THURSDAY, Nov. 22.

The Granger stocks, Sugar Refining, and Chicago Gas were the only stocks that were at all active to-day. The transactions in Sugar Refining were nearly as large as the aggregate in the other five stocks named. After a slight improvement at the opening, the price began to decline, and, under a steady pressure to sell, the stock closed nearly 3 ⅌ cent. lower than yesterday and at about the lowest price recorded. The only explanation of this movement was a report that the President in his message to Congress will recommend the abolition of the protective duty upon refined sugars. The chances are that the fluctuations in Sugar Refining were due entirely to professional manipulation, having for its object the transfer of the funds of small speculators to the bank accounts of larger ones.

The bearish feeling upon the Granger stocks, which was intensified yesterday by the reduction in the C., B. and Quincy dividend, and by the deception practised upon the street before the dividend was declared, and for which there is a strong suspicion that an official or director of the company was responsible, resulted in a reaction to-day in which every member of the group, except Northwestern, participated. It is doubtful, however, whether the fractional advances recorded by a majority of the list would have taken place had it not been announced that a number of trust companies, private bankers with foreign connections, and a few banks had agreed to make uniform bids for the entire amount of the new Government loan and to pay for the bonds awarded them with gold obtained from other sources than the Treasury.

A decline of 5⅛ points in Pullman's Palace Car was accompanied by reports that Congress will, on account of last summer's labor troubles, attack that corporation in various ways; that is, the cranks in Congress will endeavor to endear themselves to their constituents by introducing measures of a socialistic or anarchistic character. The National Cordage stocks, Western Union, and Chicago Gas were comparatively heavy and closed fractionally lower than yesterday, though at a recovery from the lowest prices recorded for them. Southern Railway preferred was exceptionally strong, and so was Jersey Central, in spite of the publication locally of a good deal of matter, none of it new, relative to the anthracite coal. The closing was strong.

Final sales compare with those of yesterday as follows:

Commercial Compend.

THURSDAY, Nov. 22.—COTTON—Declined 6 to 8 points, recovered this in most cases and advanced 1 point, then lost this and dropped 7 to 9 points, and closed barely steady, with sales of 240,100 bales. New Orleans was at one time 2 points up, later 5 to 6 down. Spot cotton here was quiet and unchanged; sales 79 for spinning. Wilmington advanced ⅛c. Norfolk 3-16c., and Mobile, 8c. Louis, and Memphis 1-16c. New Orleans sold 7,500, Memphis 6,000, St. Louis 1,600, and Augusta 1,218. Port receipts thus far this week 278,547, against 304,481 for the same time last week. New Orleans, Nov. 21.—"I think that on the more advance plenty of cotton sold from the interior will not be delivered in Europe. I think the majority of exporters here are short, and will buy $500 that the Houston movement, after Dec. 1, will be less than in the 9,000,000 year. I think Texas has moved her crop this year 25 ⅌ cent. quicker than in the 9,000,000 year. Interior movement in Mississippi not one-quarter so large as several weeks ago. Two bonds in the Vicksburg and Bend business withdrawn." Crawford, Tex., Nov. 21.—"Receipts falling off, 90 ⅌ cent. of the crop sold and gone forward." Mr. Peter Labouisse of New Orleans has sent a stalk of cotton six feet high to the New York Cotton Exchange. It came from a field within eight miles of Vicksburg, and was damaged by frost. It is stated that on all lace plantings in that district the plant is black, and bells black, soft, and mushy. A large operator in New Orleans, we hear, covered about 25,000 bales of cotton during this morning, and this narrowed the differences between New Orleans and New York. Liverpool advanced 1-16d. on the spot, with sales of 10,000 bales; futures advanced 8 points, and closed steady and about 4 points advance for the day of 8 points. In Manchester yarns were firmer; cloths were in moderate demand. Port receipts to-day 41,306, against 54,145 this day last week and 39,478 last year. New Orleans receipts to-morrow were estimated at 13,000 to 15,000, against 20,691 last Friday and 10,794 last year. The signal service predicted cooler weather in most parts of the cotton belt. Exports from the ports to-day 17,616. Augusta received 1,459, against 856 last year; St. Louis, 1,671, against 2,140, and Houston, 9,858, against 6,165 last year. St. Louis and Houston received to-day 11,504 and shipped 18,772. A New Orleans operator had much to do with a rally which occurred here at one time to-day. His purchases were on so large a scale that they attracted general attention. After this buying for short account, had subsided, values were prices declined, owing to local, Southern, and Liverpool selling, in spite of decreased receipts and higher Southern markets. The trading in futures was as follows:

TO-DAY'S FEATURES—The wheat fluctuations were within narrow limits, but in spite of increased exports and a pretty good foreign demand for the actual wheat, the turn of prices in the later business was slightly downward, owing mainly to lower cables and some long liquidation. It is declared that the crops of Argentina and Russia will be smaller than those of last year, but such statements failed to-day to stimulate prices. Corn was weaker, partly owing to favorable weather at the West. The receipts in the near future are expected to be liberal.

GROCERIES—Coffee declined 5 to 10 points on near deliveries and advanced 5 to 15 on distant deliveries, closing steady. Sales 18,750. Raws advanced ⅛c. to 1⅛c. Hamburg slightly lower. Rio receipts jumped up to 14,000 and Santos got 24,000. Europe bought. Local operators sold. Rio Janeiro strong; Santos firm. Rio exchange, 11⅝d. American warehouse deliveries, 19,865. United States visible supply of Brazil 470,324, against 473,494 a year ago. Strong cables to-day neutralized the effect of larger receipts, but the rise in Havre is supposed to have been due partly to manipulation by the bull clique there. The future trading was as follows:
