Movement in Stock Prices Is Irregular

Securities of Both Railroad and Industrial Companies Average Slightly Lower at Close of the Session

Fluctuations in security prices yesterday were inconclusive in results and reflected primarily temporary shifts by professional speculators. On the average, both railroad and industrial shares closed a shade lower, after another session of marked irregularity.

The speculative markets moved with little relation to the news, although the conference of premiers in London, which came to a halt, was a subject of discussion in the district. About forty minutes before the market closed it became known that unwillingness of the British to agree to French exertion of force in the Ruhr Valley had brought a deadlock and a postponement of further conferences until January 2. This news tended to check the rise in sterling exchange, which previously during the day had risen to the highest quotations in three and one-half years. The news of the break caused moderate reactions in francs and lire.

In the cotton market there was a tendency to even up accounts in anticipation of the crop report of the Department of Agriculture, which will be made public to-day. The general expectation of a short crop will be further corroborated in the government statement, it is believed around the ring, where predictions as to the crop varied between 9,800,000 and 10,000,000 bales.

Under the stimulus of the strength of the foreign exchanges, and particularly the firmness of Liverpool quotations in the commodity, wheat prices early yesterday climbed to a new high price for the season. Expectation of favorable legislation for the American farmers, particularly in respect to credits, also has been exciting the imagination of wheat traders, who later in the day began to take profits. Final quotations were irregular, varying between a gain of a cent and the loss of a cent a bushel.

Bond prices were steady, with trading in Liberties slightly more active.

Money and Credit

The renewal rate for call money yesterday, 4½ per cent, was the lowest established since November 20. The explanation of the easier conditions than have recently existed lay in the concentration of funds here for the government payments later in the week. The rate was advanced during the afternoon to 4½ per cent. Time funds were unchanged as to rate, with bidders offering 4¾ per cent, and the banks generally holding at 5 per cent.

Bank Clearings.—Bank clearings at New York yesterday were: Exchanges, $395,000,000; balances, $65,000,000.

Silver—London, 31 13-16d; New York, domestic bar, 99⅝c; foreign, 64⅝c; Mexican dollars, 49⅝c.

The Dollar in Foreign Exchange

Sterling's continued rise to new high levels for more than three years overshadowed other exchange dealings in yesterday's steady market. Demand continued for bills on London above $4.59 for cables. Changes in other parts of the list were irregular.
