who have, it is understood, practically exhausted their resources in making restitution. The securities, if not the affairs, of the Reading Company commanded even greater attention than those of the Cotton Oil Trust. It has been evident for several days that speculative holders of Reading stock and preference bonds have been taking them to the block. The suppression of the figures of the operations of the Reading outfit has ceased to conceal the probability that the company will not distribute among its security holders for the year ending with the current month any more than it is obliged to—that is, the interest upon its general mortgage 4 ₩ cent. bonds and the underlying liens. Fears are now expressed in the anthracite coal trade that the necessities of the Reading Company during the next few months will prevent any actual advance in the price of their product. To-day for the first time since the reorganization of the company its stock sold under 40. It closed at an exceptional net decline of 1¼ ₩ cent.

The rest of the list was strong throughout, and apparently, but for the weakness in Reading, would have been more aggressively strong than it was. London was a conspicuous buyer of its favorite shares, especially of Louisville and Nashville, which touched the highest price yet recorded for it. Other noteworthy dealings and net advances were in St. Paul common, Missouri Pacific, and Union Pacific. Of the specialties Chicago Gas Trusts and Denver and Fort Worth certificates were conspicuous at materially higher figures. An easier money market and lower rates for sterling exchange helped the general situation. The advance in rates ordered on Monday by the Granger Trunk lines was also an influence that should not be overlooked.

An important development to-day, of which the street obtained very little knowledge, was the progress made toward harmonizing the various interests in the Missouri, Kansas and Texas Railroad Company. The committees of security holders in Amsterdam and London have agreed within the last two days upon a plan of reorganization that was in the main suggested by the Adams Committee of general mortgage 5 and 6 ₩ cent. bonds of this city. That committee has in turn accepted the amendments or suggestions of the foreign committees, and has succeeded in securing for the plan the support of the Union Trust Company Committee, representing the first consolidated 7s. This brings a large proportion of the bondholding interest together, and allied with them are the foreign holders of a large amount of the stock. The issue is thus narrowed down to one between the bondholders represented by the five or six committees referred to, and the stockholders' interest which is understood to be the predominant one back of the Olcott Committee. As the general tendency is toward harmony of action negotiations have already been opened between the two interests as outlined above. Pending their conclusion no new plan of reorganization will be put out by the united bondholding interest. It it understood, however, that so far as new capital or an assessment upon the stock is concerned the plan formulated by the bondholders will be strongly underwritten. As previously noted in discussions on this subject no account is taken of the efforts of Mr. Hollins's Trust Company to sell its uncompleted bit of railroad to the M. K. and T. Company. To be sure, that little interest has issued a plan of reorganization, but it is seriously incomplete in that it fails to state the real purpose of those who sign it.

There is naturally a good deal of curosity as to Mr. Gould's attitude in this matter. The general suspicion that he is liable to regain control of the property through a reorganization effected or defeated by the Adams Committee appears in the light of recent developments as well as by evidence furnished by the committee to be entirely unwarranted. Mr. Gould has expressed himself to the Chairman of the company's Reorganization Committee as entertaining a favorable opinion of their plan. It is understood that he will cooperate in any movement in which all interests will unite, and which also bids fair to attain success. In his friends Mr. Gould disclaims any intention of a desire to add to his railroad interests in the Southwest, but is pronounced in his desires to see his competitors restored to solvency.

New York Markets.

WEDNESDAY, Nov. 6.—FLOUR AND MEAL.—There was a good local trade, and the better grades were readily brought up per cwt, but the lower grades ruled dull.

CORNMEAL.—Futures opened quite buoyant on a further improvement in the Liverpool market, which was followed by more active buying, but the advance in price was lost by the close, and the market ruled dull. The cash movement set in, with buyers quite indifferent, and offers were as low as last quotations under the best prices of the morning—when March brought 10.33c. and May 10.46c. The close was weak and unsettled, the chief support being the absence of any pressure to sell. Cotton on the spot was steady: middling uplands, 10¼c.; Gulfs, 10¼c. The following are the closing prices bid for futures, with the sales aggregating 118,600 bales.

November	10.01c.	February	10.18c.

January	10.06c.	April	10.32c.
