MONDAY, Sept. 12.

Under familiar leadership the Stock Exchange contingent became very pessimistic to-day. The engagement of $600,000 gold for export, the possibility that the Reading Company may have trouble with its employees, the Government crop report, and talk of a falling off in general business on account of the cholera scare were all used against the market, which was heavy throughout. Efforts to depress prices were unremitting, and were directed particularly against Reading, St. Paul, Western Union, Chicago, Burlington and Quincy, and, Rock Island. The only stocks, approximately as active as those mentioned, that did not yield as readily as they were Sugar Refining and Atchison. They closed ½ of 1 ₱ cent. lower than on Saturday, while in the others the declines ranged from 1 to 1½ ₱ cent.

The tendency of the market naturally alarmed timid speculative holders to an extent that brought out quite a little long stock. Chicago appeared to favor the decline, and Western operators are beginning to discuss the chances of damage to the corn crop by frost. The real cause for the course of prices to-day is one that has existed for some time, namely, the narrowness of the speculation and the absence of legitimate business. It is understood that gold to the amount of $1,000,000 is likely to be shipped abroad at the end of the week. The continuation of the outward movement of specie, together with higher rates for money at this centre, will naturally encourage bear operators to sell stocks until the magnitude of the short interest ther make reacts upon them. The closing was heavy at about the lowest prices.

Final sales compare with those of Saturday as follows:

The Wabash Railroad Company reports for the year ending June 30:

	1892.	1891.	Change.
Gross earn'gs	$14,389,331	$13,028,287	Inc. $1,361,043
Operating ex.	10,832,527	9,565,221	Inc. 1,267,303
Net o'rn'gs	$3,556,804	$3,463,064	Inc. $93,739

After deducting taxes and rentals and adding income from other sources the net income was $2,075,901. Interest on mortgage bonds was $2,074,125, and $210,030 was paid on the preferred debenture bonds, leaving a net surplus of $91,475. Operating expenses were 75.28 ₱ cent. of gross earnings, against 76.42 the previous year. Gross earnings per mile were $7,507, an increase of $731; operating expenses were $5,651 per mile, an increase of $677, and net earnings per mile $1,855, an increase of $54. The average mileage operated was 1,916. The average rate per ton per mile was .705 cents, against .733 cents the previous year. The rate per passenger per mile was 2.057 cents, against 2.178 cents the year before. In report President Ashley says:

"The so-called 'railway problem' in the United States is no nearer solution than at the close of our last fiscal year. The rates for the transportation of freight are not only unreasonably low, but the competition for business even at these very cheap rates is quite as active as ever. The only encouraging feature as to rates is that they have not been much reduced during the year, except so far as a large increase in the volume of lower class freight, which embraces grain, packing house products and coal, has lowered the average. It may be fairly claimed also that rates have been generally very well maintained during the year. This is equivalent to an assertion that competition has been regulated sufficiently to prevent the spread of insanity in business methods, but it is little to some extent attributable to the wholesome influence of the Western Traffic Association, it is also due largely to the important increase in the volume of business incidental to abnormally abundant crops."

The total exports for the eight months ending with July were $60,024,000, against $47,320,000 during the corresponding period last year. The exportation of cotton for August amounted in value to $2,543,000, against $2,464,000 last year.

The "ten days" statement issued from the Treasury Department this afternoon shows the total net gold in the Treasury to be $114,218,971, an increase of about $500,000 since the first of the month. The receipts at New York from customs in that time were $3,077,808, showing a slight falling off from the corresponding period of last year and a decrease of more than $1,000,000 as compared with the first ten days of August, 1892. This large decrease of 25 ₱ cent. is evidently due to the cholera, all the steamers now lying at Quarantine being heavily laden with goods.

Western at 7.70@7.77½c., closing steady at 7.67c. for September, 7.70c. for October and 7.75c. for January. Dressed hogs 6¾c., and pigs, 7½c. Other provisions were quiet and generally weak. Groceries—Coffee futures at one time were slightly lower, but were recovered later, and the close was firmer, with some points 5 points higher. Sales of 22,250 bags, Havre and Hamburg were higher and Rio Exchange advanced. Brazilian markets were lower. The aggregate deliveries in this country last week were 65,028 bags, or 15,503 bags more than in the same week last year. These were the closing quotations for futures: September, 12.65@12.70c.; October, 12.95@13c.; November, 13@13.05c.; December, 13.05@13.10c.; January, 13.45@13.50; February, March, April and May, 13.40@13.45c. Milds were firm, with sales of 500 bags of Cucuta at 19½c. Sugars quiet, with 3c. bid for 89° test. The sales were 700 bags. Refined was in fair demand, firm, and unchanged.

Petroleum—In spite of the bullish crop report refined 10 to 15 points. Many operators here thought that the statements of the Agricultural Bureau were overdrawn. They do not believe that the crop is nearly so favorable a condition as the reports to the Bureau state. They say that they were fooled a year ago by adverse accounts from various sources concerning the condition of the American cotton crop, and that they do not propose to be caught napping again. The idea is "if you catch me once, that is your fault; but if you catch me twice, my fault." Meanwhile, besides the disinclination to accept the Bureau report very seriously, renewed reports in regard to cholera, more direct cable advices showing a further decline in investments among English spinners and some decline in Wall street exerted an influence prejudicial to the interests of the bulls, and local traders were disposed to sell. There were also some Southern and European selling. New futures declined about 10 points and Savannah 1.10c., while Galveston advanced 1 16c. Refined quotations were quoted nominally unchanged. The spot market here was quiet and unchanged, with holding uplands 7.55c. and the sales 151 bales, for running. After Chelsea here prices were 10@12½c. lower than the last official prices. The receipts at the ports were 18,218 bales, against 11,255 bales day last week and 28,411 last year. Stocks here were stronger. The spot sales in Liverpool were 10,000 bales, but that market closed weak. New York closed barely steady, with sales of 64,700 bales, as follows:

	Opening.	Closing.	Inactive.	Sales.
September	6.95@6.97	6.96	6.96	100
