# The Sun.

WEDNESDAY, DECEMBER 30, 1874.

**Average Daily Circulation Over 120,000,**

Or nearly equal to that of all the other morning newspapers printed in the English language in this city.

Some idea of the extent of this immense issue may be formed from the fact that it is sold in every city, town and village in every State and Territory in the Union, and in every county of New-York, every county in every State in the Union, every dwelling house in New-York, Brooklyn, Jersey City, Hoboken, and Jersey City, with some thousands to spare. Although THE SUN is not widely distributed in the city and suburbs, it is read by more people than any other newspaper in the city and suburbs. It is read in every State of the Union, in every town in the Union, and in every dwelling house in the Union where any newspaper is read at all. In fact, THE SUN is the newspaper for all who want a fearless and independent newspaper, which never compromises, never equivocates, never lies, never sneaks, never trims, never prevaricates, never dodges, never hedges, but is always, always, always, on the side of the people, and against the rascals who prey upon the people. In politics, THE SUN is a Democratic journal, but it is not the Democratic journal because any other journal is not Democratic, but because it is the Democratic journal because it believes the principles of the Democratic party are the principles which will secure the greatest good to the greatest number of people. As an advertising medium THE SUN is unsurpassed by any other newspaper in the United States, because it is read by those who want to buy and who have money to spend, while its circulation among the class of people who have money to invest is larger than that of any other newspaper in the United States. In short, to have a card in THE SUN is equivalent to having a card in the best family circle in the country, because THE SUN is welcomed and read in the best families in the country
