OUT WITH THE WALL PAPER TRUST.

Campbell Won't Sell to It, or It Won't Buy, and the Fight Will Be Kept Up.

William Campbell, who owns the controlling interest in the firm of William Campbell & Co., has determined anew to fight the National Wall Paper Company, which is the formal name of the Wall Paper Trust. Campbell offered to sell his factories to the trust for $400,000, payable in four years. Negotiations were broken off at the last moment. Campbell had in his employ two young men named J. Jackson and W. A. Huppuch. It appears that, being interested in their welfare, he had Manager Nugent embody in the contract, which was to be signed by President Burn of the National Wall Paper Company and by himself, a guarantee that the two men would be employed by the National Wall Paper Company for two years, one as a collector, the other as superintendent of outside salesmen.

When the time of signing the agreement was at hand Campbell was surprised to learn that Jackson and Huppuch laid claims to partnership and to being the possessors of trade secrets. President Burn refused to sign the papers unless Campbell would guarantee that Jackson and Huppuch would not go into business for themselves, and, further, would join the trust. Campbell's reply was that he had no control over the men and their claims were absurd, as neither of the men was ever in the factory or knew anything about wall-paper making. Negotiations came to an end.

Manager Nugent said yesterday morning that the two young men considered themselves of greater importance than circumstances warranted. Both have left the employ of Campbell & Co., and one man now fills both their places. Campbell will rebuild the factory at the corner of Forty-second street and Tenth avenue, which was destroyed by fire, and will fight the trust. He emphatically asserts that he will have no further transactions with President Burn or the National Wall Paper Company.

President Burn said yesterday that the failure of the negotiations was due to a contention about partnership, and that the National Wall Paper Company is not buying lawsuits.

Judgments Against the Elevated Roads.

Judge Truax granted judgments yesterday against the Manhattan and Metropolitan elevated railroads in actions brought by John Watts De Peyster and Abraham Stern, as executor of the will of Bernhart Stern, to recover damages to property and loss of rentals by the operation of the railroads. For damages to Mr. De Peyster's property the awards are as follows: 737 Sixth avenue, $10,000 damages for the easements taken and $4,000 for loss of rentals; 739-41-43-45 Sixth avenue, each $5,000 for easements and $2,500 for rentals. To the Stern estate, for damages to 1,670 Second avenue, judgment was given for $1,000 for the easements and $75 a year for six years for loss of rentals.

Commissioners Charles W. Gould, Robert Maclay, and J. S. Barclay have made a report to the Supreme Court that $5,750 should be paid by the Manhattan Railway Company for the easements in front of 287 Bowery, and $5,475 for those taken from in front of 272 Bowery.

Business Troubles.

The Sheriff has received an attachment for $5,218 against Wm. A. Newell of Chicago in favor of Burton C. Cook, one of George H. Ripley which Mr. Newell endorsed and guaranteed. The Sheriff served the attachment on a life insurance company to attach Mr. Newell's policy.

The Sheriff has received four executions against Joseph P. Carney, dealer in gas fixtures, at 127 West 125th street, aggregating $1,377, the largest being in favor of Henry Maillard, for $508.

John W. Brink, umbrella manufacturer at 292 Church street, who made an assignment on June 18, and his property reassigned to him the day, having effected a settlement with his creditors at 35 per cent.

The Sheriff levied yesterday on the liquor saloon at 76 Avenue C under an execution for $602 against Joseph and Annie Flesch in favor of David Steinberg.

Largest Live Stock Receipts Ever Known in Chicago.

CHICAGO, July 30.—The live stock receipts today are the largest ever known: Hogs, 60,000; cattle, 25,000; sheep, 12,000, or a total of 97,000 head. The largest hog receipts ever known were 64,000, but there was never before 97,000 head of live stock recorded in one day. This extraordinary movement is attributed to the general failure of the corn crop. Farmers who had bought stock to be fed and fattened with corn this winter, finding that they would have no corn to feed the animals, are hurrying them forward in such condition as grass feeding has left them.

Fire Engine 31 in Collision.

While Engine 31 was racing through Walker street, in answer to an alarm from Canal and Baxter streets yesterday afternoon, it collided with an ice wagon that was going up Centre street. The driver of the ice wagon, Michael Kiernan of 303 Worth street, did not stop to let the engine pass, and one of the poles caught in his hind wheel, breaking the pole and throwing all three of the engine horses to the ground. Kiernan was arrested. In the Tombs Police Court he promised to pay for the damage he had caused, and was allowed to go.

MONDAY, July 30.

Reported damage to the corn crop overshadowed even the tariff situation to-day. It stimulated a certain amount of legitimate speculation, and the indications are that it also induced moderate liquidation in the so-called Granger shares. The chances are that the actual amount of damage to the growing crops will not be known for some time to come, for the greater part of the advices regarding it come from interested sources or through channels that are not altogether trustworthy, namely, speculators in cereals at Chicago and their agents in the principal wheat and corn-growing States. This phase of the situation deserves consideration in view of the existence of a powerful and aggressive pool in corn at Chicago. A little time will be required to determine the effect of current alarming reports regarding the crops upon actual holders of the stocks of the Western trunk line railroads. At the moment the bulk of the selling is unquestionably for short account. This was reflected not only in the extent but also in the character of the demand for the Granger shares in the loan department of the Exchange this afternoon. Two of those stocks, C., B. and Quincy and Rock Island, commanded a slight premium for use to-morrow.

The most extensive trading in the railway list was in the first named, but the second sustained the greatest net loss. St. Paul came in between them in respect to activity, yet it closed only fractionally lower than on Saturday. As usual, Sugar Refining supplied a larger proportion of the transactions than any other stock and it also attained the distinction to-day of an exceptional net advance. The manipulators of it apparently based their operations upon advices from Washington that the Senate will make no material concessions to the House, and none whatever upon its sugar schedule. A feature of the market was a further decline in Consolidated Gas to 111, from which price there was a recovery to 114¾ at the close; but even that figure was 5¼ points below the final price on Saturday. Brokers who watched the stock were confident that a considerable part of the selling was of actual holdings. The movement was, however, speculative to an extent and was based upon what seem to be exaggerated estimates of the effect of the competition of the East River Gas Company's enterprise. The remainder of the list was, as a rule, neglected, and the only net fluctuations of note not already referred to were a decline of 1¼ ⅌ cent. in Manhattan Railway and advances of 1⅝ and 1 ⅌ cent. respectively, in Wheeling and Lake Erie preferred and United States Leather preferred on light transactions. Western Union received some attention that left it fractionally higher than on Saturday.

The week opens with every indication of another heavy outflow of gold to Europe. The inquiry for sterling to-day, which came from bankers as well as from the trade, was more active than usual of late on Monday, and bills of all kinds seemed to be scarcer than ever. In consequence the quotations made were the highest yet recorded, and rates were fairly up to the gold-exporting point. Commercial bills now cut a very small figure in the offerings, consequently bankers will not draw except at figures that permit of covering with gold at a profit. There is a fast German steamer on Thursday, and another German boat as well as a French steamer on Saturday. The great bulk of the exports will go out on the days mentioned, and most of the engagements may possibly be delayed until Saturday. Estimates of the probable outflow were indulged in freely to-day, but it should be borne in mind that circumstances may change the situation between now and Saturday, hence it is not safe to place too much confidence in figures mentioned at this early day. Gold to the amount of $500,000 was withdrawn from the Sub-Treasury to-day for shipment to-morrow.

Commercial Compend.

MONDAY, July 30.—COTTON—Declined 8 to 10 points and closed barely steady. Sales, 101,400 bales. Liverpool declined 3 to 3½ points, and closed steady at the decline; spot sales 10,000 bales, at prices in buyers' favor, though showing no quick change. Manchester yarns and cloths were dull. Port receipts were 330 bales, against 1,120 bales this day last week and 1,320 last year. Memphis and New Orleans declined 9c. on the spot, and Augusta was rather weaker. Galveston, Savannah, and Charleston were easy. Here on the spot prices were ⅛16c. lower; sales 500 for export and 1,000 for spinning. Middling uplands 8 15-16c. The rainfall for forty-eight hours ending 8 o'clock last night was: at Atlanta, Augusta, and Memphis stations, .14 at Montgomery and New Orleans stations, .08 at Charleston, .06 at Galveston, .19 at Little Rock, .11 at Mobile, .30 at Savannah, .10 at Vicksburg, and a trace at Wilmington. For the twenty-four hours ending 8 A. M. to-day the rainfall included 2.36 inches at Atlanta, .34 of an inch at Corpus Christi, Tex., .34 at Little Rock, Ark., and .14 at Charlotte, N. C. These rainfalls being at the single points named. Houston, July 30.—Cotton men say that the Texas crop will average not quite two bales per acre, and that the Texas commercial crop, which includes Indian Territory, will be further by 2,500,000 bales.

TO-DAY'S FUTURES.—With lower prices in Liverpool, New Orleans, and Memphis, with dullness in Manchester, and easier spot quotations here, with reports of another tariff disagreement at Washington, and local, Southern, and Continental selling, and finally with generally favorable crop reports, the tone in the cotton speculation here was depressed and prices gave way easily. The trading in futures was as follows:

TO-DAY'S FEATURES.—Wheat was higher, mainly owing to an advance in corn. Liverpool was a little stronger, but the Continental markets were lower, and most of the news received was bearish on wheat. The quantity on passage to Europe increased 88,000 bush.; the visible supply in this country increased, contrary to expectation, 3,372,000 bush.; the export trade was dull; three cars of new wheat arrived at Minneapolis, which is unusually early. The receipts of old wheat were large. Corn advanced 3c. here and in Chicago, with excited trading. The rise was due to drought over large sections of the corn belt, a sharp advance in Liverpool, smallness of supplies here and in Chicago, a good demand for cash corn, scattered rain showers in parts of the corn belt, but in Iowa and Nebraska, where moisture is most needed, drought still prevails. The visible supply increased 395,000 bush. Rye in quantity on passage to Europe decreased 504,000 bush. The spot trading was light in this market, oats were strong and higher in sympathy with corn. Spot prices were steady at the advance in spite of larger offerings. The spot business was larger. The New York stock decreased 70,000 bush., leaving 155,200 bush., and the visible supply in this country fell off 125,000 bush. Chicago, July 30.—Receipts of all kinds of live stock were aggregate the largest on record. Hogs, 60,000; cattle, 25,000; sheep, 12,000, all due to drought. Kansas City gets 9,000 hogs, Omaha 11,000. They usually get about 3,000 each on Monday. Kansas City wires: Watch these hog receipts. Iowa and Nebraska have no wheat for their hogs and have to ship. Kansas is feeding its wheat to hogs and can keep them. Chicago, July 30.—Railroad officials despondent over corn prospects in Iowa and Nebraska. They still hope for rain, however. Fifty-two cents bid for corn in Omaha to-day. This is more than wheat is selling for here. The weather continues dry and warm in Nebraska, Iowa, and the Northwest. No amount of rain can save Iowa corn. It will be the poorest yield in the history of the State. Driver says corn situation in Iowa and Nebraska serious. On similar conditions in 1881 corn sold at 70c.

OATMEAL—Coffee advanced 10 to 25 points. Trading small. Most of the news is bearish, but the bulls fight a decline. The Bellucia arrived here to-day with 38,640 bags, mostly Rio. The American visible supply of Brazil is 357,145 bags, against 402,860 a year ago. Havre advanced ¼ franc. It was a half holiday there. Hamburg was in some cases 1 pfening higher. Santos received 14,000 bags and Rio 6,000. Rio was 50 reis lower; Santos fell 100 reis. Rio exchange unchanged at 9 5-16. American warehouse deliveries for the week 79,328 bags, against 40,738 last week. Receipts to-day they were 10,866 bags. It is expected that the receipts at Rio and Santos for July will break the record and approximate 475,000 bags. The trading in futures was as follows:
