Stock Prices Go Higher in Eager Market

U. S. Steel Leads Average Quotations to New Record Levels for the Year; Steels and Oils in Favor

Speculators entered the new week determined to carry on the bull movement in stocks which had been interrupted for three weeks by a reaction linked up with the uncertainties in the Near Eastern political situation. After the moderate decline, which had been checked ten days ago, prices began to climb rapidly last week and effaced most of the recent losses.

Led by a spurt of United States Steel to a new high record for the year, speculative security prices yesterday leaped to the peak thus far for the year and for the recovery which began more than thirteen months ago. The steels and the oils were bought with especial avidity. Many individual shares touched record heights, and the buying was eager until very near the close, when call money rates, which at renewal time were 4½ per cent, climbed to 6 per cent. The rise of money rates represented special temporary factors, such as the increased demand for speculative purposes and a diminishment of supply through out of town withdrawals, and was without broad meaning. It served, however, to check the upward movement, and though most shares retained very large gains, they did not close at the highest figures for the day. The excited speculation in Steel common was heightened by the fact that the corporation at noon to-day will announce the figures for unfilled tonnage, which are expected to show 750,000 to 1,000,000 tons increase. Steel orders were swelled by the rush to buy rails before the rise of October 1.

Of more permanent interest was the response of the financial district to the first government bond offering since the Liberty loans. The new bonds were already quoted in the open market at a premium of three-quarters of a point, and the indications were that the loan would be heavily oversubscribed. The terms were looked upon as better than the minimum terms the Treasury could get by with, and this fact was reflected in early softness in prices of outstanding Liberty bonds, with which the new securities, in a sense, compete. The bond market as a whole was steady, with interest centering on the traction issues. The Interborough recapitalization plan, to which a majority of the interested security holders have assented, encouraged buying.

Sterling exchange was steady, but the Continentals declined. Marks, quoted at .08⅝ of a cent, were the nearest to zero that they have been thus far.

Cotton quotations were higher, with grain quotations irregular.

Money and Credit

An opening and renewal rate of 4½ per cent for call money yesterday failed entirely to measure conditions of the session. There was some further withdrawal of funds by the interior and the calling of loans which this occasioned was accompanied by a rise in demand. The result was an advance in the rate to 5 per cent shortly after noon and from this point the charge was carried to 5½ per cent and then to 6 per cent just before the close. The government will withdraw about $9,000,000 from the banks to-day. Inquiry for time funds was slight and chiefly for the ninety-day period. There was sufficient money offered for this maturity, at 4¾ per cent, to take care of the demand.

	Yesterday.	Year ago.
Call rates:		
On industrial collateral	4½	5
On mixed collateral	4½	5
Sixty days	4¼@4½	5¼
Ninety days	4¼@4½	5¼
Four months	4½@4¾	5¾
Four to six months	4½@4¾	5¾

Bank Clearings—Bank clearings at New York yesterday were: Exchanges, $390,000,000; balances, $67,000,000.

Silver—London, 35¼d; New York, domestic bar, 99¼c; foreign, 69½c; Mexican dollars, 52⅞c.

The Dollar in Foreign Exchange

A new low record of 3 3-8 hundredths of a cent for marks featured the trading in the foreign exchanges. Depreciation of the German currency is apparently proceeding independently of the factors unsettling other European exchanges, which are reacting to the unfavorable developments in the Near East. Sterling was weak at the start but recovered before the close to finish unchanged. Francs and lire did not fare so well, closing with slight losses. Moderate gains were recorded in Czecho-Slovak and Jugo-Slavian currencies.
