Day's Dealings in Bonds

The Market

Maintenance of strength in the bond market yesterday, with an excellent demand continuing and the supply of prime securities not in proportion, operated to confirm expectations of investment bankers that during the next few weeks a fair volume of new financing will be undertaken. There are several major issues regarded as probabilities, while a steady outpouring of smaller, second-grade flotations is looked for. These should hardly be in volume to check the market, however. Activity yesterday was substantial and the forward movement of prices proceeded, if somewhat less buoyantly than on Thursday. Libertys held around their previous close.
