Price Decline Continues in Stock Market

Rally From Early Downward Movement Is Not of Sufficient Force to Overcome Previous Losses

Attainment by sterling exchange of a quotation of $4.52½, the highest in more than three years, afforded the only relief yesterday from the downward sweep of market valuations at the principal trading centers. Both speculative and investment securities, wheat and cotton sold off appreciably from last week's closing levels, the decline on the Stock Exchange resulting largely from technical conditions and in the commodity pits in only slightly greater degree from news influences.

The depreciation of stock prices resumed where it had left off Saturday at noon, and during the early trading proceeded without important check in both industrial and railroad shares. The marking up of sugar prices caused steadiness in the stocks of the sugar companies. Elsewhere as further weak accounts were reached and liquidated the drop was precipitate and eventually brought its own reaction. The turn was aided by the effective development of speculation for the advance in the oil shares, several of which closed two points or more higher on the session, but the rally was not of force or duration to overcome previous losses. Closing prices, however, were substantially better in many instances than the minimum levels for the session.

A decline in call money to 4 per cent was probably also a factor in curbing liquidation toward the close. In bonds the movement was mainly in sympathy with that in stocks, the more speculative rail issues suffering most. The entire list was uncertain, even Liberty bonds giving trifling ground.

Sterling's rise to a new peak on the recovery from the bottom of $3.18 reached in February, 1920, is a neutral consequence of improving conditions in England and of the letting up of the pressure incidental to Britain's seasonally increased import trade and to the payment of $100,000,000 to the United States Treasury. Sterling held fairly steady throughout the fall, and now that the British export season is at hand bankers expect to see sterling benefit accordingly. The other European exchanges were usually firm to higher, excepting francs, which were down in exchange for sterling, and the Central currencies.

Cotton's weakness, measured in net losses of 35 to 56 points, was ascribable to uncertainty as to the coming government crop report and to unfavorable trade advices from Europe. Wheat's response to larger exports was outbalanced by an increased visible supply and closing prices were ½ cent to 1½ cents net lower.

Money and Credit

Call money was in somewhat freer supply yesterday, although a slackening of the demand also accounted in part for the softening of the rate. The opening and renewal rate was 4¾ per cent. This dropped to 4½ per cent within an hour, and shortly before the close another reduction to 4 per cent occurred. Time money was unchanged as to rate, and business was slight.

Bank Clearings—Bank clearings at New York yesterday were: Exchanges, $382,000,000; balances, $65,000,000.

Silver—London, 32⅝d; New York, domestic bar, 99¼c; foreign, 64¼c; Mexican dollars, 49c.

The Dollar in Foreign Exchange

While demand for bills of exchange on London sent sterling rates to a new high level in more than three years yesterday, offerings of French francs depressed rates on Paris materially. Cable rates on London rallied to $4.52½. Scandinavian and Dutch exchanges ruled firm.
