M., and will be reopened on the 15th day of March, 1905.
The Missouri Pacific Railway Company.
By GEORGE J. GOULD, President.
A. H. CALEF, Secretary.

FINANCIAL AND COMMERCIAL.

WEDNESDAY, March 8.

There was a somewhat larger volume of trading in securities to-day, and prices at the close of business were generally higher than they were yesterday, this again illustrating the recent tendency of the market to alternate on successive days between comparative strength and weakness. The larger activity and the gain in prices to-day were, however, due chiefly to transactions occurring in the last hour of the Stock Exchange session affecting one stock, Reading common. Before that time the market, although presenting a firmer undertone, was almost as dull and listless as it was yesterday, commission house business showing no improvement and professional speculators continuing slowly to curtail their operations. As it was, final price changes were more or less irregular. Only small advances were made in the Union Pacific group, uncertainty as to the exact effect and possible sequelæ of the decision of the Supreme Court in the Northern Securities case seeming to check buying in this direction. Consolidated Gas was depressed by the news that the members of the majority party in the Legislature were to caucus to-night on the various gas bills that have been introduced and the fact that the Governor of the State appears to be taking an active part in pressing for a reduction in the price of gas in this city. Sharp selling of American Sugar Refining stock at one time caused erratic fluctuations in its price; and this was apparently produced by the publication of a statement, emanating from a source usually highly esteemed in the sugar trade, to the effect that the price margin between raw and refined sugars was such at present, and had been for some time, as to leave only a very small profit on refining operations. The statement also characterized the recent rise in the price of the American Sugar Refining shares as due to utterly unwarranted speculation. On the other hand, American Smelting and Refining stock rose to-day on further talk of the absorption by the company of other corporations. Renewed emphasis was laid by speculators upon the probability of an increased dividend upon Norfolk and Western common stock, and this led in the early part of the day to no little buying of the stock. The rumor spread that the forthcoming decision of the highest court of Montana in a long pending litigation affecting the ownership of an important copper mine in that State would prove to be favorable to the Amalgamated Copper Company, and this fact, coupled with the declaration of an initial dividend upon the shares of a large copper producing company dealt in the Boston market and, with the general emphasis laid in all well informed discussion upon the strong condition of the copper trade, led to a rise in Amalgamated Copper stock. It was also accompanied by larger buying of the Anaconda shares than has been witnessed for a long period. There was a continuation of the upward movement in Atchison and Canadian Pacific, and in the later afternoon the feature of the market became the advance in the anthracite coal shares. Delaware and Lackawanna stock first rose 14 points, and this was followed by heavy buying of Reading common stock, which elevated its price nearly three points. Quotations for the Delaware and Hudson and Erie shares immediately fell in line with this movement and the security market as a whole became sympathetically strong likewise.

The foreign markets to-day were much like our own, dulness prevailing there, but prices as a rule showing greater firmness. The only interesting incident in the international financial situation seemed to be the pronounced strength in foreign exchange here. No particular reason for this was made known and the movement was hardly such as to indicate any near resumption of gold exports. It may have some bearing upon the question of local money rates, however. Domestic exchange in many of the interior cities moved definitely against this centre to-day and banking interests here would not be surprised to see call money rates rise moderately at any time. Another heavy break in the price of wheat, caused, it was said, by many evidences of the fine condition of winter wheat, sent quotations for the staple down to the lowest point of the year. The usual monthly report of returns from the blast furnaces exhibited a small decrease in production in February, due to the shortness of the month, but showed also that consumption of pig iron was proceeding at a rate that was taking care of the normal output of the commodity. Our consumption of all iron and steel materials is obviously going ahead at an unprecedented rate, although absorption of these articles in our home markets has caused a marked restriction of export sales.
