THURSDAY, June 25.

The stock market continues lifeless. The only people who attempt to make anything out of it, and are, therefore, responsible for the few transactions that are recorded, are those who are compelled by circumstances, or by fascination, to linger in the and about the Stock Exchange. This class of dealers was influenced to-day by the engagement of $750,000 of gold for shipment on Saturday and indications that $2,000,000 more will be engaged to-morrow. The sterling exchange market is very strong, owing to a dearth of commercial and bankers' bills rather than to any unusual demand from remitters. The heaviest remittances at present are to meet interest payments due July 1 on American railway securities held abroad.

The street was furnished with a fresh installment of crop reports, all of which were most favorable. Many of them came from railway officials, and told of the extensive preparations that are being made by the railroads to handle the enormous traffic which is in sight. The market, however, gave no signs of responding to the flattering outlook for railway business. The dealings were closely confined to St. Paul, Atchison, and Chicago Gas. The last named closed fractionally higher, but the others, in common with the remainder of the list, closed a little lower than yesterday. The finish was heavy.

Final sales compare with those of yesterday as follows:

The Troubles of the Firm of C. De Murietta & Co. at Last Settled.

LONDON, June 25.—After many delays and false reports of a settlement, the negotiations connected with the firm of C. De Murietta & Co. were brought to a successful termination today. Several matters had to be adjusted, among them being a loan of about £300,000 made with Baron Hirsch some time ago, other loans on Argentine collaterals falling due on June 30, liabilities to contractors, and also an important claim in dispute with one of the firm's clients. All these matters have been provided for through the action of a prominent London capitalist, who has advanced the necessary funds on extremely liberal terms. The advance has been in the form of a loan until the end of next year and the collaterals held in the loans taken up are given as security for the money. As the capital of the Murietta Company is nearly £4,000,000, of which but £1,000,000 is in debentures, there should be ample security for all debts now that the pressing claims have been fully satisfied.

The fact that a definite settlement had been reached was not generally known on the Stock Exchange to-day, and business was dull and lifeless. The bank return showed a loss of £245,000 in the reserve, in spite of a gain of £201,000 through receipts from abroad, but otherwise the weekly changes were unimportant. The Indian exchanges were weak and silver ⅛ lower, but, on the other hand, special allotments of over 13 lacs were made at 1 shilling 5 9-32 pence to 5¾.

Crop Report.

ST. PAUL, June 25.—A despatch from Armour, S. D., says crops in Charles, Mix, and Douglas counties have never looked better within the last eight years. Small grain is expected to average fifteen to twenty bushels per acre. Corn in the same localities has been damaged by cut worms, but there will be a big crop of flax and rye.

Roberts county has had a fine rain, and all crops are coming along nicely. At Britton wheat, oats, and flax are doing finely. Throughout Minnesota the weather is perfect, a bright hot sun succeeding the warm showers of the past three days.

Such are the reports this evening from Chisago, Rennville, Blue Earth, Leseuer, Brown, Watcowan, Fillmore, and Dakota counties. Wheat has headed out splendidly, and another three weeks will see the harvesting machines at work in some of the early sown fields. In North Dakota the weather is warm and forcing, and farmers look for harvest two weeks earlier than usual.

New York Markets.

THURSDAY, June 25.—FLOUR AND MEAL—The market was rather more active at about steady prices, though buyers were not inclined to advance olds, still they were not so indifferent to the concessions which sellers were inclined to make.

CORN—Futures opened without much change and with an uncertain appearance, but soon took a stronger turn, then made a pretty smart advance, closing very steady at 7 to 1½ points advance from yesterday's closing prices. Liverpool reported a decline in futures, but it was partially recovered, and the spot market there was reported strong and active. This was sufficient to give a stronger turn to values with us, but it was not until the receipt of drought reports from Texas, where, it was said, the intense heat is bringing up vegetation, that any decided improvement took place. The ice prices of the day were the best, with a very strong closing. There were light rains reported in Georgia, but generally the weather at the South was warm and dry. A large increase in the spot business at Memphis was an element of strength in the final deal. Spot cotton was steady; middling uplands 8¾c.; do Gulfs, 8 13-16c. The following are the details of the transactions in futures, with sales of 64,200 bales:
