irregular.
