FRIDAY, Jan. 30.

To-day's stock market was dull and irregular. The death of Secretary Windom was not a perceptible factor in the speculation, although at the opening silver bullion certificates declined sharply in spite of the well-known opposition of the late Secretary to free coinage. The feature of the early dealings was heavy sales of Northern Pacific preferred, which is understood to have been the closing out of a line of speculative holdings acquired two months or so ago under 60. In the afternoon both the preferred and common were depressed by rumors of an issue of $4,000,000 of bonds for improvements. The rumor is plausible for the reasons that that company has the bonds and needs to make the improvements.

The Vanderbilt stocks were a feature. Lake Shore being more extensively dealt in than for some time at a net advance of 1¼ ⅌ cent. The so-called Gould stocks were fairly active, and prices for them were well maintained, particularly for Missouri Pacific. Union Pacific worked fractionally higher, and so did Chicago Gas and a number of the specialties, in spite of a disposition on the part of the room traders to sell stocks. That disposition found expression in a renewal of attacks on C. B. and Quincy, for which there was an active borrowing demand in the loan department. The stock commanded a small premium for use. St. Paul common was not materially affected by the showing of its earnings for December, and Lackawanna did not respond to the excellent showing for the last calendar year. The reason for the incongruous movements of prices is that the professional element persists in its efforts to establish lower prices while a better demand for stocks is developing. The closing was featureless.

New York Markets.

FRIDAY, Jan. 30.—FLOUR AND MEAL—The market was quieter, and at the close there was less disposition to demand a higher range of prices.

COTTON—Futures opened at 1 point decline, closing quiet and steady at 8 to 9 points advance from yesterday's closing prices. The market was something of a puzzle to-day. The opening was dull and dragging enough. Then came figures from Ellison showing that the weekly consumption of cotton in Europe is greater than last year by 10,000 bales of 400 lbs. each, causing some buying to cover. But when it was seen that sellers were not willing to sell New Orleans much stock in the Ellison figures the market became dull, and estimates of a relatively large movement of the crop for the week caused the decline of a few points. In the last half hour, however, there were fresh buying orders on the market, with nobody showing much anxiety to sell. A rally was the consequence, and the close was at about the best figures of the day, but apparently with the course of prices depending wholly upon the whim of the moment. Spot cotton was dull; middling uplands, 9 5-16c.; do. Gulfs, 9¾c. The following are the details of the transactions in futures:
