Corn advanced sharply at Chicago and a small fraction here, owing to a brisk demand from July shorts, bull manipulation at the West and light offerings, but part of the rise was lost on realizing. Harris, Gates & Co. both bought and sold. The cables were broad higher. The available supply increased 1,218,000 bush. Wheat was quiet but firmer on higher cables, the rise in corn, foreign buying, decreasing stocks, showery weather in the Northwest and in the southwest and predictions of further showers, small Northwestern receipts, covering of shorts and more or less new buying. Paris rose 30 to 35 centimes. Liverpool said Budapest 4 kr. and Berlin ¼ to ⅛ mark. The available supply in the world, according to Bradstreet's, decreased 4,461,000 bush., against a loss of 133,000 last year. Part of the rise was lost before the close on a reaction at Paris, where prices closed unchanged to 15 centimes higher, and realizing. Chicago received a car of new wheat which graded No. 2 hard winter. According to some the movement of winter wheat does not suggest good crop prospects, or it shows light holdings in farmers' hands. St. Louis advices say that the river wheat below that city is not turning out within 25 to 40 per cent. of expectations. Harvest is getting under way and rains this week, it is argued, would be bullish. The Northwestern miller says that spring wheat is in splendid condition and that too much rain is the only thing to be feared. Cats were quiet and firm. The soil needs drying out in some sections. The available supply decreased 267,000 bush.

Light rains on Texas and a further precipitation in parts of the Carolinas, Georgia and Alabama and heavy liquidation for New York Southern and European account caused a further decline in cotton, particularly as the weekly Government report was in the main favorable, although it set forth that rain is needed in parts of Texas, Louisiana and Mississippi. The Government report said: "Over the northern portion of the western and central districts and generally throughout the eastern portion of the cotton belt cotton has experienced generally favorable conditions, although there are pressing injuries in portions South Carolina and Georgia. Over the southern portion of the central districts and throughout Texas the crop has made slow growth. The latest many fields in Mississippi and rain is now needed, especially in Texas, and in Mississippi adverse conditions the crop is holding on well and the reports of ice and boll weevil are diminishing. The crop is generally well cultivated throughout the cotton belt. Texas. Despite adverse conditions cotton holds its own, but in many sections growth arrested and life of plant depends on rain in near future. Ice and boll weevil decreasing, scattered reports of shedding leaves and bolls. Mississippi. Drought becoming severe east portion, growth retarded but generally cultivated well. Ice infesting many fields, blooms becoming general. North Carolina. Cotton not seriously damaged by drought, which has been relieved by copious rains; size, color and condition good. South Carolina. Cotton clean, full of squares with some blooms, ice damaging in parts of georgia. Drought generally broken, cotton fully cultivated and growing rapidly in majority of counties, blooming profusely in south portion and forming squares in north and middle sections, general outlook highly favorable, although ice has appeared in numerous sections. Alabama. Clean and healthy but growing slowly, squares general, some blooms. Louisiana. Dry and hot, cotton needs rain, but holding its own except in scattered localities, blooming and fruiting generally, ice damaging crop in several localities. Tennessee. Fine prospects for cotton. Arkansas. Cotton making good growth, clean and well cultivated, beginning to bloom. Missouri. Cotton doing well. Oklahoma and Indian Territory. Cotton making rapid growth and squaring abundantly, being chopped out to good stand.
