THURSDAY, June 26.

The advance in the Bank of England rate of discount to-day from 3 to 4 ₱ cent, was not unexpected to those who have watched the course of money in London, and are mindful of the reluctance of all European financial centres to part with any of their resources. The event did not have much effect upon the London market for American securities. It was a little lower, but not more inactive than it has been for some time past, nor was the speculative selling for foreign account in this market of sufficient magnitude to be accounted a factor in determining the course of prices. The labor troubles of the railroads give the speculative community some uneasiness, but the larger holders of stocks are apparently unmoved by them. Beyond question two recent events are decidedly favorable to those holders, namely, the action of the House yesterday in burying the movement to establish free coinage of silver, and the decision of the Court of Appeals in the Sugar Refineries case. The last not only removes an element of uncertainty from the market, but will put a stop to the dilution of the mass of securities listed upon the Stock Exchange by the injection of a lot of certificates of slovenly organized combines, which are so vulnerable from a legal point of view that the fluctuations in them caused by constant attacks, tend to upset the entire market and destroy confidence in securities generally. Incidentally, the progress that is making toward a better condition of railroad business, particularly in the Southwest, sustains the large holders of stocks in their position.

These circumstances were offset to-day, temporarily without doubt, by dulness that encouraged attacks, and, late in the day, by the engagement of $500,000 specie for shipment to the Continent on Saturday. It is understood that this shipment is to be consigned to Paris. Money on call was more active, a condition that lenders were not slow to take advantage of. Present indications point to an unfavorable showing by the banks on Saturday, for, as noted in this column yesterday, the Sub-Treasury at this centre is absorbing money, and certain of the domestic exchanges are also operating against us. The only noteworthy transactions were in the same stocks as in evidence yesterday, namely, Reading, Atchison, and St. Paul common. The last named lost half of yesterday's gain. Atchison is the whole or its importance, and St. Paul declines twice as much as it advanced yesterday. A number of other stocks that were much less active suffered declines of 1 to 1½ ₱ cent, the greatest being in Chicago Gas, which fell early in the day on reports of fresh trouble regarding the payment of the dividend. Rumors of the largest professional short interest in the market for some time past, coupled with the fact that the operations of large interests in the market quite as much as they do the pessimistic sentiments of professional dealers, Sugar Refinery stock has comparatively quiet and irregular. The market for its shares is largely drifting toward the condition in which the securities of concerns undergoing reorganization usually fall. The closing was heavy at about the lowest prices.

Final sales compare with those of yesterday as follows:

New York Markets.

THURSDAY, June 26.—FLOUR AND MEAL—The demand was again good, sales aggregating about 15,000 bbls. and sacks, and sellers readily obtain full prices.

CORN—Futures developed new features to-day, which were of more importance than the changes in values, for whereas in the previous two days this crop showed a depression, while the best crop was firm or stronger, the market to-day closed slightly dearer for this crop while the next was slightly cheaper, or at least weaker. It seems apparent that the holders of cotton now think they can make a stand, and buyers, too, are apparently of the opinion that not much further decline can be expected. Advices from Liverpool were more firm, and buyers there and at Liverpool. New York now controls nearly all that is left in this country, and Lancashire has been buying sparingly, so long that her spinners have now small stocks. The next room, on the contrary, was somewhat depressed. The heavy rains in the Mississippi valley, about Vicksburg, which have caused uneasiness, and were undoubtedly objectionable, have ceased, at least for the present, and in the other parts of the south the weather appears to be all that can be desired. The market opened higher on an unexpected advance in Liverpool, presently declined, falling below the closing figures of yesterday, partially recovered, and closed steady. Cotton on the spot was 1.16c. dearer, with a fair business for home consumption, middling uplands, 11.15-16c. do. Gulfs, 11¾c. The following are details of transactions in futures:

Months.	Closing prices.	Highest.	Lowest.	Sales.
June	11.74@11.76	11.77	11.72	1,200
July	11.73@	11.75	11.66	4,700
