
Ninety-eight Years on Broadway

—and each year proves that banking success is not so much a matter of location as a matter of sound principles.

A commercial bank—performing every function of a bank.

Seeking New Business On Our Record

THE CHEMICAL NATIONAL BANK OF NEW YORK

Founded 1824

BROADWAY AND CHAMBERS, FACING CITY HALL

Serves to *Prevent* Credit Losses

What Our Service and Collection Dept. Means to Manufacturers and Jobbers

Some of the American's Policies of Credit Insurance guarantee to cover not only the various forms of actual insolvency, but also include and cover accounts which, at the election of the assured, are due and payable at the time of filing, but not over sixty days past due, under the original terms of sale.

The New York Insurance Dept., in its March 6th report on examination of the American Credit-Indemnity Co., says:

"Undoubtedly the activities of the service and collection department have lowered loss ratios, afforded efficient service at a minimum cost, rendered collections more certain and assured prompt recovery to the Policyholder, any such collections being immediately remitted to assured without waiting for adjustment at the end of Policy period. Furthermore, notices filed under the collection provision of the bond are accepted as proved claims and save the assured the necessity of substantiating his claim at maturity of Bond."

Write or phone today for full particulars. No obligation.

Payments to Policyholders over $11,000,000.00

Investment Information

Questions of general interest to investors will be answered in this column, in which case only initials will be used. Others will be answered by mail. Address all inquiries, inclosing a stamped, addressed envelope, to Financial Editor, The Tribune, 154 Nassau Street, New York City.

On Wrong Track

Question—Would like to have your opinion about Colombia Emerald at 44 cents, Southern Coal and Iron at 98 cents, Independent Lead Mining Company at 20 cents, Lone Star Mining at 3 cents, Glenrock Oil at $1, Ray Hercules Mines, Inc. (new) at $1. I possess all these shares in a small amount, so the investment would be about $400 in all. I just picked them out so I do not have one amount in one basket.—G. H.

Answer—You are on the wrong track. If we are to judge by the character of the stocks you mention that this is your idea of investing, then we are constrained to state that there is just one safe basket for all your eggs—the savings bank. These stocks represent little more than prospects and are highly speculative, to put it mildly.

Investing Insurance Funds

Question—My wife is about to receive $5,000 from a paid-up insurance policy. Will you be good enough to advise me as to the investment of this money in long-term bonds of safety and paying 6½ per cent or over? Please give me a list of a few bonds. Can you also give me your opinion as to investment in the S. W. Straus & Co. first mortgage series 6½ per cent bonds? I have a paid-up life insurance policy on which I could borrow from the company about $4,000. It occurred to me, why not get that amount and invest in first grade bonds paying about 6½ per cent or over, earn the difference between this interest and the 6 per cent I would have to pay to the insurance company, besides taking advantage of the present high rate of interest? After my death my wife would only have to worry about investing the remainder of the money she will get from the company. She also would have the advantage of higher interest bearing bonds than she could obtain then. I am past fifty-nine years old. If you approve this transaction will you recommend the kind of bonds? Possibly the bonds of the first part of my letter will answer the same purpose.—A. M. F.

Answer—We would not advise you to borrow on your life insurance policy and invest the proceeds in bonds, because we think that the kind of bonds selling under present conditions to yield 6½ per cent or more are not suitable for a person in your circumstances. A year ago you might have made this deal with profit and comparative security. For your wife's funds we would suggest two Great Northern Railways 7s, 1936, yielding about 6.2 per cent; two Bush Terminal Buildings 5s, 1960, yielding about 5.7 per cent, and one Swidish government 6s, 1929, selling around 100. The Straus bonds would also be suitable for your wife's purpose.

Care in Making Changes

Question—I seek your advice on changing some of my investments. I own besides Liberty bonds and mortgages, one Swiss bond, twenty Morris & Essex, twenty Northern Central, eighteen American Telephone and Telegraph, ten Standard Oil of New Jersey preferred, ten Standard Oil of New Jersey common, ten American Sugar preferred. My broker advises to sell the Morris & Essex, Northern Central, Standard Oil preferred and common for a better yield, and offers the following selection: Burns Bros. 7 per cent preferred, Pittsburgh & Lake Erie, city of Buenos Ayres 6 per cent, 1946, Texas & Pacific 5 per cent, 1931, and Quebec & Ontario 6 per cent. Your advice will be greatly appreciated and followed, as I have absolute confidence in your judgment.—H. J. H.

Answer—If you want a higher rate of income we believe the Morris & Essex, Northern Central and Standard Oil of New Jersey stocks are the proper ones to dispose of. They are extremely conservative and we would caution you to avoid going too far toward the other extreme in selecting substitutes. It is our idea that you should take seasoned preferred stocks of good grade or conservative bonds. Texas & Pacific 5s, 1931, are not the kind of bond we have in mind, nor is Burns Brothers preferred the kind of stock. We would suggest American Locomotive preferred, paying 7 per cent and selling around 115; American Ice preferred, paying 6 per cent and selling around 81; Canadian Northern 7s, 1940, selling recently to yield about 5.5 per cent; Swedish government 6s, 1939, selling around 100; New York Edison 6½s, 1941, selling recently to yield about 5.6 per cent.

Selects Suitable List

Question—I have been requested to select a list of bonds for a woman who desires to invest about $6,500. I have selected the following non-callable bonds and desire your opinion on these securities and any changes you may suggest: $1,000 State of Queensland 7s, 1951; $1,000 Pennsylvania Railroad 6½s, 1936; $1,000 Great Northern Railway general mortgage 6½s, 1952; $1,000 Canadian Northern Railway 6½s, 1946; $1,000 Minneapolis, St. Paul & Sault Ste. Marie first refunding 6s, 1952; $1,000 New York Edison 6½s, 1941.—G. C. F.

Answer—All these bonds are suitable for the kind of investment which you mention. We would suggest, however, the advisability of substituting an industrial bond for one of the railroad issues. You would give this investment better diversification by taking United States Rubber 5s, 1947, selling recently to yield about 5.8 per cent for the Minneapolis, St. Paul & Sault Ste. Marie 6s.

Worried Over Cable Bonds

Question—I recently purchased Commercial Cable Company 4s, 2397, at 72¾. You have not mentioned this bond in your comments. Is it high grade and safe to put away? I buy only for safety of principal with reasonable income, say, about 5 per cent to 5½ per cent. Will radio have an adverse effect on this bond?—W. B.

Answer—The Commercial Cable Company 4s are a high grade investment. We can conceive of a situation in which the earnings of this company would be affected by the extension of radio facilities, but there is nothing in the Commercial Cable Company's charter to prevent it acquiring an interest in radio properties.

Has Good Investment

Question—Your columns of advice to investors are most interesting and instructive. Permit me to ask your advice as to my small holdings: $1,000 Boston & Albany Railroad bond, 5 per cent refunding, due October, 1963; six shares American Telephone and Telegraph stock, two shares American Smelting and Refining Company preferred; six shares West End common, listed on Boston exchange, purchased on advice of broker in Massachusetts at 65. Request particularly your opinion as to safety of this. There also is being held in trust for me, to be turned over to me soon, 100 shares American News. Information as to the safety and nature of company's business is requested. For your information in analyzing the suitability of the above for me, I am twenty-eight years old, married; have two small children; salary $2,300 a year. Prospects good with revival of business. I carry $10,000 government insurance on the term basis; $3,000 insurance, ordinary life basis; $2,000 insurance, twenty-payment life basis; $3,000 accident and health. We do not own our home.—E. M. B.

Answer—Many of the investment inquiries we receive could be answered with less difficulty if they contained as comprehensive a statement of pertinent facts as you have given us. Your Boston & Albany Railroad bond, American Telephone stock and American Smelting preferred are good investments. The lease under which the West End properties have been operated by the Boston Elevated Railway Company for the last twenty-five years expired in June of the current year. The Massachusetts Legislature has adopted a measure permitting the Boston Elevated to take over the properties of the West End Steel Railway and they will do so on the following plan: West End preferred will be exchanged for Boston Elevated first preferred and the common for Boston Elevated second preferred. Boston Elevated common will become a preferred stock of the enlarged company, subject to the first and second preferred stocks. We believe that under this plan the stock you will get in exchange for your West End common will be a reasonably good investment. The American News Company stock is a good investment.

Four full columns of investment questions and answers will be published in The Tribune every Sunday and Monday. On other days one full column will appear.

Prices Again Firm On Active Buying In Curb Trading

Oils Continue to Advance on Increased Production Reports; Industrials Rule Generally Steady

Profit taking after an early advance met with renewed demand and prices closed higher in active trading on the curb market yesterday. The setback of the early afternoon proved only temporary. Oils ruled firm and industrials held steady.

Standard Oil of Indiana was again strong, rallying nearly 2 points, while International Petroleum, Mexican Seaboard Maracaibo, Mountain Producers and Fensland spurted higher. The last named was one of the active features of the moderate priced group.

Radio common worked up to a new high for the movement at 5, while Philip Morris gained more than a point and other industrial issues continued in demand.
