Stock Prices Lower Under Fresh Selling

Chief New Element in Reaction Is the Pressure Brought to Bear Upon the Railroad Securities

The view that the late recovery in security prices toward the close of last week represented primarily profit taking by shorts was supported by a further outburst of selling of speculative issues on the New York Stock Exchange. The chief new element in the reaction which started a fortnight ago was the pressure against railroad shares, which up to the present have not suffered commensurately with industrials.

Since the entire setback is primarily a readjustment of internal market conditions, it is natural for professional speculators at this stage of a decline to focus attention on groups of shares which have been relatively immune thus far. Those bent on depressing the market quotations of railroad shares were aided by the publication of more than a score of September railroad reports of earnings and expenses, which for the most part reveal heavy falling off in net income. The declines are not as significant as they seem on their face, because they are in large part attributable to a bookkeeping arrangement whereby some of the costs of the strikes have been charged against the September record.

The general reaction, which effaced much of the recent artificial advance based on the cutting of "melons," which added nothing but additional engraved certificates to the real wealth of shareholders, represents primarily a corrective process. There seemed to be no reason for associating it with the trend of domestic business, which, on the whole, is satisfactory. The uncertainties of the political and economic situation in Europe, however, served to remind that there were limitations to the unqualified bull theory that nothing but golden prosperity lies ahead.

However, the commodity markets, which are ordinarily more sensitive to foreign news, were relatively steady. Both cotton and wheat quotations were either little changed or slightly higher. The European exchanges, with the exception of lire, were again moderately lower.

Money and Credit

Opening and renewing at 5 per cent yesterday the rate on call money slipped off to 4½ per cent shortly after 11 o'clock. The Federal Reserve Bank announced that the government would withdraw to-day $13,000,000 of the funds which it had on deposit with the banks in this district. Time funds were quiet. The demand for accommodations was slight and bidders generally offered 4¾ per cent, whereas banks held for 5 per cent.

Call rates:	Yesterday.	Year ago.
