Stock Market Shows Rising Price Trend

About Half of Ground Lost in Two Previous Days Is Recovered; Higher Industrials Are Favorites

More than half the ground lost by stock prices during the recessional movement in progress Wednesday and Thursday was retraced in yesterday's market in which there was a wholehearted return by the professional element to speculation for advance. Buying was again directed principally to the securities of those companies where the possibility of a distribution of surplus in the form of a stock dividend exists or is imagined. The motive is old but apparently still effective as traders find little other material which can be employed with so many variations marketwise.

The high-priced industrial stocks remained the favorites throughout the trading session, not on account of their investment character, but because of their speculative attributes. Impetus from like forces was derived by several of the railroad stocks, notably those of the coal-carrying companies, which soared under the leadership of Reading. The chief group movements of the day occurred in this class and in the copper and oil issues. A drive against Studebaker in midday caused some unsettlement, but this was shortlived and mainly influential with respect to the motor shares. Bond prices disclosed little variation from their recent position, except that underlying rail securities recorded a slight tendency toward recovery. The first Liberty issues continued disturbed by their sudden rise and collapse of Thursday and sold at one time below 101. Money at 4½ per cent throughout the session, cheaper than on previous days of the week, was moderately encouraging from the standpoint of both divisions of security trading.

If the shake-up in the British political situation continues of merely academic interest on the Stock Exchange, this was not true of the other markets. Sterling resumed its advance in the face of moderate offerings of commercial bills, a net gain of ¼ cent, reflecting confidence in the outlook. Francs, which had soared to 7.47½ cents on Thursday apparently on the theory that the change in premiers would mean a policy more in accord with that of France, dropped back to 7.37½ cents yesterday as the improbability of this development was stressed.

The chief reflection of Lloyd George's fall, however, was seen in the break of the German mark to a new low record quotation at 2½ one hundredths of a cent or about 4,000 to the dollar. The Coalition Cabinet in England had been working steadily toward relief for Germany from the full burden of reparations. There may now be no alteration in objective, as this policy was determined on British trade needs, but at least any benefits from it to Germany have been delayed.

The cotton market registered little apprehension over the foreign political situation and, after early unsettlement, closed with advances of 28 to 44 points as trade buying held up. Wheat was unsettled throughout, finishing ⅝ cent lower to ¾ cent higher.

Money and Credit

Call money ruled at 4½ per cent throughout the session on the Stock Exchange yesterday, offerings being on a more liberal scale than upon any previous day of the week. Time funds were unchanged as to rate, with most of the business done on a 5 per cent basis. Money for the shorter terms was to be had for 4¾ per cent, but was in little request.

Call rates:	Yesterday.	Year ago.
On industrial collateral	4½	4½
On mixed collateral	4½	4½
Sixty days	4½@4¾	5½
Ninety days	4½@4¾	5½
Four months	4¾@5	5¾
Four to six months	4¾@5	5¾

Bank Clearings—Bank clearings at New York yesterday were: Exchanges, $875,000,000; balances, $69,000,000.

Silver—London, 33¾d; New York, domestic bar, 99¼c; foreign, 66¾c; Mexican dollars, 51½c.

The Dollar in Foreign Exchange

While sterling was in fairly good demand yesterday and scored a small advance, Continental rates were in supply and resumed the downward movement begun early in the week. German marks fell to another new low level at 2½ hundredths of a cent, while French francs dropped 10 points and lire sagged 3½ points. Swedish crowns were stronger, but Danish and Norwegian crowns sagged.
