

WOMAN COULD HARDLY STAND

Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Fulton, N. Y. — "Why will women pay out their money for treatment and receive no benefit, when so many have proved that Lydia E. Pinkham's Vegetable Compound will make them well? For over a year I suffered so from female weakness I could hardly stand and was afraid to go on the street alone. Doctors said medicines were useless and only an operation would help me, but Lydia E. Pinkham's Vegetable Compound has proved it otherwise. I am now perfectly well and can do any kind of work." — Mrs. NELLIE PHELPS, care of R. A. Rider, R. F. D. No. 5, Fulton, N. Y.

We wish every woman who suffers from female troubles, nervousness, backache or the blues could see the letters written by women made well by Lydia E. Pinkham's Vegetable Compound. If you have bad symptoms and do not understand the cause, write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for helpful advice given free.

METROPOLIS OF THE WILDS

Spokane, City of a Hundred and Fifty Thousand People, Has Good Trout Fishing Within Limits.

A city of a hundred and fifty thousand people that has good trout fishing within its city limits and Indians living in their teepees a mile and a half away is something that you cannot grasp unless you know the West. And even if you do, Spokane would strike you as something of a surprise. It looks as though it had been built yesterday in what was a virgin wilderness the day before—and yet made complete with street cars and electric lights and everything that you could find in a New England town, except, perhaps, the cultured atmosphere.

The Spokaneites do not miss the cultured atmosphere. If you asked about it they would probably tell you that they prefer the smell of the pines. For they are an outdoors-loving crew. A citizen of Spokane may attend a board of directors' meeting in the heart of the city at 10 a. m. and at 4 p. m. he may be hunting bear. The mountains crowd right down upon the city and there are fifty lakes within a radius of a hundred miles.

Spokane, like Rome, was not built in a day, but it was set up at a rate that makes all of those old sayings about how long it takes to do things look hollow and meaningless. It was only in 1838 that the Indians got their first decisive defeat in this region and the first locomotive arrived in 1881. By 1890 they had something of a town started, but it was wiped out by fire that year.

The real growth began when the river was turned into electric power—170,000 horse. From this giant dynamo electricity reaches out through the canyons to hundreds of mines, driving the power trans into the bowels of the mountains, bringing wealth to the city, which sits like a spider at the center of its mighty web or current.

Facts are stubborn things that never apologize.

as coffee's successor on the family table makes for better health and more comfort. Preferred by Thousands "There's a Reason"

WORK IN HOME GARDEN

Number of Vegetables for Use in Following Winter.

Adequate Supply Will Do Much to Make Family's Fare Attractive and Economical—Cultivation and Storage.

There are a number of vegetables which, though grown in the summer, are usually planted for use in the following winter. An adequate supply of these produced in the home garden will do much to make the family's winter fare more attractive and more economical. Among garden products of this type may be named cabbage, carrots, parsnips, turnips, and rutabagas.

To store cabbage, the heads should be buried in pits or placed in cellars. One method is to dig a trench about 18 inches deep and 3 feet wide and set the cabbage upright with the heads close together, and the roots embedded in the soil. When cold weather comes the heads are covered lightly with straw and 3 or 4 inches of earth put in. Early cabbage cannot be kept, as it does not stand hot weather well. It should be used soon after it has formed a solid head.

Cauliflower is cultivated in much the same way as cabbage, but when the heads begin to develop the leaves may be tied over them in order to exclude the light and keep the heads white. Cauliflower requires a rich,

Squash and Beet.

moist soil and thrives best under irrigation. The tender heads of this vegetable are boiled with butter or cream, and also used for pickling.

The roots of the parsnip are dug late in the fall and stored in cellars or pits, such as cabbage is, or else are allowed to remain where they are grown and are dug as required for use. All roots not dug during the winter, however, should be removed from the garden, as they will produce seed the second season and become of a weedy nature. When the parsnip has been allowed to run wild in this way the root is considered to be poisonous.

Carrots are cultivated in practically the same way as the parsnip, but are not thinned so much and are allowed to grow as thickly as planted. Those not used during the summer are dug in the autumn and stored in the same manner as parsnips or turnips. If there is a surplus it may be fed sparingly to horses and mules or cattle.

Turnips require a rich soil and may be grown either as an early or late crop. For a late crop it is customary to sow the seeds broadcast on land from which some early crop has been removed. In the North this is generally done during July or August, but the usual time is later in the South. The plants are quite hardy

Cabbage and Carrots.

and the roots need not be gathered until after several frosts. They may then be stored in a cellar or buried in a pit outside. Before storing, the tops should be removed. If an early crop is desired the seed should be sown in drills 12 to 18 inches apart as early in the spring as the condition of the soil will permit. After the plants appear they are thinned to about 3 inches. Two pounds of seed are required to plant an acre.

The rutabaga is quite similar to the turnip and is grown in much the same way. It requires more space, however, and a longer period for its growth. It is used to a considerable extent for stock feed and has the advantage of being quite hardy.

WEEDS REQUIRE MUCH WATER

Plain to Be Seen That Cutting Down Noxious Plants is Moisture Saved for Crops.

A large weed may use as much as a barrel of water. A plant weighing one pound when dried has used up 700 to 800 pounds of water in making its growth. 70 to 80 gallons, making nearly two barrels. From this it is plain that cutting down weeds is a very good way of saving moisture for the crop.—North Dakota Experiment Station.

LEGUMES CAUSED TO THRIVE

When Necessary Organisms Are Not Present, Scatter Soil From Some Inoculated Field.

Some legumes require inoculation. That is, the soil is not always supplied with the organisms that cause legumes to thrive and use free nitrogen. When these organisms are not present it is necessary to introduce them by scattering the soil from an inoculated field over the ground to be planted in the particular legume.

CALF FEEDING POINTS

1. Let calf have colostrum or first milk; take from mother not later than fifth day.
2. Feed whole milk for two weeks; gradually change to skim milk, using ten days in making the change.
3. Start with eight to ten pounds and gradually increase to twelve to sixteen pounds at six months.
4. Begin feeding ground corn and oats at two weeks of age.
5. Provide good alfalfa or clover hay at all times, good pasture when possible.

MOISTURE STOLEN BY WEEDS

No Crop That Requires and Must Have More Water to Make Growth Than Common Weeds.

Did you ever hear a farmer complain of the growth of the weeds and complain at the same time of the weather being too dry for the crops? There is no crop that requires and must have more moisture to make a big growth than the common weeds. Wherever the weeds are big, unless it be some such weed as the Russian thistle that lays its limbs on the ground and prevents evaporation, there has been moisture enough to grow a crop. The trouble is, so many of us let the weeds get the start of the crop. We don't cultivate enough to kill all the seed that has sprouted when we plant grain.

Then again, many of our strong growing weeds have tap-roots that penetrate deeper than the grain roots and get a good deal of the capillary moisture coming up through the soil before it reaches the grain roots.

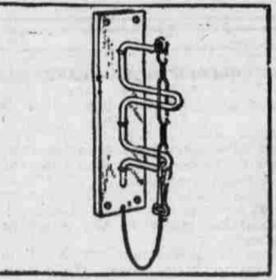

What a shame it is to spend so much work planting grain and either sowing weed seed with it or not killing the weeds that are already started in the field and preventing their robbing the grain of its moisture.

And what an injustice to blame the weather for such a condition!

HANDY HANGER FOR HARNESS

Arrangement Shown in Illustration Will Keep Horse's Outfit Off of Floor and Clean.

This is a new idea of a harness hanger. Many a farmer has hung up his harness after a hard day's work and come back to the barn the next morning to find it on the ground and

Harness Hanger.

tramped under the feet of the horses. It is hard on the harness and bad for the animals that have to wear it to have it encrusted with dirt. With this handy hanger the harness is hung up in the manner best calculated to keep it straight, and with a few seconds more of work a guard is snapped over the ends and the harness will be there until it is taken down again.

WEEDS SOON BECOME MENACE

Especially So Where Grass is Sparse and Unthrifty—Profitable to Use the Mower.

In permanent pasture, especially where the grass is sparse and unthrifty, weeds become a menace. If neglected as the seasons go by these weeds will spread over the entire pasture, in time smothering or crowding out the valuable grass. Sheep will keep most of these weeds in check, but where no sheep are kept headway is gained rapidly.

It is easiest to eradicate these weeds when they first make their appearance and are few and scattered. The work can be accomplished with the hoe and scythe. If, however, they have gained too great a headway the mower must be employed. It is both practical and profitable, anyway, to run over the pasture fields with the mower so as not to leave any weeds go to seed.

CARING FOR PASTURE LANDS

Good Grazing Cannot Be Expected Where There is Large Amount of Water—it Pays to Drain.

Pasture lands that are saturated with water cannot be expected to furnish good grazing, besides it's very unhealthy for live stock. By proper and careful drainage much of the wet and marshy pasture land—which now produces only unpalatable, tough, fibrous feed, if any at all—can be made into profitable pasture land, which, when tiled, will be found to be very productive agricultural land.

Palatable and nutritious grasses for our flocks and herds cannot be expected to grow continuously on slighted pasture land. It will run out. It pays to drain it and feed it with home-made fertilizers evenly distributed with a manure spreader.

ROAD BUILDING

BENEFITS OF CONCRETE ROAD

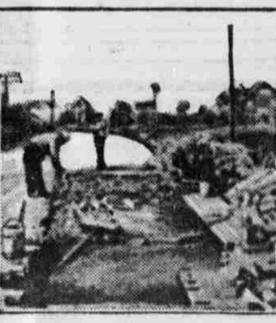

Enables Farmer to Haul Two Loads at One Trip, Instead of One Load at Two Trips.

Reduced to simple terms, a concrete road helps the farmer haul two loads at one trip instead of one load at two trips; or, it doubles the size of the load and cuts in two the tractive power necessary to transport farm produce. With less capital tied up in horses there is more cash to put into equipment to produce more cash. The concrete road reduces the strain on horses and lengthens their lives. It reduces wear on wagons and harness. Where motortrucks are used it lessens tire and fuel expense. It puts the farmer in a state of preparedness to reach markets quickly when prices are best, and he can take his profits and get home with more cash than he could by slow hauling on a bad road. It adds to the acreage value of a farm because it increases its earning possibilities. A concrete road makes all of these advantages permanent, bringing its full profit to the farmer daily in the form of time, money and effort saved.

METHOD OF PAVING REPAIRS

Cleveland Contractor Reduces Gang by Use of Pneumatic Chisel—Gasoline for Power.

A paving contractor of Cleveland, O., has reduced his repair gang to two men and a foreman for such work as is shown in the illustration, where a brick pavement is to be patched. The city is said to have a larger mileage of brick than any like area in the world, and economical methods of repair are therefore important. This contractor first has all the old paving removed with pick and sledge, except along the edge of the patch. There the old bricks are loosened for removal with a pneumatic chisel. This cuts out the old mortar and leaves a

Repairing Brick Pavement.

clean, sound "key" for the new pavement to meet as it is laid. The sound bricks taken up are also cleaned by the pneumatic tool and relaid, which is another economy. Power for the tools is furnished by a portable outfit consisting of a gasoline engine and an air compressor mounted as a unit upon a truck that can be moved along the pavement by hand.—Popular Mechanics Magazine.

HIGHWAY WORK IN OKLAHOMA

County, State and Government Co-Operating on Building Road Through Important Towns.

Oklahoma has made a new departure in convict road work. Pollatonic county, the state, and the United States office of public roads and rural engineering are co-operating on building a road, 85 miles long, which passes through the important towns of the county. The county is furnishing the necessary funds and a portion of the equipment; the state, the remainder of the equipment and 50 prisoners and 4 employees.

LIGHT DRAG NOW PREFERRED

Things Can Be Done With It That Cannot Be Done With Heavy One—Weight Can Be Added.

Build a light drag. One can do things with a light drag that he cannot do with a heavy one. And then one can weight a light drag to make it heavy. But how can one lighten a heavy drag? Do not build the drag too long; especially if your roadway is rather narrow or runs between high banks.

Surfaced Roads in Georgia. During the five-year period ended in 1914 Georgia surfaced 6,864 miles of her roads. This is at the rate of more than four miles per working day.

Feature of Road Development. A most significant feature of road development is the construction of better surfaces as a result of automobile traffic.

Most Important Road Tool. The road drag is the most important tool for road maintenance.

Worth While Knowing.

During the peach season children are often in danger of swallowing the peach stones and choking on them. An old remedy tried by our mothers and grandmothers is to pour into the child's mouth the unbeaten white of an egg and the stone will slide down with it.

Only those on the lower part of the wheel are in favor of revolution.

In the Greenroom.

Ingenu—I know a man who told me that in the last month he had a thousand curtain calls.
Juvenile Man—Did you believe him?
Ingenu—Certainly. He's a fashionable house furnisher.

Never argue with a man who talks loud. You couldn't convince him in a thousand years.

Honest Advertising

THIS is a topic we all hear now-a-days because so many people are inclined to exaggerate. Yet has any physician told you that we claimed unreasonable remedial properties for Fletcher's Castoria? Just ask them. We won't answer it ourselves, we know what the answer will be. That it has all the virtues to-day that was claimed for it in its early days is to be found in its increased use, the recommendation by prominent physicians, and our assurance that its standard will be maintained.

Imitations are to be found in some stores and only because of the Castoria that Mr. Fletcher created. But it is not the genuine Castoria that Mr. Fletcher honestly advertised, honestly placed before the public, and from which he honestly expects to receive his reward.

Genuine Castoria always bears the signature of *Dr. J. C. Fletcher*

Nothing Wasted.

"Jack Spratt would eat no fat, his wife would eat no lean, and so between them both they kept the platter clean."

"High types of food conservers," commented Mr. Wombat.—Louisville Courier-Journal.

Only Temporarily.

"The Comeneps boast that they have a peerless daughter."
"Well, she won't be peerless long, for she's begging her father now to buy her an earl or a duke."

The First Crop.

"How's your garden coming along?"
"Fine," replied Mr. Crosslots. "I have already got enough fishing worms out of it to represent the makings of several breakfasts."

Offers Complete Course in Agriculture
Full courses also in Letters, Journalism, Library Science, Chemistry, Pharmacy, Medicine, Architecture, Commerce and Law.

Raise High Priced Wheat on Fertile Canadian Soil

Canada extends to you a hearty invitation to settle on her FREE Homestead lands of 160 acres each or secure some of the low priced lands in Manitoba, Saskatchewan and Alberta. This year wheat is higher but Canadian land just as cheap, so the opportunity is more attractive than ever. Canada wants you to help feed the world by tilling some of her fertile soil—land similar to that which during many years has averaged 20 to 45 bushels of wheat to the acre. Think of the money you can make with wheat around \$2 a bushel and land so easy to get. Wonderful yields also of Oats, Barley and Flax. Mixed farming in Western Canada is as profitable an industry as grain growing.

The Government this year is asking farmers to put increased acreage into grain. There is a great demand for farm labor to replace the many young men who have volunteered for service. The climate is healthful and agreeable, railway facilities excellent, good schools and churches convenient. Write for literature as to reduced railway rates to Supt. of Immigration, Ottawa, Can., or to

Worried.

"I don't know what I'll do if my boy has to go to war."
"I wouldn't worry so much if I were you. Perhaps he won't be drafted."
"I know, but I just can't bear the thought of him ever having to go."
"That is a fear that all mothers have to face. Has your son registered?"
"Dear me, no, not yet. But I'm just worried to death for fear that some day he will be called away from me."
"How old is your boy?"
"Just six months old yesterday, and the loveliest boy that ever was born."

TRY A MEDICINE THAT PROVES ITS VALUE

During the entire period of time that I have been handling Dr. Kilmer's Swamp-Root I have never heard a single complaint. My customers are generally pleased with results obtained and speak words of praise for the merits of the preparation.

Very truly yours,
GILL COMPANY, Druggist,
Per Julian J. Gill,
Sept. 29, 1916, Starkville, Miss.

Prove What Swamp-Root Will Do For You

Send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample size bottle. It will convince anyone. You will also receive a booklet of valuable information, telling about the kidneys and bladder. When writing, be sure and mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

Conservation.

"Did you have any luck fishing?"
"Well, I didn't catch any fish. But I made the same piece of bait last a remarkably long time."

After the Murine is for Tired Eyes.

Murine Red Eyes—Sore Eyes—Itching Eyes—Irritated Eyelids—Swelling of the Eyelids—Mucous Discharge—Tearing of the Eyes—Stinging of the Eyes—Blepharitis—Conjunctivitis—Ophthalmia—All these troubles are cured by Murine. It is a powerful and safe eye treatment for all eye troubles. It is sold at all drug stores and by mail. The Patent Eye Company, Boston, Mass.

DAISY FLY KILLER

placed anywhere, attracts and kills all flies. Fast, clean, ornamental, convenient, cheap. Lasts all season. Made of wash, can't splash or slip over; will not soil or ruin anything. Guaranteed effective. Sold by dealers, 4¢ sent by express prepaid for \$1.00.

HAROLD BOMERS, 150 DE KALE AVE., BROOKLYN, N. Y.

A GUARANTEED REMEDY FOR HAY FEVER--ASTHMA

YOUR MONEY WILL BE REFUNDED BY YOUR DRUGGIST WITHOUT ANY QUESTION IF THIS REMEDY DOES NOT BENEFIT EVERY CASE OF ASTHMA, BRONCHIAL ASTHMA AND THE ASTHMATIC SYMPTOMS ACCOMPANYING HAY FEVER, NO MATTER HOW VIOLENT THE ATTACKS OR OBSTINATE THE CASE

DR. R. SCHIFFMANN'S ASTHMADOR

AND ASTHMADOR CIGARETTES

positively gives INSTANT RELIEF in every case and has permanently cured thousands who had been considered incurable, after having tried every other means of relief in vain. Asthmatics should avail themselves of this guarantee offer through their own druggist. Buy a 50-cent package and present this announcement to your druggist. You will be the sole judge as to whether you are benefited and the druggist will give you back your money if you are not. We do not know of any fairer proposition which we could make.

R. Schiffmann Co., Proprietors, St. Paul, Minn.

ECZEMA!

Money back without question if HUNT'S OINTMENT fails in the treatment of ITCH, ECZEMA, KINGWORM, FETTER or other itching skin diseases. Price 50¢ at druggists, or direct from A. S. Richards Medicine Co., Newark, N. J.

Every Woman Wants Pastine

ANTISEPTIC POWDER FOR PERSONAL HYGIENE

Dissolved in water for douches stops pelvic catarrh, ulceration and inflammation. Recommended by Lydia E. Pinkham Med. Co. for ten years. A healing wonder for nasal catarrh, sore throat and sore eyes. Economical, the extraordinary cleaning and germicidal power. Sample Free, 50¢ all druggists, or ordered by mail. The Patent Eye Company, Boston, Mass.
