Stock Prices Rise in More Active Trade

Important Movement Limited to Handful of Speculative Favorites; Sterling's Advance Center of Interest

Happenings in the securities and commodity markets yesterday where the movement of quotations was uniformly upward were again subordinate in interest to the pyrotechnical display of sterling exchange. Strong at the opening, the market valuation of British currency was run up rapidly to $4.69⅛, the highest point recorded since artificial support of a $4.76⅝ quotation was withdrawn in March, 1919. At this stage of the recovery the appearance of a few more bills brought momentary hesitancy, which proved fatal to an extension of the upswing. Sensing the top, holders of bills came into the market to gain the best price possible and the quotation with equal abruptness fell away to $4.63½. The market steadied half a cent before the close, this representing the net gain of the day.

The financial district was permeated with rumors regarding special operations under way between the London and New York markets, most of these reports being of British origin, but nothing regarding them was known in authoritative quarters here. The rise in sterling—yesterday's reaction had all the earmarks of a technical setback—is apparently in belated recognition of the strength of the British position. An analogy to its rapid spurt toward parity may be found in the case of a security, the prices of which suddenly soars as the public senses its real value following a period when speculation and other circumstances have kept it below its warranted level.

Virtually all of the principal European currencies were strong yesterday, an incident being the attainment of parity by guilders. The hiatus in reparations negotiations until January 2, following the adjournment of the Premiers' Conference, has apparently not proved disturbing, hope being bolstered by indications that the differences, although sharply drawn at London, were not so wide as previously. Sterling's course seemingly means that Great Britain has written off the rest of Europe and is in position to stand upon its own.

The stock market was slightly more active than on Tuesday, with prices drifting higher on the average, but with important movements limited to a handful of speculative favorites. New York Central declined on the dividend action, but the railroad stocks generally did not suffer from this event. Call money was available at 4 per cent during most of the session, dropping momentarily to 3¾ per cent. Preparations for to-morrow.'s payments were augmented by the announcement that the government would withdraw $67,000,000 from the banks in this district. Bonds were firm.

Cotton evidenced the force of the upward trend now dominating the market when profit-taking sales were readily absorbed and the close was 16 to 31 points up. Wheat was improved in tone and a late rally of considerable proportions left prices 1⅝ to 2⅜ cents net higher.

Money and Credit

Call money, opening and renewing at 4 per cent yesterday, dipped briefly to 3¾ per cent shortly after noon, only to be marked up again to 4 per cent in the last hour. Offerings were on a liberal scale. The market for time money was dull. The bid rate of 4¾ per cent failed to attract much money, except for the shortest periods, and most business was done on the 5 per cent basis for which the banks were holding.

Bank Clearings—Bank clearings at New York yesterday were: Exchanges, $668,000,000; balances, $64,000,000.

Silver—London, 31 15-16d; New York, domestic bar, 99⅝c; foreign, 64c; Mexican dollars, 49⅞c.

The Dollar in Foreign Exchange

Other European exchanges participated in the remarkable advance of sterling in yesterday's active trading. Although the rise in cable rates on London of more than six cents to a new high of $4.69¼, within a few cents of the "pegged" rate prevailing during the war, was the feature of the day, guilders also attracted attention with a rise virtually to par. French francs rallied and other Continentals were strong. Sterling and some of the others reacted after the London market closed, however.
