Stock Prices Drop in More Active Market

Selling Pressure Turned Particularly on Rail Issues :Short Selling Aids in Establishing Trend

Stock prices resumed the decline yesterday, ending a period of irregular vacillation during which varied efforts to stimulate a return to the advance had proved futile. Operations were almost entirely in the hands of professional traders and the break, which resulted in losses ranging up to several points, was based upon internal market considerations rather than upon any development either in the domestic or foreign situation. There was a brief showing of strength at the outset in a handful of issues, but the new crop of extra dividends and dividend prospects proved insufficient material to support a sustained advance and as the market fell back, liquidations, coupled with short selling, established the trend as definitely downward.

Moderate expansion of activity attended the downward sweep of prices which gripped the entire list as selling pressure was turned particularly upon the railroad stocks. In effecting the decline in this division, traders were without new information bearing upon the carriers and made capital largely of reports that legislation unfavorable to the carriers will be put through Congress, as now constituted. That there will be some effort in this direction is admitted, but how seriously it will menace the railroads is undeterminate. No additional reports of October earnings were issued and there was nothing to alter the expectation that these will be favorable.

Bonds were not actively dealt in and were less firm than on Tuesday. This was notably true of railroad issues, which moved in sympathy with stocks. Call money was available at 5 per cent throughout the session and was not a factor.

Another quick change in the foreign exchange market restored the upward tendency after an early extension of the decline. The rise was, in this instance, not so feverish, francs advancing a modest 15/64 hundredths of a cent and sterling ⅞ cent. Lire and marks were steady. Keen interest was expressed by the financial district in Clemenceau's utterances, but foreign currencies were undisturbed by the picture he raised of Germany preparing a new war.

The movement of commodity markets conformed with that in stocks. Cotton experienced early liquidation and thereafter steadied to finish 19 to 28 points net lower in an uninteresting session. Wheat registered more pronounced weakness. Foreign quotations came through lower and crop and other news was interpreted as discouraging. Final prices were from 1 to 1⅞ cents below those of Tuesday.

Money and Credit

Call money did not vary yesterday from the 5 per cent level established at the opening. The demand was of fair proportions and offerings were at all times adequate to take care of requests. Time money held at 5 per cent for all maturities. Not very much was to be had, but inquiry was also light.

Bank Clearings—Bank clearings at New York yesterday were: Exchanges, $661,000,000; balances, $56,000,000.

Silver—London, 32 7-16d; New York, domestic bar, 99¼c; foreign, 64½c; Mexican dollars, 49¾c.

The Dollar in Foreign Exchange

Foreign exchange rates recovered a large part of Tuesday's loss in yesterday's trading, sterling advancing to $4.49¾, within almost a cent of the highest point of the year. French francs rallied nearly fourteen points.
