PROSPERITY IN THE MINES.

GOOD TIMES IN THE LAKE REGION AND IN THE BLACK HILLS.

Bluestone River District Drawing Many Prospectors From Nome—Winter Supplies Going Into the Alaska Camps—Rich Gold Find Near Helena, Mon.—Cripple Creek's Record.

HOUGHTON, Mich., Oct. 11.—The annual census of the mine workers, just completed, shows a total of 13,971 men employed in the mines and mills of Houghton county, as compared with 13,051 last year, a gain of 7 per cent. The number is nearly twice as many as were employed four years ago. This is the largest number of men employed in the mines of any county of the United States, outside of the leading coal districts. From present indications about 20,000 men will be employed within five years. The showing speaks eloquently of great prosperity, a condition unparalleled in the history of the Lake Superior copper district. In addition to the mines and mills, the smelters employ large forces, the railroads are employing twice as many men as four years ago and thousands of men are employed by the various contractors. Prendergast & Clarkson have about four hundred men working on the new dam of the Atlantic and Baltic mills, at Redridge. C. J. Johnson has 200 men on the Copper Range Railroad spurs and main line; the South Shore Railroad has just completed a forty-mile extension from Ogima to Mass City, for the Mass Consolidated Mining Company; large forces are employed on the extension of the Mohawk Railroad, the construction of the Mass and Isle Royale mills and in general building.

As a consequence of this activity general business in the copper district is unprecedented in volume. Over 1,00 new dwellings have been constructed this year, yet the demand for house room is greater than ever before, with rents ruling at entirely too high figures for comfort. Scores of new business blocks are going up in the leading towns to meet demands. A belt trolley line is now nearing completion and will give rapid transit between the principal mining, milling and commercial points of the county, and will eventually be extended into Keweenaw and perhaps into Ontonagon county. The changes in the copper district during the past few years have been marvellous.

The Mass mine owners are pushing work on their new mill. The mine is now ready to supply 500 to 1,000 tons of rock daily and the mining force has been reduced, pending the completion of the mill. Experts regard this as a mistake. Within six months after the new mill is opened the miners will be pushed to the limit to get out selected rock to feed the mill.

The Trimountain has decided on a mill site, a short distance west of the Atlantic and Baltic mills, on Lake Superior. The Champion will take the opposite side of the little stream.

The Arnold is gradually pulling up its production and its September output was the largest in the history of the mine.

The Phoenix has just cut up and shipped a five-ton mass of copper. This mine contains large quantities of mass copper, as well as a good supply of stamp rock. A stamp mill will soon be needed and will probably be built at Eagle River.

The two stamps at the Atlantic mill, now running on Baltic rock, crushed 8,629 tons of rock in September, obtaining therefrom 128 tons of mineral, or at the rate of 1½ per cent mineral for the month. This gives nearly 1¾ per cent ingot, and puts the Baltic in the same class as the Osceola as regards the amount of refined copper secured per ton of rock.

The copper mines of the district, almost without exception, are showing lower percentages of ingot copper than ever before. The tendency toward reduction of the percentage of copper secured from the rock stamped has been noted for many years and has led to the belief that the mines of Lake Superior are growing leaner with depth. This theory is backed by the statistics of production, but is nevertheless untrue. It is not so many years ago that a mill securing its copper at 50 cents a ton was doing remarkably good work, yet a number of the best mills of the district are now stamping rock for 25 cents, and it will be but a few years until some mill will get the cost down to 20 cents a ton, or even less. The cost of mining has also been greatly reduced by more powerful hoisting machinery, power drills, high explosives, better boilers and cheaper fuel. As a consequence of these improvements in every branch of the mining business, rock that could not possibly have been made to yield a profit a few years ago is now paying well for mining and stamping. The high price of copper has also helped to render the lower grade rock valuable. Four years ago, with copper under 10 cents, rock running three-quarters of 1 per cent could be mined and milled at a profit by very few mines. To-day such rock could be stamped at a handsome profit. The mines are making hay while the sun shines, and with copper at 17 cents a pound are crushing hundreds of thousands of tons annually that would have been discarded as absolutely worthless at so recent a period as 1895. There is far greater proof of profit in mining and crushing 500,000 tons of 1 per cent rock annually than in treating 100,000 tons of 2 per cent. rock.

ALASKA.

SEATTLE, Wash., Oct. 8.—The district that is now attracting the most attention is Bluestone River, about seventy-five miles north of Nome and 150 miles south of Port Clarence. This river and its ten or twelve tributaries, including Gold River, are said to exceed in richness anything yet discovered along the coast, as high as $10 and $20 to the pan being taken out. In several instances rockers have taken out over $1,000 a day. Although the discovery was made rather late in the season there was quite a stampede from Nome and nearly all the available ground was taken up. Many who contemplated coming out for the winter concluded that it would pay them to lay in their supplies and stay with the new camp, to be on the ground for early spring operations. While Port Clarence is from two to four weeks later in opening up in the spring it affords a safer harbor than Nome and the mines, being but a few miles in the interior, are rendered easily accessible. The camps along Bluestone and its numerous tributaries give great promise for active spring operations.

The old channels at the head of Anvil and Dexter creeks have been producing wonderfully, regardless of scarcity of water, and when the conditions are more favorable in the spring these old river beds will make a wonderful record.

It is estimated that 10,000 men will winter in Nome and adjoining districts. Many more came out on steamers during the past week for the purpose of obtaining supplies sufficient to last them until next season. All reports are of more cheerful character. Four more steamers, loaded to the guards with freight, sail this week, as high as $30 a ton being paid in some instances, and when cattle are taken, $100 a head is charged.

At Dawson the Government began the sale of unoccupied and forfeited claims last Tuesday, and speculation was running high. It is estimated that there are from 8,000 to 10,000 claims of this sort on the various creeks and beaches.

COLORADO.

COLORADO SPRINGS, Oct. 10.—Cripple Creek's gold output for nine months in 1900 is as follows: January, $2,423,500; February, $2,100,000; March, $2,225,626; April, $1,433,900; May, $2,033,800; June, $2,127,000; July, $1,750,200; August, $1,785,160; September, $1,931,000; total, $17,820,788. For a like period in 1899 the total was $12,550,780. The total for 1899 was $19,543,786. The output for the last quarter from Oct. 1 to Dec. 31 was $6,660,000, or a little more than one-half of the yield for the previous nine months. This difference in the output of the seasons is the usual record. During the summer surface work and development take the place of outputting to a large extent. This year is an instance. Much attention has been given to equipment of mines with new machinery, thus causing delays. Beginning in April the output was curtailed by unsatisfactory treatment charges. The big mines are now busy with increased facilities for hoisting ore and additional mills and smelters for treating it. An advance for the next three months to correspond with last year insures $27,000,000 as Cripple Creek's output for 1900.

For the fiscal year past the output was $24,836,296. From 1891 to 1900 the output was $85,139,808, making a total to date of $102,976,696.

The dividend record of public companies prior to 1900 was $11,572,077 43, of which $4,354,402 85 was paid in 1899. Thus far in 1900 over $2,000,000 has been disbursed, making a grand total of about $18,000,000.

Santa Rita, Pactolus and Little Puck companies continue active on Squaw Mountain. The former is still in rich ore. The latter two believe they have the bonanza vein, 1,500 feet of which may show up shortly in the Pargosse. This vein has yielded $1,000 a foot for seventy feet.

The Portland Gold Mining Company has broken ground at Colorado City for a chlorination mill to test success. Its initial capacity will be 100 tons daily, to be increased to 500 in time. The plant and also the Colorado-Philadelphia Reduction Works are now running are on the line of the Colorado Springs and Cripple Creek road, now nearing completion. The two plants make Colorado City a treatment centre.

The Vindicator company has reduced its quarterly dividend from five to two and-one half cents a share, owing to heavy equipment expenses. The amount, $27,000, will be paid to stockholders of record Oct. 20. The company's total to date is $493,500.

The Portland will pay its regular six cent quarterly dividend on Oct. 15. The amount is $180,000. This company has paid $3,367,080. The Portland is Cripple Creek's biggest dividend payer. Stratton's Independence is next with an excess of $2,000,000 paid in the past fifteen months, not counting $2,500,000 profits realized by its locator, W. S. Stratton, out of $4,500,000 output prior to the sale to its present owners for $10,000,000.

LAKE REGION IRON MINES.

DULUTH, Minn., Oct. 12.—The State of Minnesota has, for the first time, passed Michigan in its iron ore shipments. Reports to this date show that Minnesota mines, shipping through Duluth and its subports, have sent out more ore this year than those of both Michigan and Wisconsin. The lead will doubtless be maintained to the close of navigation, and is expected to be permanent hereafter. Minnesota thus leads all States in the Union in iron ore output and of foreign nations only England and Germany equal it. The State has shipped this year 8,500,000 tons and will pass 10,000,000 tons next month.

There is some inquiry among ore producers for prices and delivery after May 1, 1901. No sales have been made, but it is expected that Lake ores will sell $1 to $1.50 a ton less than the price that has been maintained steadily all through 1900. This will put the base price, standard old-range Lake Bessemer, at $4 to $4.50; standard Mesaba at $4.50 or better and standard old-range high phosphorus at perhaps $3. No such severe cuts in prices as have been seen in the past are likely to occur again in the Lake Superior region.

Ore is now coming to surface from the new mine of the Republic Iron and Steel and Steel Hoop combinations at Virginia, Mesaba range, and a space for 100,000 tons is being laid out. The mine will hoist that much before spring. All its product will be used by the two companies.

Adams mine of the Rockefeller syndicate will ship 700,000 tons. Its stock piles are all cleared.

Large amounts of stocked ore remain at Franklin group and at Hibbing. Commodore finishes its stocks this week.

Henderson's new pumping plant is finished and operating. It lifts 4,000 gallons a minute 325 feet. The mine this year will raise to surface nearly sixty tons of water for every ton of ore.

It is said that the Carnegie Company intends to fight in courts the collection of taxes under the new Michigan assessment, and that it will be backed by other mining companies, both iron and copper.

All the old range mines of the American Mining (American Steel and Wire) Company have resumed and will, it is announced, run steadily.

All men at No. 10 shaft of Tilden, Gogebic range, have been discharged until after election.

The Minnesota Iron Company, after spending thousands of dollars in exploration, has abandoned its option on seventeen 40-acre tracts near Mesaba station on which it was to pay $180,000.

A three-compartment shaft was started today at Virginia for the new Wyoming mine.

A mining engineer of prominence has begun work in the abandoned manganese mine at Eagle River, and is pumping out the 65-foot shaft. It will be repaired and then put to work.

At the Rouse gold mine on the Marquette iron range, a large cyanide plant has been put in, and 60,000 tons of old tailings, estimated to carry $1.50 in gold to the ton, will be run through. The work will be completed next year.

SOUTH DAKOTA.

DEADWOOD, Oct. 9.—The Homestake Mining Company is commencing to extend its mining operations northward toward the Blacktail mining district. For several years past practically all of the mining has been confined to the Lead side of the hill. At the Ruth mill, nearly a mile north of the principal Homestake workings, the ore is found in large bodies and it is generally believed that the mineralized belt, which has produced so many millions for the Homestake Company at Lead, extends at least five miles northward, which would take it through the west end of the Blacktail district. The Homestake Company is preparing old mills and making preparations to build another large cyanide plant a mile north of Lead, and the underground workings will be pushed northward toward Blacktail.

The Imperial Mining Company has announced that it will commence very soon the erection of the most complete cyanide plant in the Black Hills. This company was only recently organized, the principal capitalists being residents of Pittsburg, Pa. The company owns the American Express group of claims in the Blacktail district and has secured bonds on the surrounding territory. The American Express mine has been a very heavy shipper of ore to the Deadwood and outside plants. The ore will cyanide well, and as soon as the new plant, which will be of 100 tons daily capacity is completed ore will be mined once more. The district is very full of ore shoots that will run from $15 to $30 a ton in gold, and with the cyanide process with the modern improvements the properties will become payers from the start. The Imperial Company's plant will cost about $100,000 and will be equipped with roasters, chlorinating attachments and other applances to make it adapted to all kinds of ores.

There are two other companies from the East operating in this district. The Shawmut Mining Company of Boston has nearly completed a fifty-ton cyanide plant that will be run in connection with a thirty-ton Huntington mill. The ore is a cement that runs about $10 a ton gold. Across the gulch, the Boston-South Dakota, which is successfully operating a forty-stamp mill. The company will soon put in a cyanide annex. The heaviest producer of ore in the campis the Golden Gate Company, which is a Chicago concern. The company has acquired a tract of land over one mile square, and about seventy-five tons of ore are mined daily.

There are many reasons why the Black Hills now have a great prospect for a boom. Chief among them are the great advance made in the treatment of low grade ores, the completion of the railroad between the Black Hills and Denver, Col., which will bring in capitali with experience in mining, the prospect, which is almost a surety, of a railroad being built across the reservation from the Missouri River to the Hills, the permanent work of twenty new companies with eastern capital, organized this summer, the discovery of a number of rare materials, such as spodumene, wolframite, kaolin clay and lithograph stone, which are now being worked profitably, the attempt of Eastern capitalists to create a rival city to Deadwood and Lead, the enterprising men of the remarkable discoveries of rich ore made in all parts of the Hills this summer. The Black Hills people are awaking to their opportunities. They are uptime on the building of the twenty-two new cyanide plants and their interest in the new short line to Denver is being shown in a great excursion which will leave Deadwood and Lead this week for Denver. They will return with another excursion of business and mining men of Colorado, who will investigate the country from every standpoint. Colorado people are going to be the first to do much development work among the mines. The Mayors and Councils of Deadwood and Lead have sent invitations to the officials of the principal cities in Colorado and they have been answered very warmly. The commercial clubs of Denver expect to entertain the Black Hills excursion next week. Denver jobbers of all kinds are planning to get in on the bonanza of the Black Hills trade. All over the Black Hills there is prosperity. More new companies are being organized this fall than ever before in the history of the Hills.

UTAH.

SALT LAKE, Oct. 8.—The Silver King's monthly dividend of $75,000 was posted Saturday. Already there are indications that the dividend payers will present a new record for October, and that at least $301,500 will have been distributed before Nov. 1. The directors of the Consolidated Mercur will hand out $100,000 of the August and September earnings on Oct. 15, while the old Mercur has enough in the treasury to give a final division of about $14,000, or seven cents a share. To-morrow the Centennial-Eureka will post a dividend of $50,000, while the Daly-West will come forward with the usual $37,500, the Mammoth with $20,000 and the Swansea with $5,000.

The Dalton Gold Mining and Milling Company has just issued a circular letter to the stockholders officially advising them that a lease and bond has been given on the property for two years, naming the purchase price as $100,000 instead of $250,000 as first announced.

MONTANA.

HELENA, Oct. 8.—The Anaconda Copper Mining Company has declared a dividend of $1.25 a share with 75 cents extra, payable on Oct. 27. The amount is $2,400,000, making a total so far this year of $4,800,000, and a grand total since incorporation three years ago of $18,650,000.

The Parrot Silver and Copper Mining Company will pay its regular quarterly dividend of $1.50 a share, amounting to $244,775, on Oct. 29, making a total for the year of $1,370,100, and a total to date of $4,394,854, on an authorized capital stock of $5,300,000.

Ben Benson, a well-known mining man, is exhibiting some splendid specimens of gold ore, which he declares were found so close to this city that surprise will be expressed on all sides when he divulges the location of the ledge. The previous finest rubs in wires all through the country and to such an extent that it may be hammered into different shapes. It is estimated that it will run close to $25,000 a ton. Benson will not disclose the place of discovery until he has secured an option on the land.

Good strikes are reported in a prospect south of the East Pacific (where the phenomenally rich gold strike of $30,000 ore was made last week) and in another prospect south of the Comet property in the same vicinity, both paying from the grass roots. The ore is galena and lead carbonate that run high in silver and gold.

J. W. Bush has made a rich gold strike in the California mine in Williams Gulch.

A rich silver strike is reported from the Silver Belt mine, Neihart, where ore assaying from 600 to 2,000 ounces of silver a ton as been found. It is reported from Minnehaha Gulch that good copper ore bodies have been found in the Justice, Clementh and Lucky Joe mines, all of which will be developed on an extensive scale. The vein is from six to eight feet wide, and contains 20 per cent. copper, $22 in silver and $10 gold.

IDAHO.

IDAHO CITY, Oct. 7.—Col. W. H. Dewey has sent out supplies for continuing work on the group of mines on Thunder Mountain, on which he has secured an option. The mines are very large and the ore porphyry. The grade is low, but all will pay well in a large mill. If the properties turn out as expected a mill will be erected next year. Other properties in the district give promise of turning out well.

The New England dredges here are still running and turning out profits daily. They will continue work until Dec. 1 at least.

The dredge at Stanley Basin, which commenced work several months ago, has brought good returns.

At Wallace the Headlight Mining Company is working three shifts, running a tunnel to cut the vein at the depth of 600 feet. The Headlight is in the vicinity of the famous Mammoth, has the same surface showing and supposed to be on the same vein.

Coke is being hauled from Huntington to Mineral to operate the smelter which is being built at that place. There are many copper mines carrying large percentages of gold and silver in the district, and the building of the smelter will cause them to be opened up very soon. Work has already been resumed in many mines that had been closed for some time.

A five-stamp mill is being built at the head of Ophir Creek, a few miles west of Pioneerville. While the mill is going up the owners are washing the soft ore with rockers.

Snowstorms are driving prospectors out of the mountains.

WASHINGTON.

SEATTLE, Oct. 8.—The rush this week is to the Colville Reserve, where lands and mineral districts have been thrown open to the public by the Government. The country has been generally prospected, so that those who are now rushing in know where to go.

In Methow district a large amount of development work is under way and the mines are opening up well. In the Hidden Treasure the first and second levels are being connected and some very high grade gold ore is shown. This company recently purchased a mill site and building on Methow River, a mile from the mine, and will install a 20-stamp power plant which they hope to have in running order early in the spring. The ore averages about $100 a ton gold, but carload lots of selected ore have gone as high as $150 a ton.

The "45-mine," in Silverton district, has closed for the season, because the aerial tramways is not working. There is a large amount of first-class ore on the dumps that has been awaiting shipment since last spring. An effort will be made to work the tram in sections this winter.

The Wilbur mine, one of the first in Index district, to ship ore, has resumed shipments and will continue during the winter.

BRITISH COLUMBIA.

SEATTLE, Oct. 8.—The Greenwood smelter is now offering to reduce ores for $4 a ton, a reduction of $2. This will make more ore available and will stimulate the development of low-grade properties that have been neglected because the ores could not be marketed.

The output of the Rossland mines for the past week was 7,550 tons, the greater portion going to the Northport smelter. This district has produced a grand total of 144,000 tons this year.

The dredges on Fraser and Quesnelle rivers have done a good business this season, but the owners refused to make public the amount of their output. A number contemplate increasing their plants.

ARIZONA.

TUCSON, Oct. 5.—The last shipment of ore from the Silver King mine yielded 18 per cent copper and 101 ounces silver a ton. Pinal county mines seem to be running into copper, but at the same time retaining their other values. The copper resources increase with every foot of development work and in a few years Pinal county will rank among the great copper producers.

To-day's Eastern Fish.

Adjunct Professor Bashford Dean of the Columbia University, department of zoology, will spend his leave of absence at the head of a university expedition to Japan to study eastern fish. The facilities of the University of Tokio have been placed at Columbia's disposal and the party will make its headquarters at the marine biological station of the Government on the east coast. All material collected will be placed in the zoological museum of the university in Schermerhorn Hall.

Colleges and Schools.

For Boys & Young Men—City & Country.

Madison School, MONT VALE, New Jersey, on N. J. & N. Y. R. R. branch of Erie. 24 miles out. Winter session opens October 15th. Number of boarders limited to twenty. Age, from 12 years. Work, private tutoring with the advantages of school associations. Curriculum, preparatory to Columbia applied science. Physical Culture. Horsemanship (every pupil his horse). Fencing and field work. Facilities, Laboratories, Workshops and ample grounds beautifully situated. New building. G. VON TAUBE, Principal.

DWIGHT SCHOOL
15 West 43d Street, New York City.
21st Year opens Sept. 26th.
High class private school for boys from 7 to 20 years of age. Individual attention given boys whose education has been irregular. Large faculty. Laboratories. Gymnasium. Athletics.
Annual catalogue will be sent on application to ARTHUR WILLIAMS, B. A. Principal.

The Barnard School,
112 and 119 West 125th Street.
Kindergarten through College Preparatory.
WM. L. HAZEN, B. A., LL. B., Head Master.
THEO. E. LYON, B. S., Associate Head Master.

SYMS SCHOOL.
Robert H. Syms, William C. Simmons.
APPLY FOR CIRCULAR.
22 West 45th Street.

SACRED HEART ACADEMY.
Select Catholic Boarding School; thorough academic and commercial courses; location unsurpassed; military drill; terms moderate. Address Brother AUGUST, West Chester N. Y.

REGENTS'
and all other examinations, Central Preparatory School, 18 and 20 East 42d st.
W. W. SMITH, B. A., Principal.

Business Colleges.

The PACKARD COMMERCIAL SCHOOL 43d YEAR
101 E. 23d ST. N.Y. (COR. 4th AVE.) Phone 101-18
Individual instruction in all commercial branches. Students may enter at any time.
For more than forty years the Packard School has been in closest touch with the business world, and has opened the door of success to thousands of young men and women in all departments of business.
DAY AND EVENING SESSIONS.
Office open for registration of students every week day; also Monday, Wednesday and Friday evenings.

EAGAN SCHOOL OF SHORTHAND,
Temple Court, Beekman and Nassau Sts., New York. Expert individual instruction; begin any time; positions procured. Call or write.

WALWORTH INSTITUTE,
109—113 EAST 125TH ST.
29—33 WEST 42D ST.
Short, practical courses, day and evening, in Bookkeeping, Stenography, Typewriting, &c. Ladies' Department. Prospectus free.

Long Island Business College
145 to 149 South 8th St., Brooklyn.
The business training school of to-day for young men and young women.
DAY AND EVENING SESSIONS.
HENRY C. WRIGHT, Principal.

Kissick's Business Institute,
46-49 Ashland Pl., Brooklyn. A thorough, practical business education; modern methods. Bookkeeping, Stenography and Typewriting, $10 to $20 per term. English Classics, Higher Mathematics.

Schools of Languages.

LANGUAGES.
THE BERLITZ SCHOOL OF LANGUAGES,
1122 BROADWAY, N. Y. 73 COURT ST., B'KN.
Branches all over Europe and America. Terms begin now for reasonable trial lesson free. (AWARDED TWO GOLD AND TWO SILVER MEDALS AT PARIS EXPOSITION FOR BEST AND MOST PRACTICAL METHOD.)

LANGUAGES EST. 1890
VELASCO SCHOOL
185 SCHERMERHORN ST. B'KLN.

Schools of Physical Culture.

DR. SAVAGE GYMNASIUM,
308 WEST 59TH ST. Individual and class instruction of every description. Circulars.

Mining.

COPPER MINE. Sole owner of copper mine in North Carolina requires additional capital to increase output. Would sell part interest or whole if desired. Mine now producing daily. Fullest investigation solicited. Eighteen hours from New York; ¼ mile from railroad. OWNER, box 150 Sun office.

MINING, MILLING, SMELTING AND CONCENTRATING MACHINERY; CORLISS ENGINES; ESTIMATES FURNISHED. THE EDW. P. ALLIS CO., 95 & 97 LIBERTY STREET, ROOM 1108, NEW YORK.

I HAVE FOR SALE a large gold mine; it's producing, paying dividends; it's a sure lifetime 24 per cent. dividend payer, on an investment of $375, 000. I would like to be one of a number of gentlemen to form a company and take this property.
JEROME KENNEDY,
130 Broadway, New York city.

FATAL RUNAWAY.

A Farmhand Killed and His Employer Dangerously Injured.

FORT PLAIN, N. Y., Oct. 14.—Yesterday at about dusk, as James G. De Wandelaer and his hired man, James Cook, were hauling cornstalks from the field to the barn, the team of horses became frightened at a portion of the load sliding upon them and ran toward the barn, and before De Wandelaer and Cook could leap from the load the entrance was reached. The men, both greatly excited and standing erect, were crushed against the upper portion of the entrance and were hurled from the load. Cook was killed instantly, his neck being broken, and De Wandelaer was dangerously injured, a number of ribs being fractured and an arm broken, and he suffered internal injuries, the extent of which cannot at present be ascertained. De Wandelaer is prominent as a Republican and a member of the New York State Grangers' Association. His farm, where the accident occurred is in the town of Palatine, across the Mohawk from this village.

HIGHWAYMEN TOOK HIS SHOES.

One Sat On Sanford's Chest While the Other Took Them Off.

Gilbert Sanford of 95 Montgomery street, Jersey City, was attacked by two highwaymen in Railroad avenue early yesterday morning. He says they knocked him down and went through his pockets. When they found no money one of them sat on his chest while the other took off Sanford's shoes and ran away with them. Patrick Broderick of 165 Morgan street, and Patrick Ryan of 134 Railroad avenue, were arrested yesterday on a charge of robbing Sanford.

REAL ESTATE NEWS.

The following are the tables by districts for Manhattan and The Bronx of the conveyances, mortgages and projected buildings for the week ending Oct. 13:

CONVEYANCES.

	No.	No. Nominal.	Amount.
Downtown	34	16	$317,241
East Side	62	16	274,816
West Side	25	11	143,511
Harlem	47	27	246,477
Bronx	92	38	250,918
Totals	260	108	$1,222,963

MORTGAGES.

	No.	Amount.
Downtown	29	$321,450
East Side	39	512,424
West Side	28	449,365
Harlem	44	703,555
Bronx	72	373,020
Totals	212	$2,359,794

BUILDINGS.

	No.	Amount.
Downtown	14	$115,550
East Side	21	429,825
West Side	12	18,055
Harlem	8	330,800
Bronx	35	319,820
Totals	90	$1,214,050

The following are the corresponding tables for the week ending Oct. 6:

CONVEYANCES.

	No.	No. Nominal.	Amount.
Downtown	47	22	$1,545,049
East Side	44	22	418,047
West Side	49	20	487,214

Borough of Brooklyn—Sale or Rent.

SOUTH MIDWOOD,
FLATBUSH.
Nature has done her utmost to make South Midwood beautiful and healthful, and we have added all that money can buy in the way of improvements. Thirty nine minutes and a 5-cent fare from New York City Hall, it is nearer Wall street than Harlem is. Every care has been taken to keep South Midwood a model residence section. Every residence must be attractive. Each building plot must be at least 50 feet wide. No objectionable feature will be tolerated. A few first-class 12 and 14-room houses with all modern conveniences, on 50x100 feet plots, at $7,000 to $9,000. Write for maps and information.
GERMANIA REAL ESTATE CO.,
