Middle States Oil Net Up

The report of the Middle States Oil Corporation for the quarter ended September 30, 1922, showed a net income of $1,717,978, subject to depletion, but after expenses and reserve for Federal taxes, etc., as compared with $843,780 in the corresponding period of 1921. The income account showed gross revenues of $2,379,902.

Prices Continue Upward Trend In Stock Trade

Less Aggressiveness, but a Greater Uniformity Marks Forward Movement; Rail Shares Strong

Less aggressiveness but greater uniformity marked the recovery in the stock market yesterday, the average price level moving up almost another point. The second stage of the rebound from the recent bottom discovered most pronounced strength in the railroad shares, notwithstanding the creation of some unsettlement at midday, when professional operators, in their efforts to make short covering less painful, found a weak spot in Erie. The abrupt drop in Erie shares was mostly taken up after a denial of receivership rumors by President Underwood, and the entire list, following the interruption, returned with vigor to the advance.

As on Tuesday the rise of prices was attributable to technical speculative forces, although benefited by the favorable character of the news and, particularly, by further signs of money easement. This was not apparent in the call loan rate, which rose to 5 per cent after noon, due to preparations for Friday's disbursements, but in the commercial paper and acceptance markets. Rates in these divisions have held rather firmly, but the diversion into bills and paper of the volume of funds restored to the banks by liquidation of the stock loan account is beginning to have an influence. Whether the increased interest of local banking institutions in this form of employment for their money will be sustained sufficiently long to cause an appreciable marking down of rates is doubtful, however, since any considerable recovery of stock prices will bring with it expanding requirements for speculative purposes.

The recovery has not yet reached a point, so far as was disclosed yesterday, where operations for the advance are being pressed. Prices are mounting, rather, on the clearing up of short commitments. In bonds, conditions yesterday showed little change, there being no improvement commensurate with that in stocks and irregularity continuing in many groups.

Commercial bill offerings were in enlarged volume yesterday in the foreign exchange market and sterling suffered as a consequence, although holding well above $4.50. East in francs brought a further loss of nine-hundredths of a cent, lire, marks and the other Continentals being fairly firm.

Wheat prices rose ¾ to 1¾ cents net on export business. The cotton market was a dull affair and prices finished 6 points higher to 2 points net lower.

Money and Credit

Call money opened at 4½ per cent again yesterday. The recovery in stock prices brought with it a slightly increased demand for accommodations at the same time that there was some calling of loans incidental to the month-end settlements. As a result, the rate was marked up to 5 per cent, with bidders reluctant to pay this figure.

Bank Clearings—Bank clearings at New York yesterday were: Exchanges, $743,000,000; balances, $85,000,000.

Silver—London, 32 1-16d; New York, domestic bar, 99¼c; foreign, 64¼c; Mexican dollars, 49c.

The Dollar in Foreign Exchange

Foreign exchange rates were generally quiet, but slightly easier in yesterday's trading. Francs fell lower and lire sagged slightly. Cable rates on London fell to $4.51⅜.
