Stock Prices Recover After Early Decline

Selling Pressure Induced by Foreign Situation and Higher Call Money Rate; Sterling Exchange Breaks

Speculators raided the market early yesterday on the basis of the reports from the Near East to the effect that the Turks were invading the zone of the Straits, but before the close a covering movement effectively offset the earlier losses. The selling was intensified by a 5 per cent call money renewal rate, the highest in many weeks, which was attributable to temporary extra demands on the banks, resulting from the rush on Thursday to get imported merchandise out of bonds before the new tariff became effective and by the passing of income checks through the banks.

The character of the foreign news resulted in weakness in sterling exchange, which declined a full cent to $4.41⅝. Continental exchanges, however, fluctuated within narrower boundaries, and net changes were irregular. Cotton closed 8 to 19 points higher as a result of covering, and wheat quotations, after attaining the highest level in about seven weeks, reacted some on profit taking, and closed unsettled with gains varying from 1½ to 2¼ cents a bushel.

One explanation of the selling of securities is the fact that banks to take care of the growing seasonal needs for credit, instead of borrowing at the Federal Reserve Banks, have been offering securities previously accumulated for sale. This development was to be expected, and in no way indicates a fundamental change in the situation. Expanding business will be reflected in increased borrowing at the banks.

The covering movement in the stock market in the last hour was in the nature of profit taking by the bears, who apparently had little desire to remain short for a relatively extended period in the present market. Indications that the earlier foreign news had been exaggerated created a desire to close out commitments.

Average prices of both railroad and industrial shares at the close were slightly higher than on Thursday.

Money and Credit

Call money renewed at 5 per cent, but did not get up to the 6 per cent rate that prevailed at the close on Thursday. The high point was 5½ per cent. The effect of the stiffening of the call rate has been to once more attract funds here from the interior. With the operation incident to the payment of the September 15 tax payment now practically completed an easier tone to the money market is expected next week.

Bank Clearings—Bank clearings at New York yesterday were: Exchanges, $739,000,000; balances, $67,000,000.

Silver—London, 35¼d; New York, domestic bar, 99¼c; foreign, 69⅝c; Mexican dollars, 53c.

The Dollar in Foreign Exchange

Indications that Great Britain would take a firm stand in opposition to the Turks in the Near East disturbance led to increased offerings of sterling, and cable rate on London fell a cent to $4.41⅝, while French francs recovered a part of recent losses.

Continentals on the whole, however, presented an irregular trend, with changes small. Norwegian crowns worked slightly higher, but other Scandinavian rates sagged.
